Message from Minister Greg Rickford

Hunting is a much-beloved pastime in Ontario, and the continuance of countless years of tradition. There are few other recreational activities that connect participants so completely with the wilderness, forests and waterways of this great province.

Hunting is also central to the traditions of Indigenous people across Ontario. I recognize the important role that hunting plays in their culture and history.

As Ontarians, we are very fortunate to have world-class hunting opportunities right across the province — opportunities that attract Canadians from other provinces, and hunters from around the world.

Our government is committed to preserving our natural heritage for the future, while providing hunters with a variety of opportunities in the present.

For the 2022 season, the Ministry of Northern Development, Mines, Natural Resources and Forestry continues to encourage hunters to submit their hunter reports. My ministry relies on the data from these reports to make well-informed wildlife management decisions, including tag quotas, seasons, and bag limits. We are very grateful to hunters for their continued co-operation with reporting their hunting activities.

Information received through hunter reporting on turkey through the spring of 2021 has shown that some additional Wildlife Management Units (WMUs) in Southern Ontario have robust populations that can support a new fall turkey season. As a result, my ministry has added new fall turkey seasons in seven WMUs to offer additional opportunities for hunters.

The white-tailed deer is an iconic and highly valued species in Ontario, and an important component of our biodiversity. We are committed

to managing white-tailed deer populations sustainably and maintaining healthy populations across Ontario. My ministry has made changes to simplify and align deer season types and duration across the province. These changes provide more clarity to hunters, maintain and increase hunting opportunities and improve consistency in our wildlife management efforts.

We continue to improve moose management to benefit moose populations and provide a fairer system of allocating moose tags. I encourage moose hunters to learn more about the tag allocation process, and carefully consider how best to apply under the new allocation system. More information can be found at [Ontario.ca/moose](https://ontario.ca/moose) and on page 58 of this summary.

My ministry is committed to reducing barriers for individuals with different learning styles and accessibility needs, while maintaining a consistent hunter education and training system. This year, the Ontario Hunter Education Course is available both in person and online. Students may choose either option, depending on their learning style and needs.

Conservation of our abundant wildlife is our shared responsibility, to ensure that the pastime we love will remain viable and will provide hunting opportunities for future generations. I encourage all prospective hunters to familiarize themselves with the information in this summary, and to follow all safety rules, including public health guidance for COVID-19. I'd like to take this opportunity to wish everyone a safe and exciting hunt, and the best of luck as you participate in this time-honoured activity.

Sincerely,
Hon. Greg Rickford
Minister of Northern Development, Mines, Natural Resources and Forestry

How to Use this Regulations Summary

This is a summary of information dealing with hunting licences and hunting laws in Ontario. This summary is neither a legal document nor a complete collection of the current regulations. It is meant to be a convenient reference only. For complete details, see:

- A. the *Fish and Wildlife Conservation Act, 1997*, and the regulations made under this Act;
- B. the *Migratory Birds Convention Act, 1994* (Canada), and the Migratory Birds Regulations;
- C. the *Endangered Species Act, 2007*, and the regulations made under this Act;
- D. the *Species at Risk Act* (Canada), with regard to federally listed species that are threatened, endangered or extirpated and their critical habitat;
- E. the *Trespass to Property Act*; and
- F. the *Firearms Act* (Canada).

This summary is divided into a number of sections that provide information about hunting licences, licensing requirements and general hunting regulations. In addition, each game species or group of game species has a section in this summary. Each species section covers basic regulations on hunting the species, including open seasons and other relevant information. Open season dates are inclusive: all dates including the first and last dates stated in the summary are open.

Wildlife Management Unit (WMU) boundaries are shown in the front portion of this summary. You can obtain more detailed WMU maps at ontario.ca/WMUmap.

Contact Us

Please contact the Natural Resources Information and Support Centre (NRISC) at 1-800-387-7011, Monday to Friday from 8:30 a.m. to 5:00 p.m. (ET) or by email at NRISC@ontario.ca

About our Cover

For many hunters, the perfect day in the field is being out in the woods on a bright autumn day hunting for ruffed grouse.

The ruffed grouse, sometimes referred to as a partridge, is common across much of the province. It is one of four grouse species native to Ontario, which also includes spruce grouse, sharp-tailed grouse and willow ptarmigan.

Ruffed grouse is by far the most popular small game species in Ontario. A 2020 survey of Ontario small game hunters found that most (63%) preferred ruffed grouse and grouse in general (77%) to all other small game species. Ruffed grouse are an important component of Ontario's biodiversity, as well as generating well over one hundred million dollars annually in hunting-related expenditures.

Review the regulations for hunting ruffed grouse in the Small Game and Furbearing Mammals section (p.86) and enjoy your pursuit of this outstanding game bird this fall.

100%

of your licence sales go towards the future of fish and wildlife in Ontario.

ontario.ca/fishhuntfees

Your licence dollars support:

- Big game wildlife population surveys to assess population densities.
- Monitoring big game populations for disease.
- Hunter education.
- A province filled with opportunities to hunt deer, moose, elk, bear, wild turkey and small game.
- Conservation officers who protect natural resources and public safety.

Ontario 

Has your Outdoors Card expired?

More than 340,000 Ontario resident Outdoors Cards expired on

December 31, 2021

If your Outdoors Card has expired, renew it today:

- Online: ontario.ca/outdoorscard
- By phone: 1-800-288-1155
- In person: at a participating ServiceOntario or licence issuer

Ontario has moved to a single version Outdoors Card for all anglers and hunters. Your hunting accreditation will be documented within the licensing service.

Important Messages for Hunters

Occasionally, additional information for hunters becomes available after the Hunting Regulations Summary is printed. For more information, please see ontario.ca/huntingupdates

NEW

Remember to Submit Your Reports

Starting in 2022, hunters who fail to report will be subject to a \$25.00 surcharge that will automatically be applied to the next draw application, licence or tag purchase for that species (generally in the next year). The \$25.00 surcharge will be applied for each report that a hunter fails to submit. If a hunter fails to submit a hunter report on two consecutive occasions for the same species, they will be prevented from purchasing the relevant product(s) (e.g. draw application, licence or tag) the following year. See the Mandatory Hunter Reporting section (p.22) for details.

NEW

Deer Season Changes

The ministry has made deer season changes to simplify and align deer season types and duration across the province. See the White-tailed Deer section (p.40) for details.

NEW

Ontario Hunter Education Course

Ontario's Hunter Education Course is now available online or in-person. See the Ontario Hunter Education Course section (p.26) for details.

NEW

Fall Wild Turkey Seasons

The ministry has added seven new fall turkey seasons (WMUs 60, 63, 69, 70, 74, 75 and 86). Improved information from hunter reporting indicates populations in these WMUs are robust and meet the criteria in Ontario's turkey management plan to support fall turkey hunting opportunities. See the Wild Turkey section (p.82) for details.

NEW

Invasive Wild Pigs

As of January 1, 2022, a new regulation under the *Invasive Species Act* makes it illegal to hunt pigs in the province. Hunting wild pigs is not an effective approach to control their spread or eradicate them.

When wild pigs are hunted, they flee into new areas and learn to avoid humans. They are quick to reproduce, and populations are known to rebound rapidly. Prohibiting hunting is one component of Ontario's approach to prevent the establishment of wild pigs.

Although hunting of pigs is prohibited, hunters still have an important role in addressing the wild pig problem. Given the knowledge and time that hunters spend outdoors across the province, the ministry is seeking their partnership and expertise in reporting wild pig sightings. To learn more about reporting wild pig sightings, the new regulation, and what the province is doing to actively address the wild pig problem, including Ontario's Strategy to Address the Threat of Invasive Wild Pigs, visit ontario.ca/wildpigs.

What is the Fish and Wildlife Heritage Commission?

The Fish and Wildlife Heritage Commission consists of members representing all regions of Ontario that have a range of experience, knowledge, and insight related to fishing, hunting, and trapping activities in Ontario.

The FWHC has responsibilities to provide advice and make recommendations to the Minister, related to the promotion of fish and wildlife activities, and the operation of the Fish and Wildlife Special Purpose Account (SPA).

Ontario 

Important Messages for Hunters

NEW

COVID-19 and deer

SARS-CoV-2, the virus that causes COVID-19, has been detected in white-tailed deer in Ontario. There are recommended precautions when handling or dressing a deer carcass. For more information, visit <https://www.canada.ca/en/public-health/services/diseases/2019-novel-coronavirus-infection/prevention-risks/animals-covid-19.html#a4>.

Reminders

Mandatory Hunter Reporting

There are mandatory hunter reporting requirements for deer, moose, elk, black bear, wild turkey and wolf/coyote. See the Mandatory Hunter Reporting section (p.22) for details.

Use or Possession of Natural Attractants

It is illegal to use or possess any product containing natural attractants including blood, urine, gland oils and other fluids of any member of the deer family, **for any purpose**. Only artificial or plant-based products can be used. Non-resident hunters coming to Ontario to hunt: don't bring bait and feed from outside Ontario - you could unknowingly be importing chronic wasting disease (CWD). Local sources are safer and benefit local farmers and business owners.

Bringing Out-of-Province Carcasses into Ontario

If you intend to hunt outside of Ontario, please see the Deer section (p.49) or ontario.ca/cwd for additional information and specific regulations designed to reduce the risk of spreading CWD into Ontario.

Lyme Disease

Ontario is experiencing an increase in the areas where the ticks that may carry Lyme disease are found. When outdoors, practise personal protection. For detailed information visit: ontario.ca/lyme.

Escaped Farmed Deer, Elk and Wild Pigs

The Ministry of Northern Development, Mines, Natural Resources and Forestry (NDMNRF) wants to hear from you if you see an escaped farmed deer, elk or wild pig, or detect one in trail camera photos. These escaped farmed animals pose a threat to native species. Please contact your local NDMNRF district office to report any encounters. For more information on reporting wild pigs, visit ontario.ca/wildpigs.

Ear Tags

If you harvest an animal that has an ear-tag with the phone number 1-866-514-2327, this animal was chemically immobilized in the past using veterinary drugs. Health Canada has established recommended guidelines for consumption. Please call the above number for specific information on whether Health Canada would recommend that the meat be consumed.

Address, Name and Residency Changes

You must notify the Ministry of Northern Development, Mines, Natural Resources and Forestry (NDMNRF) of any address, name, residency or contact information change within 10 days of the change. You can update your address by accessing your account online at huntandfishontario.com, or by calling the Natural Resources Information and Support Centre at 1-800-387-7011.

If you are hunting big game, be sure to carry:

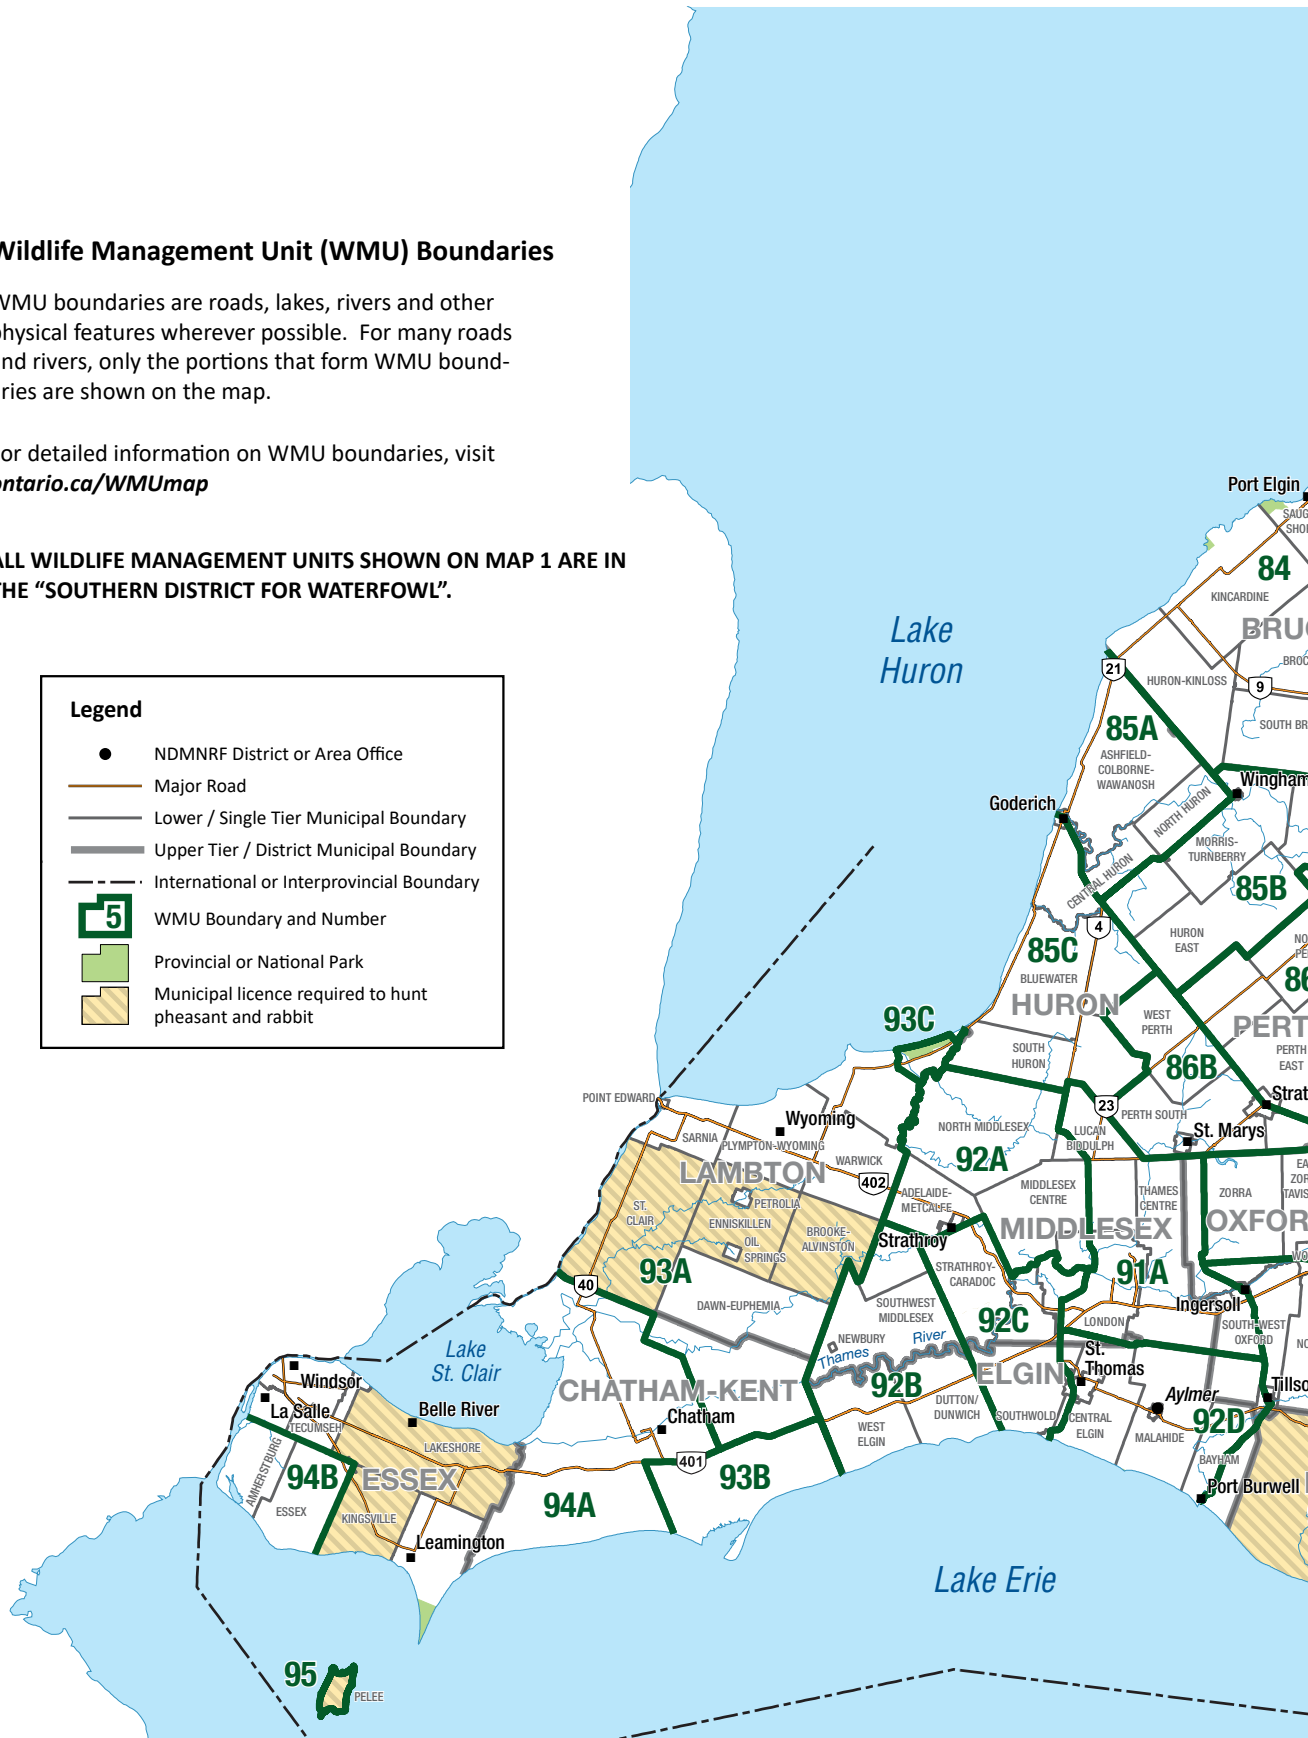

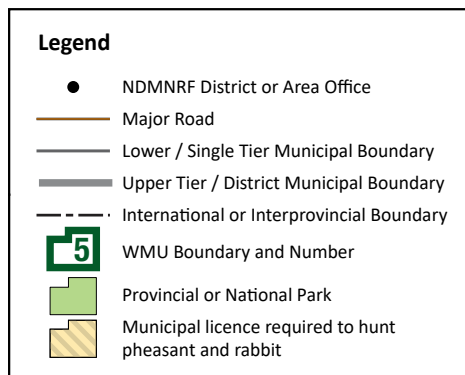

- Outdoors Card
- Licence Summary listing the licence for the species you are hunting (printed or PDF saved to your charged mobile device)
- Your valid tag for the species you are hunting (printed), or be party hunting with a person who has a printed tag
- Proof of firearms accreditation if you are hunting with a gun

Wildlife Management Unit (WMU) Boundaries

WMU boundaries are roads, lakes, rivers and other physical features wherever possible. For many roads and rivers, only the portions that form WMU boundaries are shown on the map.

For detailed information on WMU boundaries, visit ontario.ca/WMUmap

ALL WILDLIFE MANAGEMENT UNITS SHOWN ON MAP 1 ARE IN THE “SOUTHERN DISTRICT FOR WATERFOWL”.

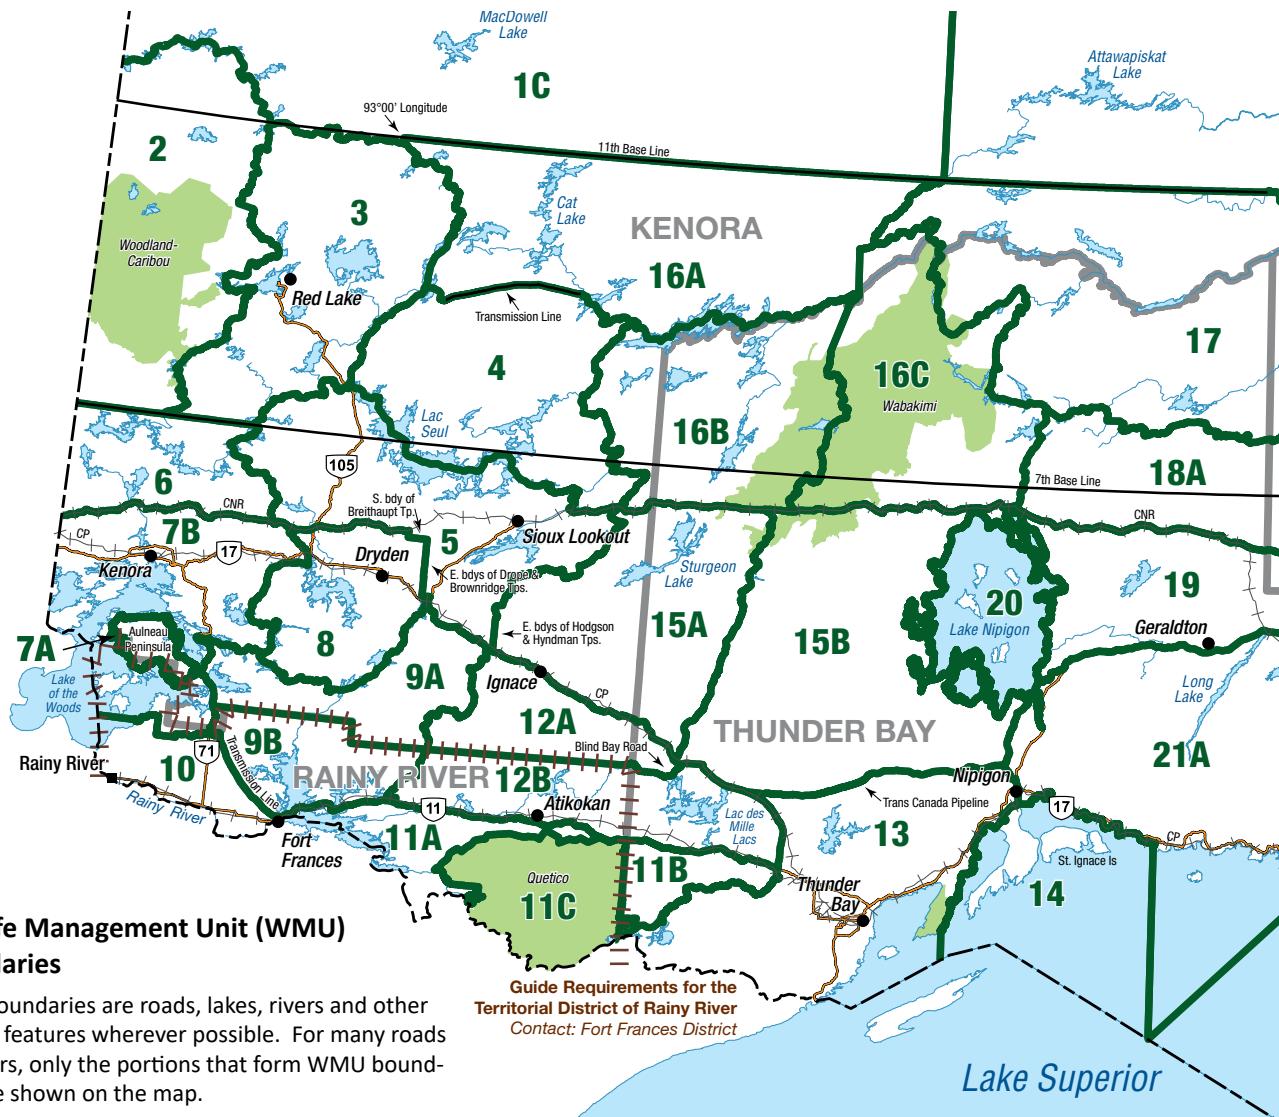

Wildlife Management Areas:
 There are designated areas within the province (most within the southern part of the province) that provide hunting opportunities. Contact your local NDMNRF district office for more information.

Wildlife Management Unit Map 2 – Southeastern Ontario

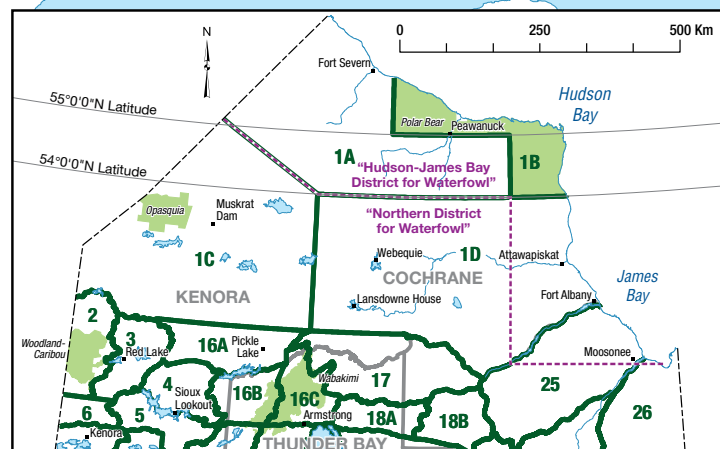

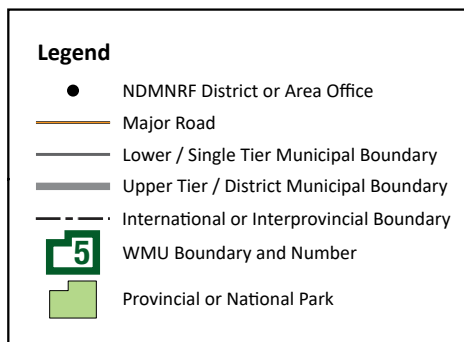

Wildlife Management Unit Map 3 – Northern Ontario

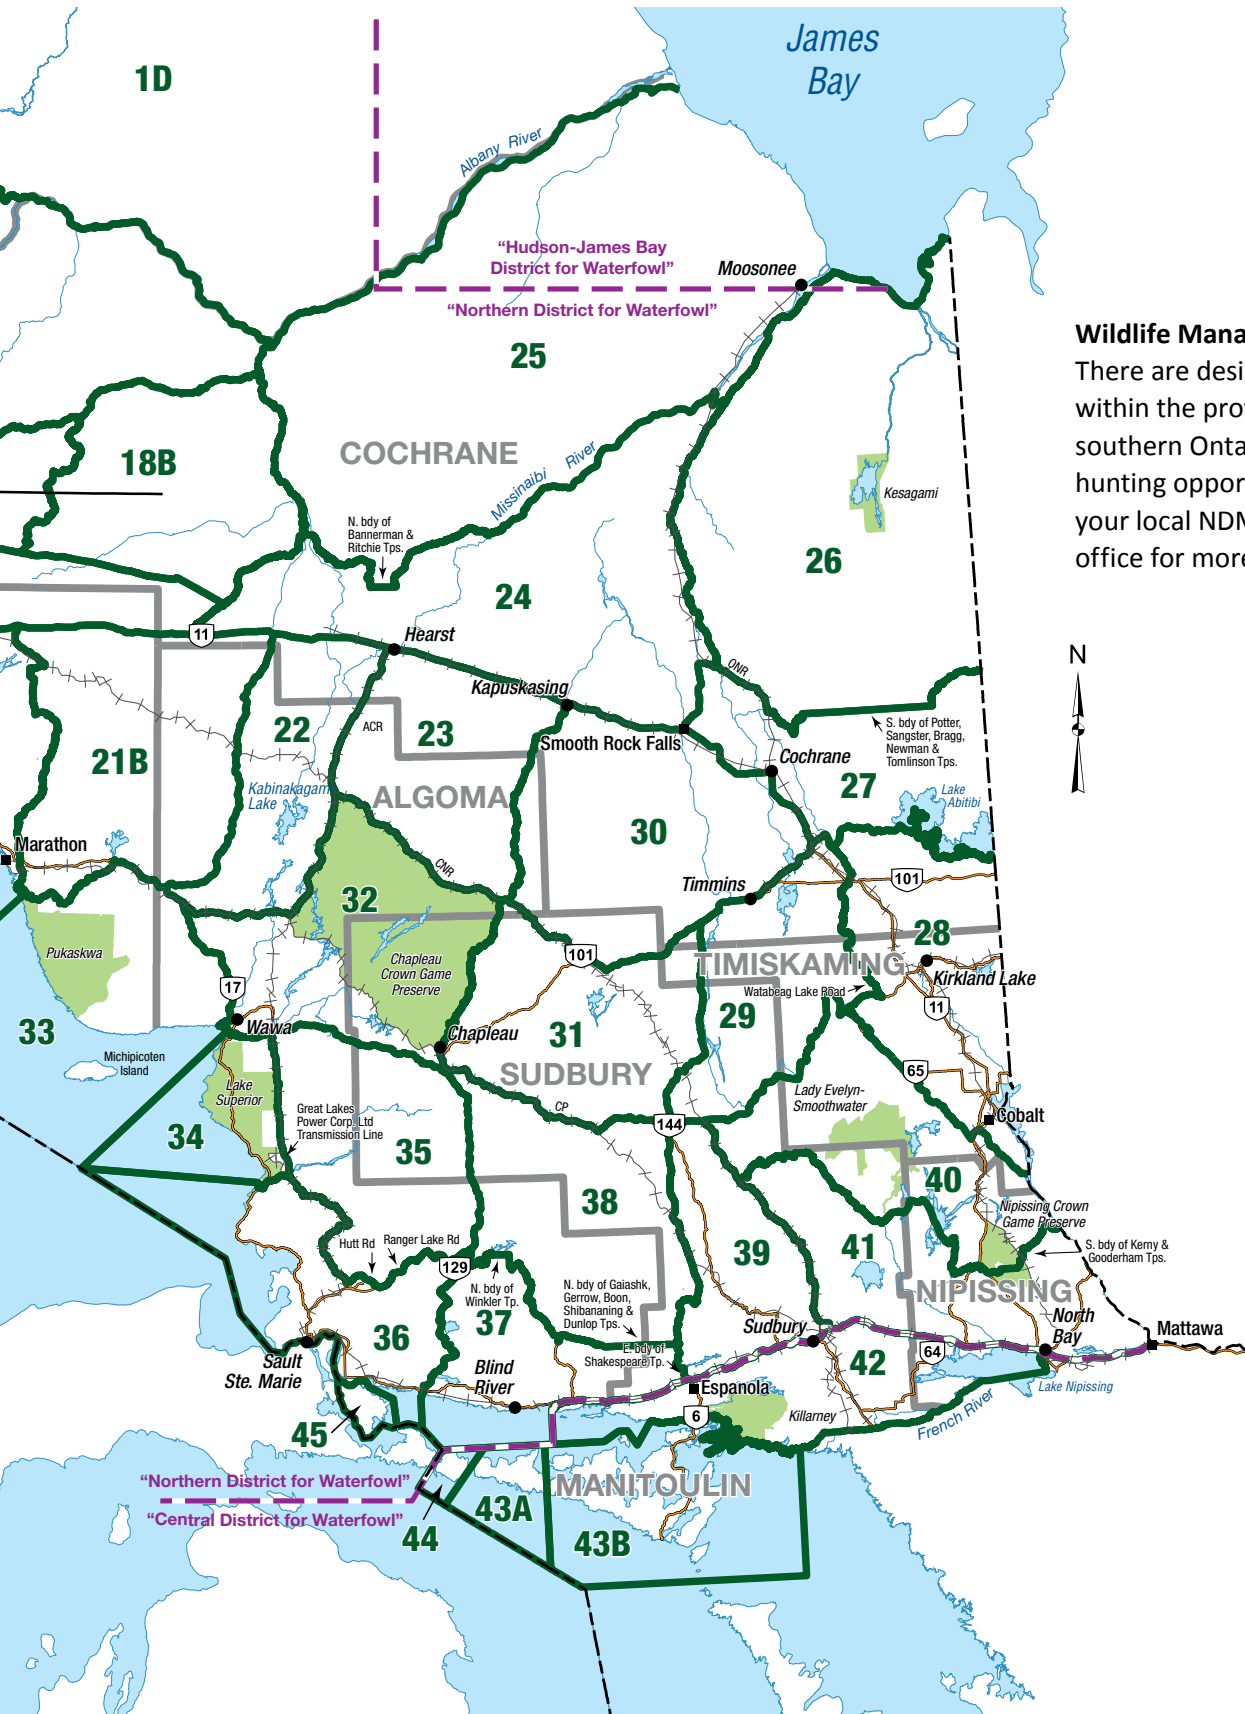

Wildlife Management Unit (WMU) Boundaries

WMU boundaries are roads, lakes, rivers and other physical features wherever possible. For many roads and rivers, only the portions that form WMU boundaries are shown on the map.

For detailed information on WMU boundaries, visit ontario.ca/WMUmap.

Wildlife Management Areas:
There are designated areas within the province (most within southern Ontario) that provide hunting opportunities. Contact your local NDMNRF district office for more information.

Hunting Licence Information

Hunting Fees

All products with a fee are subject to 13% HST.

Outdoors Card

- Ontario Outdoors Card..... \$8.57
(a valid Outdoors Card is required for all resident and non-resident hunters who wish to purchase hunting licences)

White-tailed Deer

- Resident Deer Licence..... \$43.86
- Farmer's Deer Licence..... \$25.14
- Resident Additional Deer Tag..... \$43.86
- Non-Resident Deer Licence..... \$240.81
- Non-Resident Additional Deer Tag
..... \$240.81

Moose

- Application Fee \$15.00
- Resident Moose Licence \$35.29
- Calf Tag..... \$30.00
- Cow/Calf Tag \$150.00
- Bull Tag..... \$200.00
- Non-resident Moose Licence \$479.86

Elk

- Resident Elk Draw Application \$15.00
- Resident Elk Licence..... \$48.25

Black Bear

- Resident Bear Licence \$43.86
- Resident Second Bear Tag \$43.86
- Non-Resident Bear Licence \$240.81
- Licence to Provide Bear Hunting
Services \$35.00

Note: Contact your local NDMNRF district office to purchase.

Wild Turkey

- Resident Turkey Tag (spring) \$26.33
- Resident Turkey Tag (fall) \$26.33
- Non-Resident Turkey Tag (spring) \$30.33
- Non-Resident Turkey Tag (fall) \$30.33

Wolf/Coyote

- Resident Wolf/Coyote Tag..... \$10.05
- Non-Resident Wolf/Coyote Tag..... \$255.57

Note: A wolf/coyote tag is required in some Wildlife Management Units.

Small Game

- Resident Small Game Licence \$22.76
- Resident Small Game Licence (3-year)
..... \$68.28
- Non-Resident Small Game Licence
..... \$121.52
- Non-Resident Small Game Licence
(3-year)..... \$364.56

Falconry

- General Falconry Licence \$19.81
- Commercial Falconry Licence..... \$198.13

Note: Contact your local NDMNRF district office to apply.

Hunting Dogs

- Resident Hunting Dog Licence \$12.21
- Non-Resident Dog Licence \$15.21

Note: Required where dogs are permitted for hunting deer, moose, bear and raccoon.

Guides

- Guide Licence..... \$7.68

Note: Required for guiding non-resident hunters in the territorial district of Rainy River and for guiding migratory bird hunters on Lake St. Clair. Only Ontario residents or Canadian citizens are eligible for a Guide Licence. Contact your local NDMNRF district office to purchase.

Hunting Licence Information

Other Permits

Migratory Game Birds

To hunt migratory game birds (e.g. waterfowl, common snipe, woodcock and mourning dove) in Ontario, you must have: a federal Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Outdoors Card and Small Game Licence. This includes hunting these species with falconry birds or non-indigenous falconry birds. You may buy a Migratory Game Bird Hunting Permit and Wildlife Habitat Conservation Stamp at any post office or online at permis-permits.ec.gc.ca/en

Export Permits

- Non-Resident Export Permit
\$35.00 (required for exporting moose, deer, elk and bear out of Ontario).
- CITES permit
Available through Environment and Climate Change Canada (p.94).
(required for exporting wolf and black bear out of Canada, in some cases).

See the General Regulations section (p.37) for more information on exporting requirements.

Possession of Furbearing Mammals or Pelts

- Notice of Possession ... No charge.
Required if you acquire a furbearing mammal and/or pelt for personal use in some circumstances (e.g. roadkill).
- Licence to Possess a Pelt ... No charge.
Required if you acquire a furbearing mammal and/or pelt in some circumstances.

See the Small Game and Furbearing Mammal section (p.93) or visit ontario.ca/page/keep-dead-wild-animal for more information.

Important Licence Information

How To Buy Licences or Buy/Renew Outdoors Card

- 1) **Online:** visit huntandfishontario.com to use the Fish and Wildlife Licensing Service
- 2) **Phone:** call 1-800-288-1155 (toll-free) and use the automated telephone system
- 3) **In Person:** visit a participating ServiceOntario or licence issuer

Note: Online and phone services accept VISA, MasterCard, VISA Debit and Debit MasterCard.

An Outdoors Card will be automatically mailed to you after you have completed your card purchase. You will still be able to hunt while you wait for your Outdoors Card to arrive in the mail by using your Licence Summary, which will list your valid Outdoors Card. If you do not have access to a printer to print your Licence Summary from your account you can visit a participating ServiceOntario or licence issuer to have it printed (a fee may apply).

Outdoors Card Information

An Outdoors Card is a plastic, wallet-sized card issued by the Ministry of Northern Development, Mines, Natural Resources and Forestry which you are required to carry while hunting. A valid Outdoors Card is required for all resident and non-resident hunters who wish to purchase hunting licences.

As of January 1, 2019, Ontario has moved to a single version Outdoors Card for all hunters and anglers. This means that the different versions of Outdoors Cards (e.g. H1, H2, fishing versions) will no longer be issued. Hunter accreditation will be documented in the Fish and Wildlife Licensing Service as part of each individual's profile to determine if the person is eligible to purchase hunting licences.

IMPORTANT: All existing Outdoors Cards (and associated licences) will continue to be valid until the expiry date on the card. There is no need to get a new Outdoors Card until your existing card expires.

Outdoors Cards are valid for 3 calendar years, with the expiry date listed on the card. If you purchase a 3-year Small Game Licence or a 3-year Fishing Licence (or both) when you buy/renew your Outdoors Card, these 3-year licences will be printed on the back of your card and will expire with the card.

It is illegal for a hunter to hold more than one Outdoors Card with different numbers. It is also illegal to provide false information on an application to obtain an Outdoors Card or any other licence product.

Hunter Accreditation Requirements

You must have successfully completed Ontario's Hunter Education Course (p.26) or an Ontario-recognized equivalent requirement (e.g. existing accreditation on record or documentation from a recognized jurisdiction) to be eligible to purchase hunting licences and hunt in Ontario.

Parental or guardian consent is required to obtain an Outdoors Card for any resident under 16 years old. Parental/guardian consent is provided by completing an attestation on the website or by attesting to the parental/guardian consent statement that a participating ServiceOntario or licence issuer representative will read aloud to you and enter into the Fish and Wildlife Licensing Service. See the Ontario Hunter Apprenticeship Safety Program section (p.27) for more information on apprentice hunters (residents 12-14 years old).

Non-residents who are hunting in Ontario for the first time must be at least 16 years of age, and must provide proof of accreditation from their home jurisdiction, provided that it has hunter education requirements that are equivalent to Ontario's requirements.

Plan ahead: Non-residents must submit an original or certified copy of acceptable hunting accreditation by:

- contacting the Natural Resources Information and Support Centre at 1-800-387-7011 (accreditation processed within 15 business days of receipt, allowing non-residents to buy products online before arriving in Ontario), or
- visiting a participating ServiceOntario or licence issuer (allows non-residents to buy hunting products immediately).

Non-resident accreditation must be translated into either English or French. Both the original and translated copy must be provided. Translations must be provided by NDMNRF-approved translators, which includes non-Canadian embassies, consulates, high commissioner's offices, or through the Association of Translators and Interpreters of Ontario translation services. See ontario.ca/outdoorscard for more information.

Residency

An Ontario resident is a person whose primary residence is in Ontario and who has resided in Ontario for a period of at least 6 consecutive months during the immediately preceding 12 months. All other individuals are considered non-residents (some exceptions apply to active military and RCMP personnel who have been stationed in Ontario for a period of at least 1 month with appropriate documentation).

A Message from Ontario's Conservation Officers

Any hunting injury caused by the discharge of a firearm which results in treatment by a physician must be reported to a conservation officer. You may also report by calling 1-877-847-7667.

Report Resource Abuse **1-877-847-7667**

Licence Summary

Your Licence Summary is a document that lists all of your valid hunting and fishing licence products. An updated Licence Summary will be issued to you each time you purchase a new licence product. It may be carried as a paper copy or as a download on a mobile device (or both). Your Licence Summary must remain intact and readable at all times.

Mandatory Hunter Reporting / Rapports obligatoires des chasseurs:
ontario.ca/hunterreporting | 1-800-288-1155 | ontario.ca/rapportdechasse

Report Resource Abuse / Signaler un abus des ressources: 1-877-847-7667
ontario.ca/outdoorscard | 1-800-387-7011 | ontario.ca/cartepleinair

Paper Copy: You can print a copy of your Licence Summary as many times as needed for free (from any device that can access your online account and print documents). Alternatively, you can visit a participating ServiceOntario or licence issuer to have your Licence Summary printed free-of-charge for first-time prints. (**Note:** An administration fee will apply for replacements at ServiceOntario and licence issuers).

Digital Copy: You can carry your Licence Summary in a digital format, such as on a mobile device. You can have a copy of your Licence Summary sent to your email address by accessing your account using the Fish and Wildlife Licensing Service. If you choose to carry your Licence Summary on your mobile device, it must be in the PDF format provided to you from the Fish and Wildlife Licensing Service (a photograph or screenshot of your Licence Summary is not valid). You are responsible for ensuring that your device has battery power and is protected from the elements to be able to display it when and where requested by a conservation officer (unless you are also carrying a paper copy with you).

You must carry your Outdoors Card, your hunting licence (either listed on your paper or electronic Licence Summary or printed on the back of your Outdoors Card), and any relevant tag(s) with you while hunting.

Note: If you are hunting wild turkey or wolf/coyote (in a WMU where a tag is required) and your Small Game Licence is printed on the back of your Outdoors Card, you can simply carry your Outdoors Card and your relevant tag.

All hunting licences are valid for the year specified and expire on December 31 in the year in which they were issued unless otherwise noted. Licences are restricted to the relevant open season for hunting.

Lost Outdoors Card

Please visit huntandfishontario.com, participating ServiceOntario or licence issuer to obtain a duplicate.

Note: An administration fee will apply.

Firearms Licence Requirement

The *Firearms Act* (Canada) sets out the requirements for firearm possession. Hunters should be aware of these requirements if hunting with a gun in Ontario.

If you are in possession of a gun for the purpose of hunting in Ontario, you are required to carry proof of your firearms accreditation under the *Firearms Act* (Canada) - this includes apprentice hunters (residents 12-14 years old). Every gun hunter must carry one of the following: a valid possession and acquisition licence, a valid minor's licence, or a stamped copy of a Canadian Firearms Safety Course (CFSC) student report as official documentation showing successful completion of the CFSC. For non-residents, this could also include a valid non-resident firearms declaration form confirmed by a Canadian customs officer, or a valid temporary firearms borrowing licence for non-residents issued under the *Firearms Act* (Canada).

You are required to produce this documentation to a conservation officer upon request. **Note:** You may submit an application for a Possession and Acquisition Licence (PAL) up to 6 months before you turn 18 years old. If there are no eligibility concerns identified during the review of your PAL application, your application will be approved and your PAL will be issued on your 18th birthday. Please ensure you plan ahead to avoid any delays.

Transfer of Licences or Tags

It is illegal to transfer an Outdoors Card, licence, tag or any component of a licence to another person unless authorized to do so by the NDMNRF (e.g. an approved moose tag transfer). It is also illegal to use or possess an Outdoors Card, licence, tag or any component of a licence that was issued to someone else. Only the person who was issued the tag may possess the tag unless it has been invalidated (notched) and affixed to an animal.

Requirements for Indigenous Persons

Many Indigenous communities in Ontario hold Aboriginal or treaty rights to hunt. NDMNRF is committed to respecting these constitutionally-protected rights. After conservation goals are met, Aboriginal and treaty rights to hunt take priority before allocation and management of the resource for other purposes.

Aboriginal rights to hunt stem from customs, practices or traditions that are integral to the distinctive culture of an Indigenous community. Treaty rights to hunt are reserved through treaties between the Crown and Indigenous peoples. Aboriginal and treaty rights are collectively held and are associated with an Indigenous community's traditional or treaty territory. These rights are not generic and different communities may hold different rights. Aboriginal and treaty rights to hunt can be exercised using modern means.

Members of Indigenous communities exercising an Aboriginal or treaty right generally do not require an Outdoors Card, Ontario hunting licence(s) and tag(s) when hunting for food, social or ceremonial purposes within their traditional or treaty territory. Indigenous individuals should be prepared to provide identification showing their community membership if requested by conservation officers. Members of Indigenous communities hunting outside of their traditional or treaty area must hold a valid hunting licence(s) and tag(s) and follow the corresponding regulations, or have written permission from a First Nation to hunt within their traditional or treaty territory (R v. Shipman et al., 2007).

Non-Indigenous people may accompany Indigenous people who are hunting, but may not help them to exercise their hunting rights. For example, a non-Indigenous person may not assist an Indigenous hunter by shooting their game, carrying a gun, searching for or flushing game. They can assist in the retrieval of game or transporting of lawfully harvested game while accompanying an Indigenous person.

Getting a Tag

A tag authorizes the tag holder to hunt a member of the species of game specified on the tag, subject to conditions specified on the tag. Only one animal may be harvested per tag. Tags must be carried in paper format. Tags cannot be carried or presented to a conservation officer on an electronic device. Tags are equipped with document security features to discourage fraudulent activities. **It is illegal to have multiple copies of a tag or validation certificate, or to alter, modify or counterfeit a tag or validation certificate, or to possess such a product.**

Tags are printed on regular paper and can be obtained:

- online through the Fish and Wildlife Licensing Service at huntandfishontario.com and printed using a personal computer, or
- in person by visiting a participating ServiceOntario or a licence issuer.

Hunters will be able to print most tags immediately at the time of purchase with the exception of moose, deer or elk tags which will be available for print starting on August 16.

Note: Any controlled deer hunt validation will appear on your Licence Summary on October 10 after the purchase of a deer licence. An elk licence is required before an elk tag can be printed.

Tags can only be printed once. If a tag did not print or is lost, damaged, stolen and a replacement is necessary, you will be required to visit a participating ServiceOntario or licence issuer for a replacement. Damaged tags must be surrendered before a replacement tag will be issued. All replacements will be tracked in the Fish and Wildlife Licensing Service. An administration fee of \$10.50 is applied for any replacement tags.

It is illegal to apply for, purchase or possess more than one tag, unless specifically permitted (e.g. additional deer tag, second bear tag).

Note: The tag issued with your deer, bear and elk licence will not be listed on your Licence Summary.

Maintaining a Tag

Tags must remain intact and readable at all times. It is your responsibility to ensure paper tags are protected from the weather or other types of damage. There are products available to help ensure your tag is protected from damage (e.g. commercially available tag holders or resealable plastic bags).

Tagging Instructions:

1. Notch the tag with day, month and time immediately after the kill, at the site of the kill and before moving the animal. Keep the tag with the animal until it has been transported to the site of processing and is being processed for long-term storage.
2. You may attach the tag to the animal at any time; however you **MUST** attach the tag if you are not immediately accompanying the animal or immediately available to produce the tag for inspection. The tag must be securely attached to either the antler or the ear.
3. Keep the head of the animal with the carcass until it has been transported to the site of processing and is being processed for long-term storage.

Instructions d'étiquetage:

1. Faites une encoche sur la vignette indiquant le jour, le mois et l'heure immédiatement après avoir abattu l'animal et sur les lieux mêmes, et avant de déplacer l'animal. Gardez la vignette avec l'animal jusqu'à ce qu'il ait été transporté au site de transformation et qu'il soit traité pour un entreposage à long terme.
2. Vous pouvez attacher la vignette à l'animal à tout moment; cependant, vous **DEVEZ** attacher la vignette si vous n'accompagnez pas immédiatement l'animal ou si vous n'êtes pas immédiatement disponible pour présenter la vignette pour inspection. La vignette doit être solidement fixée au bois ou à l'oreille.
3. Gardez la tête de l'animal avec la carcasse jusqu'à ce qu'elle ait été transportée jusqu'au site de transformation et qu'elle soit traitée pour un entreposage à long terme.

Tagging Requirements

Specific tagging instructions will be provided with your tag. Make sure you carefully read and follow the tagging instructions that accompany your tag. A summary of the tagging requirements is provided below:

Notching: You must invalidate your tag by notching the day, month and time immediately after the kill, at the site of the kill and before moving the animal.

Attaching Your Tag: You are not required to attach the tag if you are both immediately accompanying the animal and immediately available to produce the tag for inspection. For example, the tag holder may carry the notched/invalidated tag in a pocket while bringing the harvested animal out of the bush provided that the tag holder remains with the animal while it is being moved.

However, you **must** attach the tag if you are not immediately accompanying the animal or immediately available to produce the tag for inspection. For example, the tag holder must attach the tag if they leave the harvested animal at any time, including:

- transporting the animal in one vehicle while the tag holder is in another vehicle,
- leaving the animal at camp while the tag holder goes out party hunting,
- leaving the animal at a butcher for processing.

IMPORTANT: If you are unsure about whether or not to attach your tag, you should attach it.

Make sure to follow the instructions that come with the tag. Your tag should be accessible and visible for inspection purposes even when the tag is attached to the harvested animal.

The tag must remain on your person, or attached to the animal (when required), until it has been transported to the site of processing and is being prepared for long-term storage. The animal is being prepared for long-term storage when it is being cut, wrapped and frozen/preserved.

Note: If you are transporting a portion of a carcass that does not have a tag (e.g. the animal was divided or quartered at your hunt camp prior to final transport), you must be prepared to provide information about the tag holder (e.g. name, Outdoors Card number, licence number, validation number) the animal (antlered or antlerless (deer), sex and age) and details of the hunt (e.g. date and location of kill) if requested by a conservation officer. See the General Regulations section (p.37) for additional requirements if you are shipping or transporting wildlife in containers.

Identifying Features: For deer, moose and elk you must keep relevant sex and age identifying features with the animal until it has been transported to the site of processing and is being prepared for long-term storage. This means you need to keep these parts with the animal until it is dropped off at the butcher or until you have prepared the animal for long-term storage yourself.

The instructions provided with your tag will specify what identifying features must remain with the animal. The relevant sex and age identifying features must remain with the animal regardless of whether you have attached the tag, or you are accompanying the animal without the tag attached.

Summary of Species Tagging Locations and Identifying Features

Species	Tagging Location and Identifying Features
White-tailed deer	Attach the tag to either the antler or the ear, keeping the head with the animal
Elk	Attach the tag to either the antler or the ear, keeping the head with the animal
Moose – Bull	Attach the tag to one of its hind legs with scrotal sac attached to that leg by connective tissue
Moose – Cow	Attach the tag to one of its hind legs with vulva attached to that leg by connective tissue
Moose – Calf	Attach the tag to the lower jaw, which shall be left whole
Black Bear	Attach the tag through the cartilage separating the nostrils
Wild Turkey	Attach the tag to the lower part of a leg
Wolf/Coyote	Attach the tag through the cartilage separating the nostrils

Note: Be sure to reference your tagging instructions that are provided with your tag for more details. Whether you have attached your tag or not, you must keep the relevant age and sex identifying features with the animal.

Are you hunting big game?

Make sure you carry:

- ✔ Outdoors Card
- ✔ Licence Summary listing the licence for the species you are hunting (printed or PDF saved to your charged mobile device)
- ✔ Your tag for the species you are hunting (printed), or be party hunting with a person who has a printed tag
- ✔ Proof of firearms accreditation if you are hunting with a gun

Ontario 

Mandatory Hunter Reporting

General Requirements

All hunters that purchase or are issued a tag to hunt elk, deer, bear, wild turkey and wolf/coyote (in WMUs where a tag is required) and any hunter issued a licence to hunt moose must complete a hunter report. You are required to complete a hunter report even if you did not participate in the hunt or harvest an animal.

NEW

Consequences of Failing to Report

Thanks to all hunters who submitted their hunter report(s) last year. This information is an important part of wildlife management, and hunters play an important role. Starting in 2022, hunters who fail to report will be subject to a \$25.00 surcharge that will automatically be applied to the next draw application, licence or tag purchase for that species (generally in the next year). The \$25.00 surcharge will be applied for each report that a hunter fails to submit. If a hunter fails to submit a hunter report on two consecutive occasions for the same species, they will be prevented from purchasing the relevant product(s) (e.g. draw application, licence or tag) the following year.

The graduated penalty approach takes effect in 2022 and the first time a hunter who fails to report will receive a surcharge will be for purchases in 2023. Hunters who fail to report or provide false or misleading information may also be subject to fines under the *Fish and Wildlife Conservation Act, 1997*.

Reporting Deadlines

Generally, hunter reports must be submitted within 14 days following the end of the last hunting season for that species. Moose and black bear hunters who are required to submit their report to a moose tourist outfitter or black bear operator must provide their report back to the outfitter or operator within 7 days of the close of the season. More details on the requirements are provided on the next page.

All hunters are encouraged to provide their report as soon as their hunting activities are completed. However, hunters should not report until they know they are done, and must ensure the information they provide is accurate as they will not be able to amend their report. Timely submission of reports when a hunt is complete helps to ensure accurate data to support harvest planning.

Species Reporting Deadlines

Species Report	Submission Deadline
Spring Wild Turkey Hunter Report	June 14, 2022
Fall Wild Turkey Hunter Report	November 14, 2022
Spring Non-resident Black Bear Hunter Report	June 22, 2022
Fall Non-resident Black Bear Hunter Report	December 7, 2022
Resident Black Bear Hunter Report	December 14, 2022
Elk Tag Holder Report	October 16, 2022
Moose Hunter Report	December 29, 2022
Resident Moose Tag Holder Hunter Report for Tourist Outfitter	December 22, 2022
Non-resident Moose Hunter Report for Tourist Outfitter	November 22, 2022
Deer Hunter Report	January 14, 2023
Wolf/Coyote Tag Holder Report	January 14, 2023

Mandatory Hunter Reporting

How to Report

For most hunters (including apprentice hunters who have chosen to purchase their own licence/tag), reports must be completed at ontario.ca/hunterreporting by logging into your account at huntandfishontario.com or by calling 1-800-288-1155. The Fish and Wildlife Licensing Service can help you remember important dates by sending you email reminders.

Important Reporting Notes

Turkey hunters are reminded that with the changes to mandatory hunter reporting they must report at the end of their hunt and not each time they harvest.

Resident black bear hunters must provide information on all their hunting activity and harvest for the year in a single report due December 14. Bear hunters **must not** submit their report until they are done hunting for the year and should make note of their spring hunting activities, observations and harvest to ensure accurate information is provided.

Non-resident black bear hunters must return their completed report to the bear operator.

All **non-resident moose hunters** who are registered guests of tourist outfitters **must return their completed report to the outfitter**. The outfitter is responsible for returning all reports completed by their hunters to NDMNRF.

Ontario resident moose hunters who acquire a tag from a tourist outfitter must complete both a regular moose hunter report and provide a report to the tourist outfitter with information unique to each type of hunt reported separately.

Non-resident moose hunters who hunt with an immediate relative who has a valid moose tag must submit their report online at ontario.ca/hunterreporting by logging into your account or by calling 1-800-288-1155.

Wolf/Coyote hunters are reminded that tags are valid until December 31 and that all hunting activities from the calendar year (January 1 - December 31) must be reported on by the reporting deadline of January 14 of the following year.

Information You Will Be Asked to Provide

Hunters will be asked to provide the following information and are encouraged to keep records if they will not be providing the information until the end of the season.

- **Participation** – Did you hunt?
- **Harvest** – Did you harvest an animal? If so, where, when and what type of animal was it (e.g. male or female)?
- **Effort** – What WMU(s) did you hunt in and how many days did you hunt in each?
- **Observations** – What observations did you have during the hunt?

How Mandatory Hunter Reporting Information is Used

Information provided by hunters through mandatory hunter reporting is important for managing wildlife in Ontario. It specifically helps:

- monitor wildlife populations
- set tag quotas and determine the availability of additional tags
- make changes to seasons and bag limits
- inform management policies

For more information on mandatory hunter reporting and to see past results, please visit ontario.ca/hunterreporting.

Additional results are available at ontario.ca/hunterreporting

Ontario Hunter Education Course

The Ontario Hunter Education Course instills responsible hunting practices to respect hunting regulations, prevent accidents and ensure public safety. The course can be taken in-person from a certified instructor or online.

The course provides information about:

- Wildlife Management
- Hunter Responsibilities
- Hunting Laws and Regulations
- Hunting Safety and Equipment
- Hunting Techniques
- Wildlife Identification

For more information about the course or how to find a course in your area, please visit ohp.net.

Successful completion of the course, and purchase of applicable licences allows hunters to hunt with a bow in Ontario. In order to hunt with a gun, successful completion of the Canadian Firearms Safety Course (CFSC) is required. See the Hunting Licence Information section (p.18) for more information.

The Ontario Hunter Education Course and the CFSC are often delivered together in-person, however, both courses are available independently if desired.

Plan Ahead: Make sure you plan ahead to ensure you obtain training and accreditation well in advance of the hunting season. In Ontario, students who have taken a CFSC and test will receive a stamped copy of their CFSC student report form approximately 4-6 weeks from the date the paper work is received. The stamped copy of your CFSC student report form will be the official documentation showing the successful completion of the CFSC before you receive your Possession and Acquisition Licence (PAL) or minor's licence.

Ontario 

Hunter Apprenticeship Safety Program

Hunter Apprenticeship Safety Program – Residents Only

Ontario's Hunter Apprenticeship Safety Program (HASP) allows individuals to safely develop their hunting skills while under the direct and immediate supervision of a qualified mentor. The program provides practical training for future hunters.

Apprentice hunters must be residents who are 12-14 years old and have an Outdoors Card with hunting accreditation. Hunters who are 15 years of age and older must purchase an Outdoors Card and their own licences/tags in order to hunt.

Apprentice hunters may hunt without their own licences or tags, but must share the bag limits or tags of their mentor (or be hunting in a party with their mentor under the tag of another party member for moose, elk, deer or black bear - see the General Regulations section (p.32) for party hunting regulations). Apprentices cannot apply to hunt big game. Apprentices who hold an Outdoors Card may purchase select hunting licences and tags not obtained through a draw or allocation, which will allow them to hunt with their own bag limit.

Apprentices can buy an Outdoors Card by visiting a participating ServiceOntario in-person. They will need to submit an original or certified copy of an Ontario Hunter Education Exam Report and attest to the parental/guardian consent statement.

Other Hunter Apprenticeship Safety Program Requirements

- Only residents who are 12-14 years old are eligible. If you are 15 years of age or older, you may still hunt with a mentor to develop your hunting skills, but you are required to have your own licences/tags if you are hunting.
- Apprentices must carry their Outdoors Card.
- Apprentices must be under the direct and immediate supervision of a mentor who is 18 years of age or older, and who holds a valid Outdoors Card and hunting licence (and tag if applicable) for the species being hunted.
- Apprentices must share a single firearm with their mentor.
- Apprentices must possess a federal Migratory Game Bird Hunting Permit to hunt migratory game birds.
- Game wildlife must be added to the daily bag limit of the mentor, unless the apprentice has obtained his/her own licences or tags for the relevant species.
- All hunters (including apprentices) are required to carry their firearms licence or proof of completing the Canadian Firearms Safety Course (CFSC) if in possession of a gun for the purpose of hunting.

Ontario 

General Regulations

Fish and Wildlife Conservation Act, 1997

The *Fish and Wildlife Conservation Act, 1997* (FWCA), is the main provincial law regulating hunting and trapping. It is enforced by conservation officers which includes police officers.

The penalties for offences under the FWCA can include:

- General offences: \$25,000, 1 year imprisonment, or both
- Commercialization related offences: \$100,000, 2 years imprisonment, or both
- Tickets with set fines
- Court ordered hunting licence cancellations and suspensions and court orders prohibiting licence-related activities
- Automatic financial penalties (surcharges) for failing to submit mandatory hunter reports as required

Hunting includes lying in wait for, searching for, being on the trail of, pursuing, chasing or shooting at wildlife, whether or not the wildlife is killed, injured, captured or harassed. You need a valid hunting licence to do any of these things, except where the FWCA states otherwise.

For a complete list of all “Game Wildlife and Specially Protected Wildlife”, see the Wildlife Schedules Regulation at ontario.ca/laws/regulation/980669.

Firearms

Firearms include rifles, shotguns, muzzle-loading guns, air or pellet guns and bows (including longbows, crossbows, compound bows and recurve bows). You may use semi-automatic or repeating firearms for hunting in Ontario, but not restricted or prohibited firearms (e.g. fully automatic firearms). Air and pellet guns are not permitted for hunting big game, but may be used for hunting small game.

Hunting carelessly is an offence. Hunters who handle or discharge firearms without due care and attention or consideration for persons and property are liable to a fine of up to \$25,000 or imprisonment for up to two years - or both. Depending on the circumstances, a person may also be subject to charges under the *Criminal Code of Canada*.

Any injury caused by the discharge of a firearm while in possession of a firearm for the purposes of hunting or trapping, which requires treatment by a physician, **must be** reported to a conservation officer.

Before hunting, check local sunrise-sunset times. You may only hunt from half an hour before sunrise to half an hour after sunset (exceptions: night raccoon hunting and spring hunting hours for wild turkey). If you are in an area usually inhabited by wildlife during the period from half an hour after sunset to half an hour before sunrise you must unload and encase any firearms in your possession.

To be considered encased, firearms must be enclosed on all six sides.

A firearm is considered to be loaded if it has an unfired shell or cartridge in the chamber or in a magazine that is attached to the firearm.

A muzzle-loading gun is a gun that is loaded through the muzzle. A percussion muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and a percussion cap on the nipple. A flint-lock muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and the vent is unplugged. An electronic ignition muzzle-loading gun is considered to be loaded if there is a projectile in the barrel and a battery connected to the primer or charge. Under federal regulations pertaining to storage and transport of firearms, a muzzle-loading gun is not unloaded unless any propellant, projectile or cartridge has been removed from the breech or firing chamber.

There is an exemption on transport restrictions when traveling between hunting sites.

General Regulations

A crossbow is considered to be loaded if the bow is cocked and there is a bolt in the crossbow. A bow other than a crossbow is considered to be loaded if the bow is strung and an arrow is nocked.

The draw length of a bow (compound, recurve, long) is the measured distance from the outer edge of the main riser (handle), following the line of an arrow to the string at the anchor point. The draw length of a crossbow is measured along the bolt ramp (where the bolt rests) from the outer edge of the main limb, to the anchor point (release latch mechanism) at full draw.

Arrows must be at least 60cm (23.6 inches) in length. The length of an arrow is measured from the base of the arrowhead to the bottom of the nock slot.

A head (broadhead) used for hunting big game or wild turkey must be at least 22mm (0.87 inches) wide and have at least two sharp cutting edges.

A shotgun must be plugged so that it cannot hold more than a total of three shells in the chamber and magazine combined.

On the Aulneau Peninsula (WMU 7A), from August 15 to December 15, you may not use a centre-fire rifle or a shotgun loaded with ball or with shot larger than number 2 lead shot, triple BBB steel shot or double BB bismuth shot.

Under the *Criminal Code of Canada* you generally cannot possess any clip/magazine that holds more than five shots for a semi-automatic centrefire firearm.

Contact the Canadian Firearms Program at 1-800-731-4000 (or rcmp-grc.gc.ca/cfp-pcaf) for information about the requirements for firearm ownership, licensing, storage and transportation.

Municipal By-laws

Some municipalities have by-laws restricting the discharge of firearms. Check with the local municipal office for details.

Sunday Gun Hunting

Sunday gun hunting is permitted in areas north of the French and Mattawa rivers.

You can find out which municipalities permit Sunday gun hunting south of the French and Mattawa rivers by visiting ontario.ca/page/sunday-gun-hunting.

Hunter Orange

All licensed hunters, including bow hunters, falconers, bear hunters, and trappers who are hunting under their trapping licence during a gun season for deer, elk or moose, are required to wear hunter orange. This requirement does not apply to persons who are hunting double-crested cormorants or migratory game birds, except woodcock.

In addition, all licensed bear hunters hunting during the open season for black bear, that is not a gun season for deer, elk or moose, are required to wear hunter orange except when in a tree stand.

A hunter orange garment and head cover must be worn. The hunter orange garment must cover a minimum of 400 square inches (2,580 square centimetres) above the waist and be visible from all sides (a vest made up of only a front and rear panel may not be visible from all sides). The hunter orange garment must be solid, and cannot contain open mesh or camouflage orange. A garment with 400 square inches of hunter orange that also includes retro-reflective silver or yellow stripes meets the requirement. Any backpack that is worn must not completely conceal the hunter orange from being visible on that side. As a best practice hunters should have hunter orange on their backpacks. The hunter orange on the head cover must not contain camouflage material. The hunter orange head cover may have open mesh, a peak or brim color other than hunter orange and a crest or logo which does not completely cover the hunter orange on the side where it is affixed.

Hunters using ground blinds should take steps to make their blind clearly visible to other hunters who may be in the area. Use of hunter orange material on the outside of the blind is an appropriate method to mark a ground blind.

Summary of Firearms Restrictions Related to Roads and Trails

You must not shoot from or across a right of way for public vehicular traffic anywhere in Ontario.

You must not possess a loaded firearm on or near a right of way for public vehicular traffic in most of Southern Ontario.

You must not possess a loaded firearm on or near a right of way for public vehicular traffic during an open gun season for deer or elk in large portions of Central and Northwestern Ontario.

Note: A right of way for public vehicular traffic includes a road or trail open to public use by vehicle traffic. Please refer to the table below for the specific restrictions and applicable geographic areas.

Restrictions	Applicable Geographic Areas
No discharge of firearms from or across the travelled portion of a right of way for public vehicular traffic	All of Ontario
You must not possess a loaded firearm on or within 8 metres of the travelled portion of a right of way for public vehicular traffic (or its fenceline where one exists)	Brant, Bruce, Chatham-Kent, Dufferin, Durham, Elgin, Essex (except the single-tier municipality of Pelee), Frontenac (except the lower-tier municipalities of Central and North Frontenac), Grey, Haldimand, Halton, Hamilton, Hastings (except the lower-tier municipalities of Bancroft, Carlow/Mayo, Deseronto, Faraday, Hastings Highlands, Limerick, Madoc, Marmora and Lake, Tudor and Cashel and Wollaston), Huron, Kawartha Lakes, Lambton, Lanark, Leeds and Grenville, Lennox and Addington (except the lower-tier municipality of Addington Highlands), Middlesex, Niagara, Norfolk, Northumberland, Ottawa, Oxford, Peel, Perth, Peterborough (except the lower-tier municipalities of Galway- Cavendish-Harvey and North Kawartha), Prescott and Russell, Prince Edward, Simcoe, Stormont, Dundas and Glengarry, Toronto, Waterloo, Wellington, York.
You must not possess a loaded firearm on or within 8 metres of the travelled portion of a right of way for public vehicular traffic (or its fenceline where one exists) during an open gun season for deer or elk	Lower-tier municipalities of Central and North Frontenac in the geographic area of Frontenac, Haliburton, lower-tier municipalities of Bancroft, Carlow/ Mayo, Deseronto, Faraday, Highlands, Limerick, Madoc, Marmora and Lake, Tudor and Cashel and Wollaston in the geographic area of Hastings, the lower-tier municipality of Addington Highlands in the geographic area of Lennox and Addington, Muskoka, the lower-tier municipalities Galway-Cavendish-Harvey and North Kawartha in the geographic municipality of Peterborough, Renfrew, the single-tier municipalities of Alton, Chapple, Dawson, Emo, Fort Frances, La Vallee, Morley, Rainy River and the geographic townships of Morson, McCrosson, Tovell, Dance (excluding Lyons Bay Road and Lost Creek Road), Kingsford (excluding Fleming Road), Miscalpella (excluding Boffin Road), Pratt, Nelles, Spohn and Sutherland all within the Territorial District of Rainy River, and the single-tier municipality of Kenora, geographic townships of Boys, Ewart, Forgie, Gidley, Glass, Gundy, Kirkup, Pellatt and the unorganized area south and east of the geographic township of Boys township, south of the geographic township of Pellatt and west of the single-tier municipality of Kenora to the shore of Lake of the Woods all within the Territorial District of Kenora.

Summary of Firearms Restrictions for Hunting in Ontario

Be sure to check relevant species sections to identify different season types and dates restricting certain types of firearms (e.g. Bows Only seasons, Muzzle-loading Guns and Bows Only, etc.).

Firearm	Moose, Elk and Bear	Deer	Wild Turkey
Rifle	Yes – Centre-fire rifle only	Yes – Centre-fire rifle only	No
Shotgun	Yes – Shotgun not smaller than 20 gauge when using shot; shot size must be SG or number one buck or larger.	Yes – Shotgun not smaller than 20 gauge when using shot; shot size must be SG or number one buck or larger.	Yes – Shotgun not larger than 10 gauge or smaller than 20 gauge, using shot size of 4, 5, 6 or 7.
Muzzle-loader	Yes	Yes	Yes, shotgun only
Bow	<p>Yes – Bow must have a draw weight of at least 22 kilograms (48.5 lb.) at a draw length of 700mm (27.6 in.) or less.</p> <p>Arrows must be at least 600 mm (23.6 in.) long and have at a minimum a 22 mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>	<p>Yes - Bow must have a draw weight of at least 18 kilograms (39.7 lb.) at a draw length of 700mm (27.6 in.) or less.</p> <p>Arrows must be at least 600mm (23.6 in.) long and have at a minimum a 22mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>	<p>Yes – Bow must have a draw weight of at least 18 kilograms (39.7 lb.) at a draw length of 700mm (27.6 in.) or less.</p> <p>Arrows must be at least 600mm (23.6 in.) long and have at a minimum a 22mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>
Crossbow	<p>Yes – Crossbow must have a draw length of at least 300mm (11.8 in.) and a draw weight of at least 54 kilograms (119 lb.).</p> <p>Bolts at a minimum must have a 22 mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>	<p>Yes – Crossbow must have a draw length of at least 300 mm (11.8 in.) and a draw weight of at least 45 kilograms (99.2 lb.).</p> <p>Bolts at a minimum must have 22 mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>	<p>Yes – Crossbow must have a draw length of at least 300 mm (11.8 in.) and a draw weight of at least 45 kilograms (99.2 lb.).</p> <p>Bolts at a minimum must have 22 mm (0.87 in.) wide broadhead with at least two sharp cutting edges.</p>

Party Hunting

A person may hunt moose, deer or black bear in a party of two or more people who each hold a licence to hunt that species, even if the person has already invalidated their tag for that species. In these cases, at least one member of the party must hold a tag that has not yet been invalidated, and the group must comply with the following conditions:

- Each person must have a valid licence to hunt the big game species being hunted.
- The total number of moose, elk, deer or bear of a specified sex, age or type killed by the party does not exceed the total number of tags for that sex, age or type held by the members of the party.
- All members of the party must hunt together in the same Wildlife Management Unit or portion thereof, for which the tag is valid.
- **Each member of the party must hunt within 5 kilometres of the person who holds the tag** that is valid for the wildlife being hunted.
- Each member of the party must be able to reliably and immediately communicate with other members of the party.
- All members of the party, including the person who holds the tag that is valid for the species that the party is hunting, must actively participate in the hunt and hunt co-operatively.

Party hunting is also permitted for elk in accordance with the conditions noted above, however some additional rules apply. See the Elk section (p.75) for these additional rules.

The person who kills the animal while hunting in a party shall immediately notify all other members of the party that the animal has been killed. If the tag holder is not the person who kills the animal, the tag holder must immediately go to the kill site, confirm the type/sex/age of the animal and then invalidate their tag. See the Tags section (p.19) for more information.

If you have questions about party hunting, the best time to get answers is before the hunt begins. Contact your local NDMNRF district office or NRISC at 1-800-387-7011 or NRISC@ontario.ca.

Note: The term ‘invalidated tag’ refers to a tag that has been notched by the tag holder immediately after the kill, at the site of the kill and before moving the animal. See the Tags section (p.20) for information.

Use of Vehicles, Boats, Drones or Aircraft

Aircraft, including drones and balloons, may not be used while hunting. Vehicles (includes any kind of vehicle that is driven, propelled or drawn on land or ice by any kind of power, including muscular power, and includes snowmobiles, boats and the rolling stock of a railway) may not be used for chasing, pursuing, harassing, capturing, injuring or killing any wildlife.

It is illegal to have a loaded firearm in or on, or discharge a firearm from, an aircraft, vehicle (including snowmobile and all-terrain vehicle) or motorboat (a motorboat is considered a boat with a motor that is attached to the boat and that is capable of being used as a means of propulsion) or anything towed by the boat. A loaded firearm may be carried in, and discharged from, a canoe or boat that is being paddled, with no motor attached.

There is an exception to the prohibition on loaded firearms in a motorboat if you are hunting double-crested cormorants in accordance with the regulations (see p. 92 for more information) or waterfowl in accordance with the *Migratory Birds Convention Act, 1997*.

General Regulations

Note: There is an exception to having a loaded firearm in a vehicle if a person has a mobility disability and meets one of the following criteria:

1. A paraplegic or hemiplegic.
2. A single (above the knee) lower limb amputation or a double (below the waist) amputation.
3. Suffers severe disability and cannot hunt without the use of a wheelchair or similar means of locomotion. In this case, the hunter must provide a medical certificate stating disability.

Please plan ahead to allow for the processing of requests. To apply for an authorization, please contact NRISC at 1-800-387-7011, Monday to Friday from 8:30 a.m. to 5:00 p.m.

Dogs

All dogs used to hunt deer, moose or black bear must be licensed for the purposes of hunting. There are some areas where dogs are not permitted to be used for hunting deer or moose (see the season tables of the Deer and Moose sections for additional details). Dogs may not be used to hunt elk.

Dogs are not permitted to run at large in areas usually inhabited by big game during the closed season. It is your responsibility to ensure your dog does not enter private property that you do not have permission to hunt on or where hunting is prohibited in contravention of the *Trespass to Property Act*. Hunters are responsible for ensuring their dogs are under their control and that hunting activities are conducted lawfully.

During lawful hunting hours, you are permitted to use a leashed dog (dog does not require a licence) to track and retrieve wounded big game during the open season provided the dog is kept on a leash that has a maximum length of 10 metres and the dog is under the physical control of the dog handler at all times. The licensed hunter who wounded the animal must be with the dog and handler, and if party hunting, the holder of the tag must also be present.

The person handling the tracking dog must not be carrying a firearm unless properly licensed to hunt the animal being tracked.

To hunt raccoon at night, you must be accompanied by a dog licensed for the purposes of hunting and you must have a resident small game licence or be hunting under the authority of a trapping licence in the area described on the licence.

To conduct dog training and field trials on game species during the closed season, an authorization or licence issued by NDMNRF is required. An appropriate hunting licence is required during the open hunting season.

Many municipalities have by-laws regarding dogs, including by-laws that may affect the use of dogs while hunting. Check with the local municipal office for details.

If you are bringing a dog into Canada from the United States, you must have a certificate signed by a veterinarian licensed in Canada or in the United States, stating that the dog has been vaccinated against rabies during the preceding 36 months. For more information, check with the Canada Border Services Agency.

Snares

Snares cannot be used under a small game licence, except by the holder of a resident small game licence taking snowshoe hare north of the French and Mattawa rivers with a snare constructed of copper or brass wire between 22 and 24 gauge. The opening of the snare wire loop must be 10 cm (4 in.) or less in diameter.

General Regulations

Poison and Adhesives

It is illegal to use poison and adhesives to kill, injure or capture wildlife, including in protection of property.

Big Game – Swimming

You may not hunt moose, elk, deer or black bear while they are swimming.

Trespassing

It is unlawful to enter private property once notice has been given that entry is prohibited, or that certain activities like hunting are prohibited. Notice of no trespassing may be given in a variety of ways, including verbally, signs, symbols (for example a red circle 4 inches in diameter), coloured markings or fences. Lands under cultivation are also considered to be notice against entry.

Always ask for permission and obey posted signs.

Not all land is signed. Unsigned lands may be private land as well. It is your responsibility to find out who owns the land you wish to hunt on and to determine if entry is prohibited or certain activities like hunting are prohibited. If unsure, stay out. If a wounded animal runs onto private property where notice has been given that entry is prohibited or certain activities like hunting have been prohibited, you must seek permission to retrieve the animal. Positive landowner or occupier/hunter relationships are important to the future of hunting in Ontario.

You may not enter private land in a party of more than 12 persons without the express permission of the occupier if any member of the party possesses a firearm or other hunting device.

Help Protect Our Natural Resources Solve a Natural Resource Case

You can help solve a natural resource case!

Every year, a number of natural resource violations go unsolved. Conservation officers are asking for your assistance using a new interactive online map.

ontario.ca/page/solve-natural-resource-case

If you have information about any of these cases or if you see or suspect an act of resource abuse, please call the Natural Resources TIPS Reporting line at 1-877-847-7667.

Report natural resources violations to 1-877-847-7667

General Regulations

Before hunting on Indian Reserves, ask the permission of the Band Council.

You must have written permission from the landowner on the form provided by the NDMNRF to hunt elk on private land, to hunt moose in WMU 65 on private land, and to hunt deer in WMUs 43A, 43B and 44 on private land.

Wildlife Management Areas

There are some designated areas within the province which provide special opportunities for hunting (e.g. Special Hunting Areas, Provincial Wildlife Areas, Wildlife Extension Landowner Agreement Areas, etc.). The majority of these areas are found in the southern part of the province. These areas may have seasonal or daily user fees. Hunters interested in hunting in these areas should contact their local NDMNRF district office for more information.

Crown Game Preserves

It is illegal to hunt or trap in Crown Game Preserves. In addition, you may not use or possess firearms in Crown Game Preserves, unless you live on private land within a Crown Game Preserve.

Hunting in Provincial Parks

Hunting is permitted in a number of provincial parks in Ontario. Hunters should **always** check with the appropriate park office regarding areas open to hunting, species that can be hunted, seasons and other restrictions that apply in each park. Call 1-800-387-7011 for assistance.

Camping on Crown Land and in Conservation Reserves

Most Crown land and conservation reserves are available year-round for personal, temporary use, at no cost. Some restrictions apply to certain activities and areas. Non-residents of Canada who are 18 years of age or older generally require a permit to camp on Crown land in northern Ontario or in a conservation reserve anywhere in Ontario.

For more information:

- Contact the local NDMNRF district office
- Contact Natural Resources Information and Support Centre at 1-800-387-7011 or NRISC@ontario.ca
- Visit <https://www.ontario.ca/page/recreational-activities-on-crown-land>

Note: Non-residents are prohibited from camping on Crown land within 1 km of the following road systems in Kenora and Fort Frances Districts between October 1 and November 15:

- Hwy 71 and roads branching off Hwy 71 from Strachan Road to the junction of Hwy 17
- Hwy 596, Caribou Falls Road and Sand Lake Road and all roads branching off these roads to the junction of the English River Road
- Rush Bay Road and branch roads
- Shoal Lake Road and branch roads
- Gundy Lake Road and branch roads

For more information, contact the Kenora District Office at (807) 468-2501 or the Fort Frances District Office at (807) 274-5337.

Tip: Use lift lines to safely raise and lower unloaded firearms from tree stands

Conservation Officers

Conservation officers are appointed under the *Fish and Wildlife Conservation Act, 1997*, and include: Royal Canadian Mounted Police, a police officer or First Nations constable appointed under the *Police Services Act*, a game officer designated under the *Migratory Birds Convention Act, 1994*, a park warden designated under the *Canada National Parks Act*, and a person whose primary employment responsibility is enforcement of fish and wildlife laws in a border jurisdiction if they are acting under the direction of a conservation officer. Conservation officers have powers of inspection, arrest, search and seizure under the various laws they enforce, including the *Fish and Wildlife Conservation Act*, the *Migratory Birds Convention Act, 1994*, and the *Fisheries Act*.

Conservation officers have authority to enforce the *Off-Road Vehicles Act*, *Motorized Snow Vehicles Act*, *Liquor Licence Act*, and *Canada Shipping Act*. When carrying out their duties, or investigating an offence under these statutes or the corresponding regulations, conservation officers may have the power to:

- Stop and/or inspect a vehicle, boat or aircraft
- Inspect firearms, ammunition, wildlife or fish
- Ask questions relevant to the inspection
- Inspect buildings or other places
- Enter and cross-over private property
- Search with a warrant
- Search without a warrant in circumstances requiring immediate action
- Seize items related to the offence
- Arrest anyone they believe has committed, is committing or is about to commit an offence

Conservation officers operate “game check stations” throughout the year. At these stations, conservation officers collect information on game taken by hunters and make sure the regulations are being followed in order to better manage our wildlife resources. During an inspection, hunters are required to provide reasonable assistance and provide accurate information about the hunt.

When transporting game harvested by another hunter, you must be prepared to provide information about the hunter (e.g. name, Outdoors Card number, licence number) and details of the hunt (e.g. date and location of kill) if requested by a conservation officer.

Game Wildlife and Parts

Black bear gallbladders: It is illegal to possess a gallbladder that has been removed from a black bear.

With the exception of furbearing mammals or double-crested cormorants (subject to disposal requirements, see p.93) you may not let the flesh of any harvested game wildlife that is suitable for food become spoiled or abandoned. This includes black bear.

A hunter who kills a furbearing mammal (e.g. coyote, raccoon) shall not abandon the pelt or permit the pelt to be spoiled or destroyed. A pelt is the untanned skin of a furbearing mammal, whether or not the skin is on a carcass.

In general, it is illegal to buy, sell or barter any game wildlife or specially protected wildlife or their parts (including taxidermy mounts). There are some exemptions – please contact your local NDMNRF district office for more information. You may purchase the meat of a furbearing mammal from a licensed trapper or farmer for consumption by your immediate family. A person selling a carcass of a furbearing mammal for consumption must advise the buyer in writing that the meat has not been inspected under the *Food Safety and Quality Act*.

For information on buying or selling hides or cast (naturally shed) antlers or on serving wild game at charitable events, visit ontario.ca/page/buy-or-sell-wild-animal-hides-or-antlers-native-ontario or ontario.ca/page/serve-fish-or-wild-game-charitable-events, or call 1-800-387-7011.

General Regulations

Shipping

Unless accompanied by the hunter or trapper who lawfully harvested the animal, receptacles containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents, written on the outside.

Import

It is an offence to possess wildlife that was killed, captured, taken, possessed, transported, bought, sold or removed from another jurisdiction contrary to the laws of that jurisdiction. It is an offence to sell wildlife from another jurisdiction if the sale is not permitted in the jurisdiction from which it was originally exported.

To prevent the introduction of Chronic Wasting Disease (CWD), Ontario has amended its regulations restricting the import and possession of parts from all members of the deer family (including deer, elk, moose, caribou) harvested in other jurisdictions. See ontario.ca/cwd for more information.

Export

Non-residents must have an Ontario Non-Resident Export Permit to export moose, deer, elk or black bear that were killed in Ontario, or their parts.

An Export Licence for Furbearing Mammals and their Pelts is required to export any furbearing mammal (including a wolf or coyote) or their pelt out of Ontario whether it originated from Ontario or not. This also includes pelts from farmed animals, carcasses and live furbearing mammals. Royalties are payable on all wild Ontario furbearing mammals prior to their export from Ontario. You may obtain an export permit from a local NDMNRF district office.

Export permits are not required for taxidermy mounts or tanned hides of a black bear, white-tailed deer, moose or elk.

Export permits are also not required for pelts or other parts of furbearing mammals that have been treated by a taxidermist or that have been lawfully bought or sold and are tanned, treated, or manufactured into commercial products. Artwork or jewellery made from game wildlife, where the primary value is in the artwork or jewellery and not in the wildlife, is also exempt from the requirement for an export permit.

In some provinces and countries, importation of wildlife is regulated. Hunters should check for any import requirements to avoid delays when returning home with harvested game.

Canadian CITES Export Permits

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is an international agreement which regulates trade in a number of species of animals and plants, their parts and derivatives, and any articles made from them. In some instances a CITES permit is required to export an animal, or parts of an animal, from Canada.

Residents and non-residents need a Canadian CITES export permit to export wolf, black bear and several other species from Canada. The CITES permit requirement is waived for U.S. or Canadian residents in some instances where a black bear is being exported. See the Black Bear section (p.79) for more information. Please contact Environment and Climate Change Canada (see p.94) to make arrangements to obtain a CITES permit. Please allow up to 21 days to receive a permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES listed species that you may harvest.

How to Apply to Hunt Big Game

Applying to Hunt Big Game

Some big game hunting opportunities for Ontario residents require a hunter to apply to and be successful in a draw or allocation process. These include obtaining:

- an antlerless deer validation in the Antlerless Deer Draw
- a controlled deer validation in the Controlled Deer Draw
- a moose tag in the Moose Tag Allocation Process
- an elk tag and/or licence in the Elk Draw

When applying to hunt big game make sure you:

- have a valid Outdoors Card
- apply early in the application period – do not wait until the last day
- submit only one application in your name per draw or allocation stage
- don't have any hunting suspensions

Hunters may apply to hunt big game by one of three ways:

1. **Online:** at huntandfishontario.com
2. **Phone:** by calling 1-800-288-1155, or
3. **In-person:** by visiting a participating ServiceOntario or licence issuer

To apply you will need:

- a valid Outdoors Card
- method of payment (VISA, MasterCard, VISA Debit, and Debit MasterCard are accepted)
- any hunt codes that correspond to your choices. Hunt codes can be found in the deer, moose and elk sections of this summary.
(**Note:** No hunt codes are needed for the Antlerless Deer Draw)
- your group number (if you are applying to the Controlled Deer Draw or Elk Draw as a member of a group).

Whichever option you choose to apply, online, phone or in-person, it is your responsibility as an applicant to ensure that applications are valid and choices are entered correctly.

Applying Online

You can visit huntandfishontario.com to purchase a licence and apply to a deer draw either all at once or in separate transactions. Applying to the Elk Draw or Moose Tag Allocation Process requires an application fee. The information you enter electronically is your application to the draw or allocation and you will be asked to confirm that your choices are correct.

Once you have completed and submitted the application, save a copy of your application receipt for future reference.

Applying by Telephone

You can apply to hunt big game by calling 1-800-288-1155 during the application period. This toll-free number operates 24 hours a day, 7 days a week until 11:59pm of the application deadline. Phone lines will be open during the following periods:

- Moose Primary Allocation: April 1 to May 2
- Moose Second Chance Allocation: June 15 to July 7
- Elk: April 15 to June 10
- Antlerless Deer: March 1 to June 30
- Controlled Deer: August 1 to August 31

Once you have completed your application, you will be asked to confirm that your choices are correct and you will receive an authorization number.

Applying in-person

You can apply to hunt big game in person at a participating ServiceOntario or licence issuer. Find participating ServiceOntario Centres at ontario.ca/serviceontario and licence issuers at ontario.ca/licenceissuers.

How to Apply to Hunt Big Game

Individual Applications

You can only apply to the Antlerless Deer Draw and the Moose Tag Allocation Process as an individual applicant. The Controlled Deer Draw and the Elk Draw allow for individual or group applications.

If applying as an individual you must enter your choice of WMU, or hunt code (if applicable) which represents your choice of WMU, animal type (if applicable) and season/firearm type (if applicable). Each individual applicant will be given an Authorization Number. The authorization number confirms that the hunter has successfully entered into the draw or allocation. Please record this authorization number for your records.

Group Applications

If you intend to hunt in a party in a controlled deer season or for elk, it is to your advantage to apply as a group. The maximum number of hunters that can apply as a group is 4 (the group leader plus up to 3 group members).

Group Leader

The Group Leader must be the first member of the group to apply. The Group Leader is the only member of a group who enters the hunt code representing the group's choice of WMU/harvest area and season (if applicable). The Group Leader is then provided with a Group Number to identify the group and its choices. The Group Leader must give the Group Number to the Group Members so they may add their names to the group's application when submitting their application.

Group Member

Each Group Member must obtain the Group Number from the Group Leader before entering the draw. Members will be asked for the Group Number so the group can be identified and linked together for application to the draw.

Application Results

Applicants can go online to huntandfishontario.com or call 1-800-288-1155 for their application results. Go to the Important Dates section (p.5) to see when results are available. Hunters will need their 15-digit Outdoors Card number (or account login information if checking online) to access their results.

Moose Tag Allocation

The former Moose Draw was replaced by a points-based Moose Tag Allocation Process in 2021. Applicants awarded a tag must claim the tag to be issued it. All moose hunters must have a moose licence. See the Moose section (p.59) or ontario.ca/moosetagprocess for details.

**Make safety a priority.
Talk to your hunting party
about safety before you
begin hunting - every time!**

Note: Use of dogs is not permitted during the muzzle-loading guns and bows seasons, except in WMUs 7A, 18B, and 59. Landowner's written permission is required in WMUs 43A and 43B.

Are you planning to hunt outside Ontario?

The Ministry of Northern Development, Mines, Natural Resources and Forestry is working to prevent Chronic Wasting Disease from entering Ontario. On January 1, 2021, Ontario implemented enhanced restrictions for importing parts of cervids harvested in other jurisdictions.

If you are planning to hunt outside of Ontario, you should carefully review the rules regarding the import and possession of any cervid species and their parts to avoid possible seizure of game and charges.

For more information, visit ontario.ca/cwd.

Controlled Deer Hunt Notes:

Unless otherwise indicated, only shotguns, muzzle-loading guns and **bows** are permitted in controlled deer hunts.

^ indicates that rifles, shotguns, muzzle-loading guns and bows are permitted.

* indicates that only muzzle-loading guns and bows are permitted.

+ indicates that only shotguns and muzzle-loading guns are permitted

~ indicates that only muzzle-loading guns are permitted.

The use of dogs is not permitted during controlled deer hunts.

Controlled deer hunt validations are for antlered or antlerless deer, except a portion are for antlered deer only in WMUs 76A, 76B, 76C, 76D, 76E, 77B and 77C. Applicants to these WMUs do not specify their preferred validation type. Your Licence Summary will indicate which validation type you were randomly drawn for.

WMU 77A has unique administration of its controlled deer hunt seasons. Please contact the local NDMNRF District office for more information.

**Attention
hunters:**

Mandatory Hunter Reporting Requirements

All hunters that purchase or are issued a tag to hunt elk, deer, bear, wild turkey and wolf/coyote (in WMUs where a tag is required), and any hunter issued a licence to hunt moose must complete a hunter report. You are required to complete a hunter report even if you did not participate in the hunt or harvest an animal. Refer to the Hunter Reporting Requirements section for details on timelines, how to submit your report and potential consequences for not reporting.

Deer Hunting Requirements

Anyone wishing to hunt deer must have the following:

- Outdoors Card,
- Deer Licence or Farmer's Deer Licence listed on your Licence Summary,
- Deer Tag or Additional Deer Tag (validated for the appropriate season/firearm, area, and type of deer) OR be party hunting with a person who has a valid Deer Tag or Additional Deer Tag, and
- Proof of firearm accreditation if you are hunting with a gun.

Resident hunters wishing to hunt an antlerless deer (deer with no antlers or antlers both less than 7.5cm long, which generally include adult female deer and fawns of both sexes) should apply to the antlerless deer draw and/or the controlled deer hunt draw depending on their WMU and season of preference. (**Note:** Hunters may also hunt an antlerless deer by purchasing an Additional Deer Tag valid for antlerless deer or by party hunting with a person who has a Deer Tag or Additional Deer Tag valid for an antlerless deer).

Resident hunters who wish to hunt in a controlled deer hunt must apply and be successful in the controlled deer hunt draw. Eligible farmers and landowners may apply for a farmer/landowner validation instead of applying to the controlled deer hunt draw.

Note: Only farmers (or an immediate relative) whose primary occupation is farming who live upon and till land which they own are eligible for a Farmer's Deer Licence. The tag that is issued with a Farmer's Deer Licence is only valid for the geographic area in which the farmer's land is located. Farmers must identify the geographic area in which their land is located and complete an attestation online or in-person at a participating ServiceOntario or licence issuer.

NEW for 2022

The ministry has made deer season changes to simplify and align deer season types and duration across the province. See the White-tailed Deer Seasons tables and their notes (p.40-45) for 2022 season dates and associated regulations. For details, see ero.ontario.ca/notice/019-4637.

Deer Hunting Regulations

Hunters are only permitted to harvest the type of deer identified on their Deer Tag or Additional Deer Tag, except in the following circumstances:

- if party hunting, a hunter may harvest the type of deer identified on the Deer Tag (or Additional Deer Tag) of a member of their hunting party, or
- if hunting in a controlled deer hunt, a hunter may only harvest the type of deer identified on their (or their party member's) controlled deer hunt validation listed on their Licence Summary or their Additional Controlled Deer Tag.

Tagging and Transporting

See the Tags section (p.19) for details on tagging and transporting. Additional information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting Requirements

See the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including deer, may only be hunted with a firearm (includes bows). When hunting deer, you may only use or carry a firearm of the type permitted for hunting deer at that time in that WMU. For example, when hunting deer during a bows only season, you may only use and carry bow hunting equipment. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting deer are found in the General Regulations section (p.28).

Party Hunting for Deer

Party hunting is permitted during the open season for deer under a set of specific conditions. The list of conditions is listed in the General Regulations section (p.32).

A person shall not hunt deer in a party during a controlled deer hunt season unless their Licence Summary has been validated for that specific controlled deer hunt season. The exception is an apprentice hunter who is hunting with a licensed mentor (in which case the mentor must have their Licence Summary validated for the relevant controlled deer hunt season).

Dogs

The use of dogs is permitted for hunting deer during some seasons (a dog licence is required in these cases) – see the deer season tables for information on when dogs are not permitted. In areas where the use of dogs is prohibited for hunting, dogs may still be used to track and retrieve a deer that has been wounded during a lawful hunt (see the General Regulations section (p.33) for more information).

Guides

Non-residents must employ one licensed guide for each two hunters when hunting deer in the Territorial District of Rainy River. WMUs within the Territorial District of Rainy River are 9B, 10, 11A and parts of 7B and 12B - see the WMU maps section (p.12) and deer season tables for more information.

Additional Deer Tags

When deer populations in certain WMUs warrant, hunters may be offered the opportunity to harvest an additional deer through the purchase of Additional Deer Tags or Additional Controlled Deer Tags.

Information regarding this year's Additional Deer Tags (WMUs, hunt codes) will be posted online at ontario.ca/hunting when available. If you do not have internet access, please contact the Natural Resources Information and Support Centre at 1-800-387-7011.

Additional Deer Tags are available on a first come, first served basis. Additional Deer Tags may also be available to non-residents in WMUs with a non-resident deer season. A Deer Licence is required before you can purchase an Additional Deer Tag.

Note: Additional Deer Tags are not valid during controlled deer hunt seasons.

Controlled Deer Hunt

In order to be able to hunt during a controlled deer hunt season, you must obtain a controlled deer hunt validation by applying to the draw (including if you intend to hunt with a bow). As of 2022, bows are permitted during controlled deer hunts (except in WMUs 91A, 91B, 92A, 92B, 92C and 92D) with a controlled deer hunt validation. If you are successful in the draw, you will need to print an updated Licence Summary that lists your controlled deer hunt validation (area, season, type of deer).

Any resident of Ontario who has a valid Outdoors Card may apply to the draw for a controlled deer hunt validation. It is not necessary to purchase a Deer Licence prior to applying to the controlled deer hunt draw; however, hunters who receive a validation in the draw **must** purchase a Deer Licence before their validation will appear on their Licence Summary and before they can hunt in the controlled hunt. Each hunter who receives a validation in the draw is permitted to hunt deer in the WMU specified on their Licence Summary during the period indicated. If successful in the draw, the validation is for an antlerless or antlered deer, unless otherwise specified. Hunters who are not successful in the controlled deer hunt draw may not participate in the controlled deer hunt.

Note: Apprentice hunters (12-14 years old) are not eligible to apply to the controlled hunt draw or receive a controlled deer hunt validation, but they may participate in a controlled hunt with a mentor who has a controlled deer hunt validation for the relevant season listed on their Licence Summary. Any deer harvested must be using the mentor's validation and tag in these cases.

Controlled deer hunt draw applicants who wish to hunt in a party should apply as a group (using the Group Number provided by the Group Leader) rather than as individuals. The benefit of this is that if your group application is selected in the draw, every hunter listed on your application will receive a controlled deer hunt validation. The applicant who hunts in a party but applies as an individual risks being the only hunter in the party who is successful, or unsuccessful, in the draw. Individual and group applicants have the same chance of success in the draw.

For instructions on how to apply to the controlled deer hunt draw, see the How to Apply to Hunt Big Game section (p.38).

Note: Additional Controlled Deer Tags may only be purchased by a person who holds a controlled deer hunt validation for the relevant WMU and season. Additional Controlled Deer Tags are only valid during the controlled deer hunt season specified on the tag.

- they are the owner or the sole designated representative (president, vice-president, treasurer or secretary) of a company which owns a parcel of land of 20 hectares (50 acres) or more in the WMU with a controlled deer hunt.

Farmers and landowners who meet the eligibility criteria may submit one application for a controlled deer hunt validation by completing an attestation statement online or in-person at a participating ServiceOntario or licence issuer. An immediate relative of the farmer or landowner meeting the above criteria also qualifies to receive a controlled deer hunt validation tag. During the application process the farmer or landowner will indicate if they wish to add any immediate relatives, the farmer or landowner will require the Outdoors Card number of the relative and the relationship to them in order to complete the process. An immediate relative is a person's grandparent, parent, spouse, sibling, child, step-child or grandchild (including equivalent step-family relationships).

Note: You must have a valid Outdoors Card and a valid Deer Licence or Farmer's Deer Licence before your controlled deer hunt validation will appear on your Licence Summary.

Farmer and Landowner Controlled Hunt Validation

Farmers and landowners (or an immediate relative) may be eligible to receive a controlled deer hunt validation for one controlled deer hunt season if they meet one of the following criteria:

- They own a parcel of 20 hectares (50 acres) or more of land in a WMU with a controlled hunt or,
- their occupation is farming and they have an Ontario Ministry of Agriculture, Food and Rural Affairs Farm Business Registration Number (or letter of exemption from the Farm Organization Accreditation Tribunal) in a WMU with a controlled hunt or,

3 REASONS WHY

HUNTERS SHOULD SUPPORT THE CCFR

- Massive national campaigns to protect and promote ALL gun owners and hunters
- Effective, nonpartisan lobbying, Canada's most respected voice in firearms advocacy
- All CCFR members enjoy \$5M in primary personal liability insurance at no extra charge

Your sport is not safe from increasing regulations and bans against legal gun owners.

Nobody works harder to protect and promote our lifestyle and sport than the CCFR.

Chronic Wasting Disease

Chronic Wasting Disease (CWD) is a degenerative, fatal and untreatable disease of the central nervous system affecting members of the deer family (e.g. deer, elk, moose, caribou). CWD is a devastating disease that has killed and infected thousands of deer and elk in North America. CWD is a similar disease to scrapie in domestic sheep, BSE or mad cow disease in cattle and Creutzfeldt-Jakob Disease in humans.

Symptoms

Infected animals show abnormal behaviour accompanied by progressive weight loss. In latter stages of the disease, affected animals show signs of extreme weight loss, repetitive behaviour, drowsiness, lack of co-ordination, drooping head and ears, trembling, drooling and increased drinking and urination.

How CWD is Spread

CWD can be spread by close contact between animals or by exposure to a contaminated environment. There is evidence the abnormal prions that cause the disease may remain infectious in the environment, such as in soil, for years.

CWD and Ontario

There is no evidence that CWD is in Ontario, but it is important to be vigilant. The NDMNRF has been conducting annual surveillance monitoring since 2002 with the help of deer hunters, and has found no evidence that CWD exists in Ontario. The NDMNRF encourages hunters to continue to take part in ongoing surveillance programs by providing samples of their harvested deer for testing. Hunters can visit ontario.ca/cwd or call their local NDMNRF district office for specific annual testing locations.

CWD and Humans

The World Health Organization has said that while there is no scientific evidence that CWD can infect humans, it recommends that meat or organs from an infected/sick animal should NOT be consumed by humans or animals.

Ontario's CWD plan

Ontario renewed its CWD Prevention and Response Plan in 2019. Ontario's plan is designed to minimize the threat posed by CWD and protect the significant benefits provided by cervid species in the province. Please visit ontario.ca/cwd for more information on symptoms, testing and how you can help keep CWD out of Ontario.

Help Ontario Monitor Wildlife Diseases

Hunter observations of sick or dead wildlife can play a key role in monitoring for emerging wildlife diseases. Hunters who encounter sick or dead wildlife can contact the Canadian Wildlife Health Cooperative (CWHC) at **1-866-673-4781**.

Organs, tissue samples or whole animals (small animals) can be submitted at no cost for disease diagnosis. Information on how to submit samples to the CWHC is available at: cwhc-rcsf.ca/report_submit.php

Keeping Chronic Wasting Disease Out of Ontario

Ontario has a number of laws in place to help prevent CWD from entering Ontario:

- It is illegal to use or possess any product containing natural attractants including blood, urine, gland oils and other fluids of any member of the deer family, **for any purpose**.
- It is illegal to bring most body parts and any fluids of any member of the deer family into Ontario that were harvested in another jurisdiction.

Note: Most jurisdictions have regulations in place governing the transport of deer family carcasses through their area. Contact the appropriate government agency in the jurisdictions where you intend to transport cervid carcasses to avoid inconvenience, potential seizure of game and charges.

How Hunters and the Public can Help

- Know and follow the CWD prevention rules. Tell others about the rules if they are not aware.
- Avoid feeding deer and elk due to the increased potential to spread disease.
- Always practice safe carcass handling procedures (e.g. wear rubber or latex gloves when field dressing deer, minimize contact with and do not eat eyes, brain, spinal cord, spleen, tonsil or lymph nodes).
- Report any deer displaying physical signs of illness (including loss of body weight and condition, indifference to humans, increased salivation, tremors, stumbling) to your local NDMNRF district office or the Canadian Wildlife Health Cooperative at 1-866-673-4781.
- Immediately contact your local NDMNRF office if you become aware of a positive CWD test from an animal that was harvested out-of-province, so that your meat can be safely disposed.

Are you feeding wildlife?

A number of risks are associated with feeding wildlife at communal feeding sites. Animals being fed can:

- become habituated to artificial food sources
- get sick from eating artificial food sources, like too much corn
- cause road accidents as they move to feeders
- cause conflicts with pets and humans
- have an increased risk of passing on parasites or diseases

For these reasons, the Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry discourages the feeding of wildlife. To learn more about the risks associated with feeding wildlife visit:

ontario.ca/feedingwildlife

Going Hunting?

Debris and grass build-up on the ATV can heat, fall and ignite! Reduce the risk of sparking a wildfire.

1. Keep your machine clean.
2. Stop often to check for and remove debris.
3. Let your machine cool.
4. Ensure your ATV has a proper spark arrestor.
5. Pack a shovel, collapsible pail or fire extinguisher in case of fire.

It's wildfire season. Don't be the reason.

**Shooting from a roadway -
it's dangerous, it's illegal.
Don't do it.**

Did you know... that in many jurisdictions invasive wild pigs compete with, prey on, and spread diseases to native game species? The NDMNRF is taking action to prevent the establishment of invasive wild pigs in the province.

As of January 1, 2022, hunting pigs in Ontario is illegal.

Hunting of wild pigs rarely removes all pigs in a group, it can make the problem worse:

- Surviving pigs scatter, flee to new areas, and continue to reproduce;
- They learn to avoid people;
- Making them more difficult to capture.

What the ministry is doing: We have a strategy in place to protect native game species and the natural environment by ensuring invasive wild pigs don't become established in Ontario.

What can you do: Help the NDMNRF protect our wildlife, such as white-tailed deer and wild turkeys, by reporting wild pig sightings to wildpigs@ontario.ca or **1-833-933-2255**.

Learn more at ontario.ca/wildpigs

Cervid Family Comparison

Ontario has four different wild members of the cervid/deer family. You must have a valid licence and tag for the species you are hunting. There is no open season for caribou and a limited open season for elk, so you must be absolutely certain that the animal you see is the right species, sex and age.

There are differences in the size, shape and colour of moose, white-tailed deer, elk and caribou.

Woodland Caribou (no open season)

Size: 1.0 to 1.2 m at the shoulders

Bull: 160 to 210 kg

Cow: 110 to 150 kg

Elk (limited open season for residents)

Size: 1.2 to 1.5 m at the shoulders

Bull: average 354 kg

Cow: 227 to 239 kg

Moose

Size: 1.5 to 1.8 m at the shoulders

Bull: 400 to 545 kg

Cow: 375 to 535 kg

White-Tailed Deer

Size: 0.9 to 1.1 m at the shoulders

Adult buck: 45 to 136 kg

Adult doe: 39 to 60 kg

Moose

Moose Seasons

Moose tags are valid only for the WMU, moose type(s) and season(s) indicated on the tag. For example, a bull tag or a cow/calf tag valid for the bows only season (i.e. a “bow tag”) is valid only during the bows only season. Calf tags are valid for the full length of the moose hunting season(s) in the WMU they are issued for (e.g. in both the bows only and “gun” seasons).

Rifles, Shotguns, Muzzle-loading Guns and Bows (the “gun” seasons when “gun tags” are valid)

Wildlife Management Unit	Resident – Open Season	Non-Resident – Open Season
1A, 1C, 1D, 16-17, 25	September 17 to December 15	September 19 to November 15
2-4, 18A, 18B	October 8 to December 15	October 10 to November 15
5, 6, 7B, 8, 9A, 9B, 11A, 11B, 12-15, 19, 21A, 21B	October 15 to December 15	October 17 to November 15
22, 23, 28-42	October 15 to November 15	October 17 to November 15
24, 27	October 8 to November 15	October 10 to November 15
26	September 17 to October 31	September 19 to October 31
46-50, 53-63	October 17 to October 23	None

Note: The hunting of predominantly white-coloured moose (over 50 percent white) is not permitted in WMUs 30 and 31.

Bows and Muzzle-loading Guns Only

(seasons when bows and muzzle-loading guns only tags are valid)

Wildlife Management Unit	Resident – Open Season	Non-Resident – Open Season
7A	October 15 to December 15	October 17 to November 15
18B	September 17 to October 7	September 17 to October 7

Moose

Bows Only

(seasons when “bow tags” are valid)

Wildlife Management Unit	Resident – Open Season	Non-Resident – Open Season
2-4, 18A, 24, 27	September 17 to October 7	September 17 to October 7
5, 6, 7B, 8, 9A, 9B, 11A, 11B, 12-15, 19, 21-23, 28-33, 35-42	September 24 to October 14	September 24 to October 14
46-50, 53-63	October 1 to October 7	None

Note: The hunting of predominantly white-coloured moose (over 50 percent white) is not permitted in WMUs 30 and 31.

Resident Seasons with Controlled Hunter Numbers

Wildlife Management Unit	Resident – Open Season	Firearm Type	Restrictions
11B	September 24 to October 14	Rifles, Shotguns, Muzzle-loading Guns	For hunters with a lower limb disability (see notes below).
65	October 5 to October 7	Bows Only	For hunters with a lower limb disability (see notes below). See notes on WMU 65 below.
65	October 8 to October 14	Bows Only	See notes on WMU 65 below.

Moose Hunting in WMU 65

In WMU 65 there are no dogs allowed. Any hunter wishing to hunt moose in WMU 65 is required to obtain written landowner permission. Hunters must have a tag specifically valid for WMU 65 or have a partner permit that is associated with the hunter who has a tag validated for WMU 65. Contact Kemptville District Office at 613-258-8204 for details.

Opportunities for Moose Hunters with Lower Limb Disabilities

Hunters with disabilities may apply for a moose tag in any WMU, however there are two WMUs (11B and 65) that offer seasons specifically for resident moose hunters with lower limb disabilities. Hunters who qualify for these seasons are people who:

- Are paraplegic or hemiplegic.
- Have a single, above the knee, lower limb amputation, or a double, below the waist amputation.
- Have a severe disability and cannot hunt without the use of a wheelchair (or similar means of locomotion). These cases require a medical certificate.

Qualified hunters wishing to take part should apply for a tag in the points-based allocation process. Such applications will be considered like any other; there are no separate quotas.

For more information regarding WMU 11B, please contact Thunder Bay District Office at 807-475-1471. For more information regarding WMU 65, please contact the Kemptville District Office at 613-258-8204.

Moose Hunting Requirements

Anyone wishing to hunt moose in Ontario must have the following:

- Outdoors Card
- Moose Licence listed on your Licence Summary
- Moose Tag (valid for the appropriate season/ firearm, area, and type of moose), OR be party hunting with a person who has a valid Moose Tag, and
- Proof of firearms accreditation if you are hunting with a gun

Reminders

Applying to the moose tag allocation process does not provide you with a moose licence. To party hunt with a tag holder you must purchase a moose licence prior to your hunt. In order to hold a moose tag you must purchase a moose licence.

A moose licence does not include a calf tag. WMU-specific calf tags can be applied for through the allocation process described on p.59 of this section and at ontario.ca/moosetagprocess.

Tag types are:

- bull tags valid only for the harvest of a bull moose and specific to a WMU and season (e.g. bows only season)
- cow/calf tags valid for either a cow OR a calf moose and specific to a WMU and season (e.g. gun season)
- calf tags valid only for the harvest of a calf moose and specific to a WMU and all seasons (e.g. both the bows only and gun seasons). There are no seasons for adult moose only (i.e. no shortened calf seasons).

Tourist outfitters no longer provide clients with Moose Validation Certificates. See Hunting with a Tourist Outfitter on p.64.

In 2021 the gun hunting season for moose in Southern Ontario (WMUs 46-50, 53-63) shifted earlier, starting the third Monday in October, as it did before 2017.

Moose Hunting Regulations

Tagging and Transporting

See the Tags section (p.19) for details on tagging and transporting. For additional information on shipping and exporting, see the General Regulations section (p.37).

Mandatory Hunter Reporting

There is a mandatory hunter reporting requirement for all moose licence holders. Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including moose, may only be hunted with a firearm (includes bows). When hunting moose, you may only use or carry a firearm of the type (rifle, shotgun, muzzle-loading gun or bow) permitted for hunting moose at that time in that WMU. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting moose are found in the General Regulations section (p.28).

Party Hunting for Moose

Party hunting is permitted during the open season for moose under a set of specific conditions. The list of conditions is listed in the General Regulations section (p.32).

Moose - Tag Allocation Process

Points-based Moose Tag Allocation Process

Background

In 2019 NDMNRF worked with Ontario's Big Game Management Advisory Committee (BGMAC) to conduct a Moose Management Review to hear from moose hunters across Ontario. In response to feedback received and BGMAC's recommendations, NDMNRF made improvements to moose management to benefit moose populations and provide a fairer system for allocating moose tags to resident hunters.

Overview

- Moose tags are distributed to Ontario residents using a points-based process.
- Most tags are awarded to applicants with the most points. You have the option to use your points for your desired tag or build your points for the future.
- The number of points you have is based upon your draw history from 1993 through 2020 and the outcome of your application(s) to the points-based process, if applicable.
- Hunters apply as individuals. There are no group applications or pools.
- The process includes two stages: the primary allocation stage and the second chance allocation stage, with different application periods.
- Hunters awarded a tag in either stage will decide whether to claim it before the respective tag claim deadline.

Primary Allocation Stage

Review Quotas and Apply: April 1 to May 2

- **April 1** – NDMNRF publishes tag quotas for the primary allocation stage and the application period opens. Tag quotas and hunt codes are available at ontario.ca/moosequotas or by calling **1-800-288-1155**. Hunt codes are also available on p.73.
- Hunter pays \$15.00 application fee.

- Hunter can make up to three choices for a tag type: Wildlife Management Unit (WMU), moose type and season/firearm type. See p.58 for information on tag types. You can apply for a point directly by selecting WMU "99Z" (hunt code "999") as your first choice rather than applying for a tag. You will be allowed to change your mind and apply for a tag in the second chance allocation stage. Complete your application by **May 2** for the primary allocation stage. Hunters are encouraged to apply early in the application period and make sure to keep record of their application receipt or confirmation number for reference.
- You can apply online at huntandfishontario.com, by calling the automated phone line at 1-800-288-1155 or in person at a licence issuer or participating ServiceOntario.
- See the How to Apply to Hunt Big Game section on p.38 for more information and p.63 for service options.

How it Works

Each tag type is allocated separately in a series of up to three steps:

1. Each tag type will be allocated to the hunters with the most points who selected that tag type as their first choice.
 - For example, all first-choice applicants for a given tag type will be ordered by their points. Tags will be awarded in descending order from highest to lowest points.
2. If tags remain available, the applicants with the most points that selected that tag type as their second choice will be awarded tags.
3. If tags are still available, this process will be repeated for third-choice applicants.

A random draw will be used to break ties when there are more applicants with the same points than the number of tags that remain available.

The minimum points required to be awarded each tag type and whether tags remain available beyond the first choice is not set in advance, but is determined solely by how many hunters choose each tag type relative to the quota and their points. See What to Consider When you Apply on p.67 for information about last year's allocation results.

Check Primary Allocation Results and Claim Tag: May 16 to June 7

- Allocation results for the primary allocation will be available **May 16**.
- Check if you were awarded a tag online at **huntandfishontario.com** or by calling the automated phone line at **1-800-288-1155**.
- Claim your tag before the deadline on **June 7** by buying your moose licence and purchasing your tag. Fees are described on p.14.
- Your points will reset to zero when you claim a tag awarded in the primary allocation stage.
- You can claim your tag by purchasing a moose licence and your tag online, by phone or at a licence issuer or participating ServiceOntario.
- You must claim your tag by June 7 for it to be issued to you. Unclaimed tags will be made available for other hunters to apply for in the second chance allocation stage.
- There is no penalty for not claiming a tag.
- Hunters who choose not to claim a tag or who are unsuccessful in the primary allocation stage can apply to the second chance allocation stage without paying a second application fee.

Second Chance Allocation Stage

Apply: June 15 to July 7

- On **June 15** NDMNRF publishes the remaining number of tags available for the second chance allocation stage and the second chance application period opens.
- Numbers of tags remaining available can be accessed at **ontario.ca/moosequotas** or by calling 1-800-288-1155. Hunt codes for remaining tag types will remain unchanged between stages.
- Tags available will include those that weren't applied for or went unclaimed in the primary allocation stage.
- Hunters can submit a new application to the second chance allocation stage unless they already claimed a tag in the primary allocation stage. Your previous choices will not automatically carry forward to the second chance allocation.
- Hunters can again make up to three choices for a tag type.
- Hunters can select WMU "99Z" as their first choice if they do not wish to be awarded a tag based on points. They can also enter a second or third choice for a tag awarded by random draw.

How it Works

- Like the primary allocation stage, tags will be awarded to the first-choice applicants with the most points.
- If tags remain available, a random draw will be used to allocate tags among hunters who applied for that tag type as their second choice.
- If tags are still available, a random draw will be used to allocate tags among hunters who applied for that tag type as their third choice.

Check Second Chance Allocation Results and Claim Tag: August 1 to End of Season

- Allocation results for the second chance allocation will be available **August 1**.
- You can choose to claim your tag after **August 1** and before the end of the relevant season by buying your moose licence and paying for your tag.
- You can claim your tag by purchasing a moose licence and your tag online or at a licence issuer or participating ServiceOntario.
- Your points will reset to zero if you claim a tag you were awarded from your first choice in the second chance allocation stage. If you applied to WMU “99Z” or you chose to claim a tag from your second or third choice you will retain your points and gain a point.

Draw History and Points

Your Points from the Past Moose Tag Draw

Your current points may reflect points you gained based on your draw history from 1993 through 2020.

Hunters will have gained one point for each year they applied for the moose draw since last receiving an adult tag, or since they began applying if they have never received an adult tag. This is the case whether the adult tag was received directly through the draw or by tag transfer. Having made a tag transfer or having received a calf tag or a surplus tag will not have reset your points.

You will have gained a point in any year you applied to WMU “99Z” because you did not want a tag and wanted to be in pool 1 the following year.

Consecutive applications are not required. This means that if the last time you were issued an adult tag through the draw or a tag transfer was in 2010, and you applied 6 times between 2011 and 2020, then you gained 6 points regardless of whether you may have transferred an adult tag or been issued a calf tag or surplus tag since 2010.

Your Points Under the Tag Allocation Process

Under the points-based allocation process, a hunter will accumulate a single point in any year they apply to one or both allocation stages, if they don't claim a tag awarded based on points.

If you claim a tag awarded based on points from the primary allocation or the first choice of the second chance allocation, your points will reset to zero (early next year).

You will retain your points and will gain a point (early next year) if you claim a tag awarded to you on either your second or third tag choices in the second chance allocation.

You can accumulate a single point per year without being considered for a tag awarded based on points by selecting WMU “99Z” (hunt code “999”) with your first choice in either the primary or second chance allocation.

Obtaining a moose tag from a tourist outfitter will not affect your points. You cannot hold more than one moose tag per year. Your points are available through your online account at **huntandfishontario.com** or by calling the automated phone line at **1-800-288-1155**. Please note ServiceOntario and licence issuers are not able to access your points for you.

Northern Ontario Preference Point

Northern Ontario resident hunters will receive a small preference by receiving one additional point (non-accumulating) in choices they enter for a northern WMU (WMUs 1-42). This small preference replaced the Northern Resident Draw.

Tag Transfers

Moose tag transfers are no longer permitted. In exceptional circumstances such as injury, illness or death of the tag holder or an immediate family member; or redeployment by the Canadian Armed Forces, a tag transfer may be considered with written request and documentation. If necessary, please contact the Natural Resource Information and Support Centre at NRISC@ontario.ca.

Important Dates for Moose Hunters

Dates subject to change beyond 2022.

Important dates

- April 1 to May 2** - Apply to the Primary Allocation Stage
 - May 16 to June 7** - Claim tags awarded in the Primary Allocation Stage
 - June 15 to July 7** - Apply to the Second Chance Allocation Stage
 - August 1 to End of Season** - Claim tags awarded in the Second Chance Allocation Stage
- *August 16** - Tags available to print until End of Season

For step-by-step instructions:

1. Visit huntandfishontario.com
2. Click on Helpful Links
3. Click on Tips to Get Started
4. Choose:
 - How to set up your online account
 - How to view your draw entries and results (includes draw history)
 - How to view your moose points
 - How to apply to the moose tag allocation process
 - How to claim your moose tag

Learn more about what to consider when you apply on p.73 and at ontario.ca/moosetagprocess.

For inquiries contact the Natural Resource Information and Support Centre by email: NRISC@ontario.ca, or phone: 1-800-387-7011.

Moose Hunting Fees

Hunters pay an application fee to apply to the allocation process, instead of having to purchase a licence to apply. Hunters only need to purchase a moose licence before claiming a tag or party hunting with a tag holder. See the application fee, licence fee and tag fees on p.14. Learn more about the benefits of the fee changes at ontario.ca/moosereview.

Additional Moose Hunting Regulations for Non-Residents

As of 2021, non-residents are only able to acquire their own tag to hunt moose by purchasing a hunt from a tourist outfitter.

A non-resident who is an immediate relative of an Ontario resident who holds a valid moose tag may purchase a non-resident moose hunting licence to party hunt with their relative during an open non-resident season. The non-resident may only hunt on the valid tag of their immediate relative. Immediate relative means grandparent, parent, spouse, child, sibling or grandchild (including equivalent step-family relationships). An attestation statement verifying the immediate relative relationship must be completed by the non-resident online or in-person at a licence issuer or participating ServiceOntario location at the time the non-resident moose licence for an immediate relative is purchased.

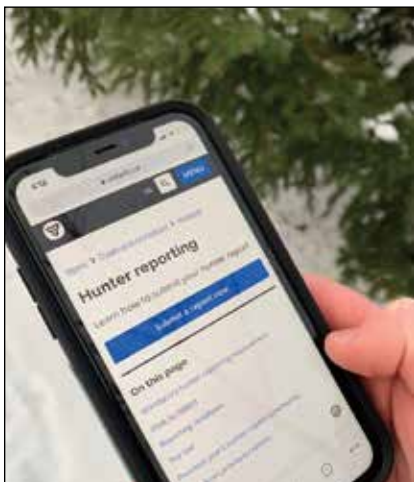

Non-residents are required to have hunter accreditation that is recognized by Ontario – see the Hunting Licence Information section on p.16 for more details.

Non-residents must employ one licensed guide for each two hunters when hunting moose in the Territorial District of Rainy River. WMUs with moose hunting seasons in the Territorial District of Rainy River are: 9B, 11A and parts of 7B and 12B (p. 12).

Hunting with a Tourist Outfitter

Residents and non-residents can acquire a hunt that includes a tag from a tourist outfitter. A hunter can only acquire a tag through an outfitter if they haven't already been issued a tag for that year. You must have a valid Outdoors Card before a tourist outfitter can request the moose tag on your behalf. Outfitters will provide further instruction to prospective clients on the steps that must be taken to purchase a moose licence and separate tag from the NDMNRF before arriving at the outfitter. The outfitter can only provide the tag once the client has paid for the tag. The moose tag fees on p.14 apply to both residents and non-residents.

Any hunter who receives a tag from an outfitter or is hunting in a party with another hunter who receives a tag from an outfitter must have a moose licence and be a registered guest of the outfitter. Each registered guest must carry documentation provided by the outfitter to verify this (in addition to their Outdoors Card, moose licence and tag if applicable).

Important Information on Mandatory Hunter Reporting

New: Starting in 2022, hunters who fail to report will be subject to a \$25 surcharge that will automatically be applied to the next draw application, licence or tag purchase for that species (generally in the following year).

Learn more in the Mandatory Hunter Reporting section (p.22).

Moose

How can you tell the difference between a calf and a cow moose?

A calf moose is a moose that is less than one year old at the time of the hunt.

An adult moose (cow or bull) is a moose that is at least one year old at the time of the hunt.

Short face

Calf moose appear to have a small nose and a “short face”

Seldom alone

Calf moose are seldom alone

Body proportions

Calf moose appear to have more leg than body and their hindquarters appear slender

Shoulder height

Shoulder height of cow moose is 2 m (6 ft., 7 in.) and of calf moose is 1.3 m (4 ft., 3 in.)

Moose Tag Quotas

Important: Moose tag quotas and hunt codes are available:

🖱️ online at **ontario.ca/moosequotas**

📞 by phone at **1-800-288-1155**

You will be able to find out the number of remaining tags available for the second chance allocation stage online or by phone as of June 15.

ontario.ca/moosequotas

Ontario 

Last Year's Moose Tag Allocation Process Results

- **97,342** hunters applied
- **16,826** tags were available in the primary allocation
- **8,452** tags were available in the second chance allocation

15,483 tags were awarded overall, including:

- 99% of bull tags
- 91% of cow/calf tags
- 87% of calf tags

Of the applicants awarded tags:

- 9% were awarded by random draw (points not applicable (N/A))
- 43% had 0-4 points
- 27% had 5-9 points
- 11% had 10-14 points
- 5% had 15-19 points
- 3% had 20-24 points
- 2% had 25-29 points

Of the tags awarded in the primary allocation, those awarded to first-choice applicants (Choice 1) included:

- 99% of bull tags
- 88% of cow/calf tags
- 76% of calf tags

Of the tags awarded in the second chance allocation, those awarded to first-choice applicants (Choice 1) included:

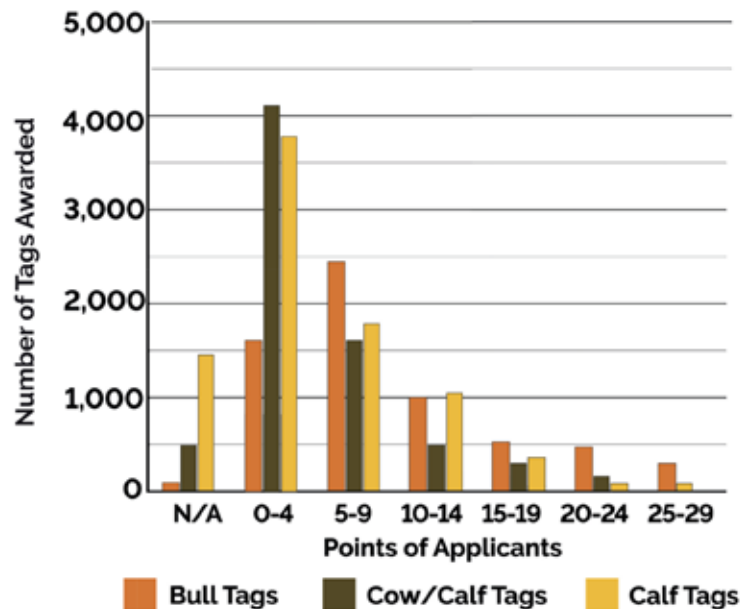

- 92% of bull tags
- 77% of cow/calf tags
- 58% of calf tags

The overall percentage of awarded tags that were claimed:

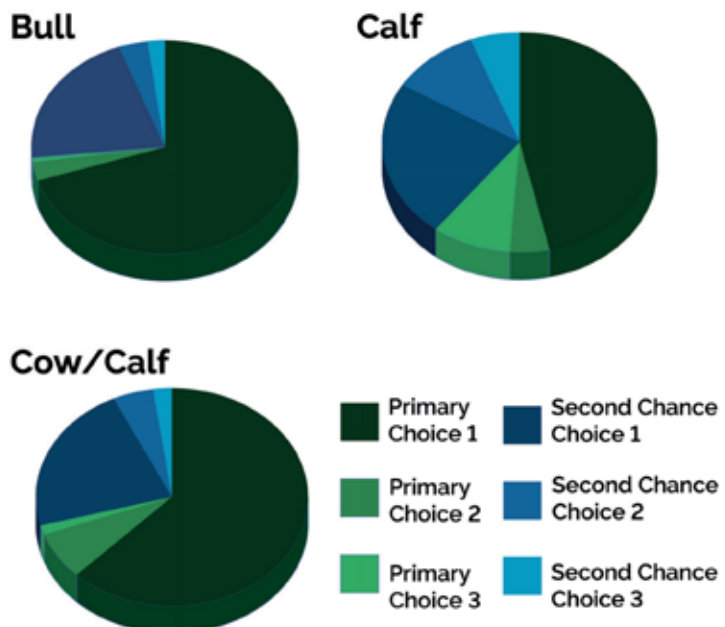

- 87% of bull tags
- 81% of cow/calf tags
- 71% of calf tags

See pages 67-72 for more information on last year's moose tag allocation process results.

Tags Awarded by Points of Applicants

Tags Awarded by Choice

Moose — What to Consider When You Apply

- Last year's minimum points required for each tag type in the primary and second chance allocation stages is available in the tables on p. 68-72. The minimum points required may vary from year to year based on tag quotas and the number of points of each applicant.
- There is no guarantee you will be awarded a tag if you have the minimum points required for a tag last year. This information is provided to help hunters understand when you may have enough points for your preferred tag type and to apply strategically.
- For most tag types a tie-breaking random draw was required to award the remaining tags among applicants that were tied at the minimum points required. You may have had the same number of points as the minimum points required but were unsuccessful in a tie-breaking random draw.
- Your second choice will not be considered for a tag type where all available tags were awarded to first-choice applicants, regardless of how many points you have. For second choices to be considered, all of the first-choice applicants for that tag type need to have been awarded tags.
- Similarly, your third choice will not be considered for a tag type where all available tags were awarded to first- or second-choice applicants, regardless of how many points you have. For third choices to be considered, all of the first- and second-choice applicants for that tag type need to have been awarded tags.
- If you are awarded a tag on your first choice, then your second and third choices are not considered in that allocation stage. Similarly, if you are awarded a tag on your second choice, your third choice is not considered in that allocation stage.
- The results tables can also be used to predict which tag types may remain available for second and third choices in either allocation stage. Minimum points required values with an asterisk (*) indicate that there were tags still available after all first-choice applicants had been awarded a tag. These are the tag types most likely to be available when considering second- and third-choices. Tag types without an asterisk had all available tags awarded to first-choice applicants. If you desire one of these tag types, you should select it as your first choice.
- Your first, second and third choices of the primary allocation, and your first choice of the second chance allocation will require you to use all of your points to claim a tag. Your second and third choices of the second chance allocation do not require you to use your points to claim a tag.
- **Consider other hunters when applying to the second chance allocation.** A tag you are awarded in the primary allocation that you choose not to claim will be made available in the second chance allocation, but being awarded a tag in the second chance allocation that you don't claim removes that hunting opportunity from other hunters and may mean they miss the moose hunt entirely. Please don't apply for a tag you won't claim.
- If you are not willing to use your points on a tag in the second chance allocation, then you can apply to WMU "99Z" (hunt code "999") with your first choice and still enter a second (and third) choice.
- Learn more about what to consider when you apply at ontario.ca/moosetagprocess.
- More detailed moose tag allocation results are available through ontario.ca/moose.

Notes for tables on p. 68-72: WMUs not listed did not have a quota of that type last year. Second Chance Minimum Points Required is not applicable (N/A) where there were no Second Chance Tags Available. The minimum points required values include the Northern Ontario preference point (see p. 61). Minimum Points Required values with an asterisk (*) are tag types that were available after all first-choice applicants had been awarded a tag. Values without an asterisk had all available tags awarded to first-choice applicants. For WMU 18B "bow" tags are for the bows and muzzle-loading guns only season.

Tags in far northern Ontario (e.g. WMUs 1A, 1C, 1D, 2, 16A, 16C, 17, 18B and 25) may be in relatively low demand and awarded to hunters with few points, but moose in all or large parts of these WMUs cannot be accessed by road. Any road-accessible areas of such WMUs may have higher than expected hunter numbers and lower hunter success rates. Please consider these aspects when planning a moose hunt in such WMUs.

65	N/A	N/A	718	719	720

^ for these WMUs, “bow tags” are for the bows and muzzle-loading guns only season.

“N/A” indicates the WMU does not have the applicable season.

Note: Not all hunt codes listed may have a quota. Check quotas online at ontario.ca/moosequotas or by calling 1-800-288-1155.

Elk Season

Wildlife Management Unit	Resident – Open Season
57, 58, 60-62, 63A	September 19 to October 2

Note: There is no open season for non-residents. Elk tags are valid for Harvest Areas, which are areas smaller than Wildlife Management Units. Hunt codes for Harvest Areas are provided in this section (p.76).

Elk Hunting Requirements

Anyone wishing to hunt elk in Ontario must have the following:

- Outdoors Card,
- Elk Licence listed on your Licence Summary,
- Elk Tag (for appropriate season, harvest area and type of elk) or be party hunting with a person who has a valid elk tag in accordance with the modified party hunting rules for elk, and
- Proof of firearm accreditation if you are hunting with a gun.

For a chance to hunt elk, a resident hunter must apply to the draw for a tag and pay the draw application fee. No refund of application fees is granted to an applicant who is unsuccessful in the draw.

Elk Hunting Regulations

Tagging and Transporting

See the Tags section (p.19) for details on tagging and transporting. Additional information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting

See the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including elk, may only be hunted with a firearm (this includes bows). Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting elk are found in the General Regulations section (p.28).

Modified Party Hunting for Elk

Party hunting rules are listed in the General Regulations section (p.32). Additional party hunting rules apply for elk, which include:

- A person may only party hunt with the holder of an elk tag if they are part of the tag holder's hunting group, with the validation number listed on their licence. Hunters wishing to party hunt for elk must apply to the elk draw as a group and list all members on the same application.
- Party hunting for elk is limited to a maximum of four hunters (including the tag holder, but not including apprentice hunters).
- Multiple parties may not hunt cooperatively.

Dogs

Dogs may not be used to hunt elk. Dogs may be used to track an elk that has been wounded during a lawful hunt. See the General Regulations section (p.33) for details.

Elk Hunting on Private Property

If you wish to hunt elk on private land, you must carry your valid elk licence and the written consent of the landowner on the form provided by the NDMNRF. Forms are available for download online at ontario.ca/page/apply-hunt-elk.

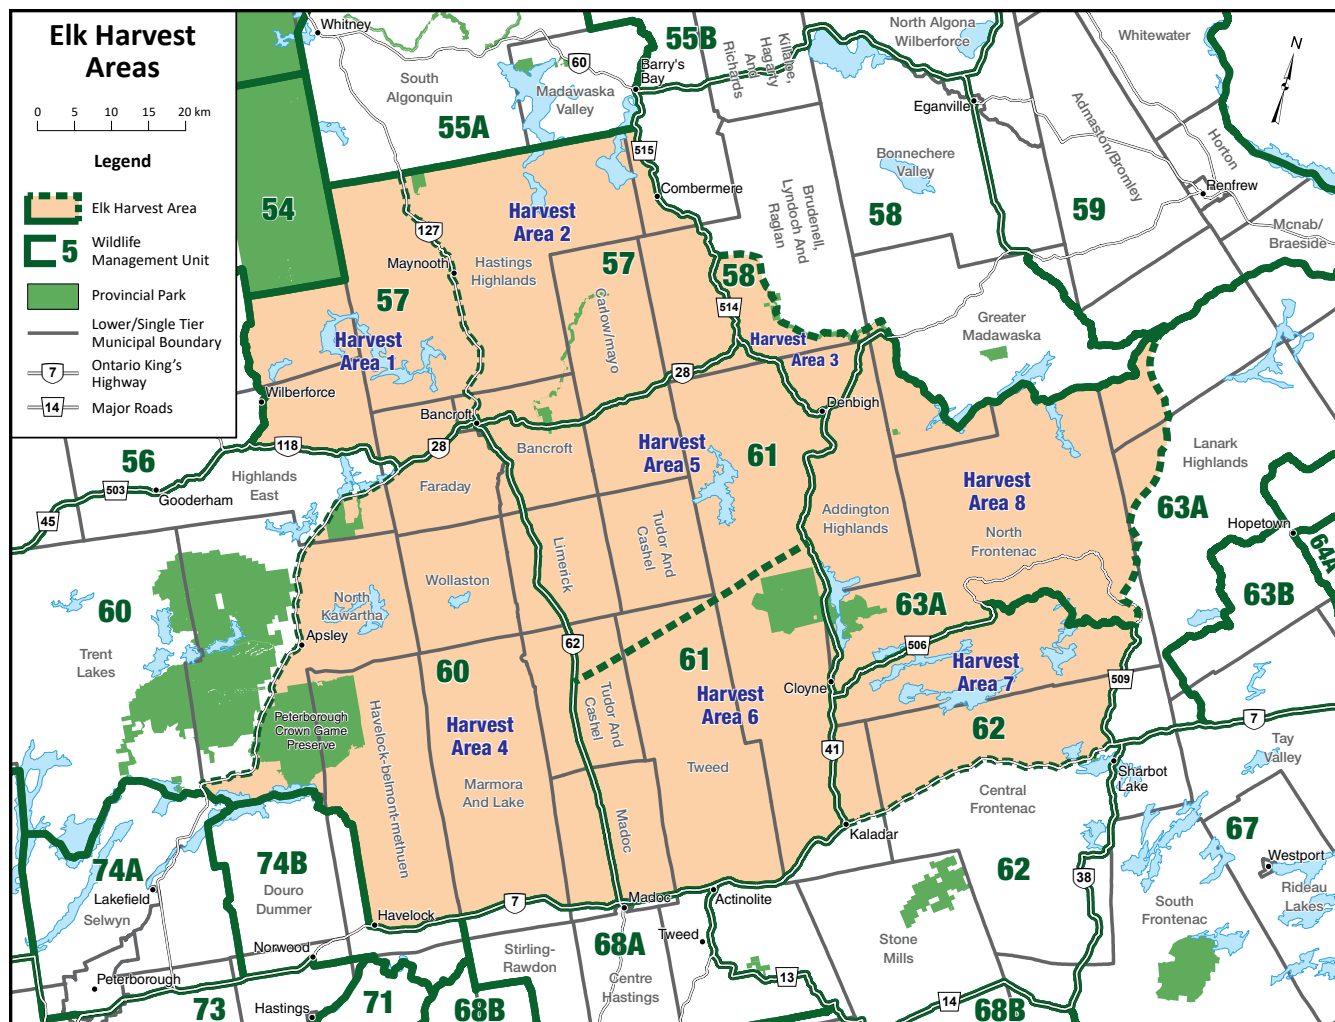

The Natural Choice

We love Ontario and we love the natural beauty of the wood grown here. That's why you will only see our logo on items that are grown locally, sourced sustainably, and crafted with care. It's the natural choice.

Harvest Areas, Hunt Codes and Tag Quotas for Elk Draw

For the purposes of harvest management, elk tags are valid for areas smaller than a WMU, referred to as Harvest Areas. For a chance to hunt elk, you must apply to the elk draw for a tag and pay the draw application fee. Applicants cannot select a bull or cow tag type; these will be randomly assigned. For further instructions on how to apply to the elk draw, see the How to Apply to Hunt Big Game section (p.38).

Note: Hunters who are successful in the elk draw and are issued an elk tag are not eligible to receive another elk tag in their name for five years, but may continue to be listed as a member of a group and party hunt for elk during this time.

Harvest Area 1: The part of WMU 57 west of a line formed by highway 62 south of Maynooth and highway 127 north of Maynooth.

- Hunt Code: 100
- Bull Tag Quota: 1
- Cow Tag Quota: 1

Harvest Area 2: The part of WMU 57 east of a line formed by highway 62 south of Maynooth and highway 127 north of Maynooth.

- Hunt Code: 101
- Bull Tag Quota: 2
- Cow Tag Quota: 2

Harvest Area 3: The part of WMU 58 south and west of the Madawaska River.

- Hunt Code: 110
- Bull Tag Quota: 1
- Cow Tag Quota: 1

Harvest Area 4: The part of WMU 60 east of highway 28.

- Hunt Code: 120
- Bull Tag Quota: 1
- Cow Tag Quota: 1

Harvest Area 5: The part of WMU 61 north of the northern edge of the Hydro One transmission line running through Tudor, Grimsthorpe and Effingham Townships.

- Hunt Code: 130
- Bull Tag Quota: 2
- Cow Tag Quota: 2

Harvest Area 6: The part of WMU 61 south of the northern edge of the Hydro One transmission line running through Tudor, Grimsthorpe and Effingham Townships.

- Hunt Code: 131
- Bull Tag Quota: 2
- Cow Tag Quota: 2

Harvest Area 7: The part of WMU 62 north of highway 7.

- Hunt Code: 140
- Bull Tag Quota: 1
- Cow Tag Quota: 1

Harvest Area 8: The part of WMU 63A west of the former K&P Railway line.

- Hunt Code: 150
- Bull Tag Quota: 1
- Cow Tag Quota: 1

Last Year's Elk Draw Summary

General Draw Statistics

- 22 total tags available
- 1,949 total applicants entered in the draw

First Choice Applications by Area

- Area 1, WMU 57: 90
- Area 2, WMU 57: 394
- Area 3, WMU 58: 81
- Area 4, WMU 60: 130
- Area 5, WMU 61: 674
- Area 6, WMU 61: 410
- Area 7, WMU 62: 94
- Area 8, WMU 63A: 76

Elk Tag Transfers

A transfer of an elk tag can only occur within a group of hunters that applied to the draw as a group. Groups are permitted one automatic transfer each year. You can complete automatic tag transfers yourself by accessing your account in the Fish and Wildlife Licensing Service from August 1 to 15 or by visiting a participating ServiceOntario. Beginning August 16, tag transfers can only be completed at a participating ServiceOntario with an application, and the return of the original elk tag if it has been printed from the Fish and Wildlife Licensing Service. After the season opens, the transfer of an elk tag will only be considered under specific circumstances, approved by the NDMNRF.

A Message from Ontario's Conservation Officers

It is an offence under the *Fish and Wildlife Conservation Act, 1997*, to shoot moose, deer or elk you are not authorized to hunt. Use binoculars to make sure of your target and confirm the area behind the game is safe.

Report Resource Abuse 1-877-847-7667

Black Bear

Black Bear Seasons

Wildlife Management Unit	Resident and Non-Resident - Open Season
1A, 1C, 1D, 2-6, 7A^, 7B, 8-10, 11A, 11B, 12-19, 21-50, 53-64, 66-69, 71-76	May 1 to June 15
82A*, 83, 84*	May 1 to May 7
1A, 1C, 1D, 2-6, 7A^, 7B, 8-10, 11A, 11B, 12-19, 21-45	August 15 to October 31
46, 47, 49, 50, 53, 64, 66, 67, 69, 71-76	September 6 to November 30
48, 54-63, 68	September 1 to November 30

^ only bows and muzzle-loading guns are permitted in WMU 7A.

* indicates bear hunting is only permitted in the geographic townships of Keppel and Sarawak in WMU 82A, the geographic township of Amabel in WMU 84.

Note: The shooting of cubs or female bears accompanied by a cub is not permitted during the spring season.

Black Bear Hunting Requirements

Anyone wishing to hunt black bear must have the following:

- Outdoors Card,
- Black Bear Licence listed on your Licence Summary,
- Black Bear Tag or be party hunting with a person who has a valid bear tag, and
- Proof of firearm accreditation if you are hunting with a gun.

In addition, non-residents are also required to have a black bear hunting validation certificate.

Note: A licensed trapper is permitted to hunt black bear under the authority of the Trapping Licence.

Black Bear Hunting Regulations

Tagging and Transporting

See the Tags section (p.19) for details on tagging and transporting. Black bear licences and tags are valid for both the spring or fall season.

Mandatory Hunter Reporting

See the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report. Resident hunters should note that the reporting requirements have changed.

Firearms

Big game, including black bears, may only be hunted with a firearm (includes bows). If you are hunting deer or moose at the same time you are hunting black bear, you must only use or carry (on your person, in a vehicle or boat) a firearm of the type permitted for deer or moose, as the case may be, at that time in that WMU. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting black bear are found in the General Regulations section (p.28).

Party Hunting for Black Bears

Party hunting is permitted during the bear season under a set of specific conditions. The list of conditions are listed in the General Regulations section (p.32).

Bait Placement

During the spring and fall black bear seasons, bait may not be placed for the purpose of bear hunting within:

- 500 metres of a dwelling, unless written permission is obtained from the owner of the dwelling
- 500 metres of a public building
- 30 metres of a right of way for public vehicular traffic or a sign posted/marked recreational trail that is established and maintained by an organization for the general public

Other Regulations

It is illegal to:

- possess a bear gallbladder that has been separated from the carcass
- let spoil or to abandon the flesh of any harvested game wildlife, including black bear, that is suitable for food
- hunt black bears within 400 metres of a waste disposal site, regardless of whether the land is Crown or private
- shoot or interfere with black bears in their dens, or damage or destroy their dens

As of 2021, anyone wanting to provide black bear hunting services (e.g. guiding or baiting) to resident hunters in a Bear Management Area (BMA) must possess a licence to provide black bear hunting services that allows them to provide services within that BMA.

Export and Shipping

See the General Regulations section (p.37) for information on import, export and shipping.

In some instances, both a Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and a provincial export permit are required. A resident or non-resident black bear hunter wishing to export a black bear out of Canada must contact Environment and Climate Change Canada (see p.94) to arrange to obtain a Canadian CITES export permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES listed species that you may harvest. Please allow up to 21 days to obtain a permit.

A Canadian CITES export permit is required for taxidermy mounts, black bear organs and other parts (i.e. baculum). **Note:** It is illegal to be in possession of a black bear gallbladder.

A CITES permit is not required for U.S. or Canadian resident black bear hunters transporting their black bear hunting trophy consisting of the hide, hide with paws and claws attached, skull and/or meat in a fresh, frozen or salted condition back to the U.S.A. or through the U.S.A. en route to another part of Canada at the conclusion of their hunt. The hunter must be accompanying the black bear in these cases.

In some countries and provinces, importation of black bears is regulated; requirements for importation should be determined by the exporter prior to shipment.

Second Black Bear Tags

WMU-specific black bear second tags may be available to resident bear hunters in WMUs where population levels permit. The second tag allows you to harvest a second black bear in the WMU specified on the tag. A second tag purchased in the spring can be used in either the spring or fall season. A black bear licence is required before a second tag can be purchased. A second tag can be used before the tag received with the licence is filled. These tags are available through the Fish and Wildlife Licensing Service. Second tags are available April 15, visit ontario.ca/huntingupdates or a participating ServiceOntario at that time for information on WMUs where second tags are available.

Non-Resident Hunting Regulations

As of 2021, non-residents who own property or who are hunting with an immediate relative will no longer be able to access special black bear hunting opportunities. All non-residents will be required to hunt through an operator licensed to provide black bear guiding and baiting services.

To hunt a black bear in Ontario non-residents must have an Outdoors Card, a non-resident black bear licence, a bear tag and a black bear hunting validation certificate. The non-resident black bear licence is valid in both the spring and fall seasons. The black bear hunting validation certificate can be obtained from a bear operator (operator of a tourist establishment, guide or air carrier) licensed to provide black bear hunting services to non-residents. All non-residents must hunt through a licensed bear operator and get a validation certificate from them. NDMNRF no longer issues validation certificates.

A non-resident hunter using a licensed bear operator must hunt only in the areas designated on the black bear hunting validation certificate received from the operator. These areas can include Crown or private land located within a BMA and private land located within a WMU designated on the operator's licence. The operator's licence does not permit the operator to provide bear hunting services on private land located within a BMA licensed to another operator. The operator must have the landowner's permission in order to provide black bear hunting services to clients on private land.

Black Bear Population Surveys

Barbed Wire Hair Trap Survey stations may be established in several WMUs and monitored weekly from mid-May to the end of June. If you encounter a survey station, for your safety and the integrity of the data, please do not disturb the station.

Wear hunter orange when hunting bear, unless you're in your stand.

Voluntary Black Bear Tooth Submission

All successful black bear hunters are encouraged to submit two premolar teeth from each black bear harvested to assist in determining the age structure of local bear populations. Along with the submitted teeth, please provide the following information:

1. sex of harvested bear, and
2. WMU within which the bear was harvested.

If you would like to receive an Ontario Bear Hunter Crest and the age of the bear harvested as a thank you, please include your Outdoors Card number, in addition to the items listed above.

Resident black bear hunters can submit teeth and the information listed above in the mail to:

Big Game Harvest Assessment Program
Natural Resources Information Section
Ministry of Northern Development, Mines,
Natural Resources and Forestry
300 Water Street, 2nd Floor, North Tower
Peterborough, ON K9J 3C7

Non-residents hunting with a licensed bear operator can submit teeth to their operator who will submit the teeth to the NDMNRF on your behalf.

Information derived from hunters' reports and hunter-submitted teeth contributes to assessments of the sustainability of black bear harvests and helps our scientists to address various questions about black bear ecology and management. Specifically, we use the hunter-reported sex and age estimated from the teeth to calculate the percentages of females, and of adult females, in the harvest. This information is used to help us better manage Ontario's black bear population.

Personal information is collected under the authority of the *Fish and Wildlife Conservation Act, 1997*, and will be used to fulfill your request for an Ontario Bear Hunter Crest. The crest will be mailed to the existing address on file (collected when the bear licence was purchased). Questions

about the collection and use of this personal information should be directed to: Licensing and Client Services Section, *Fish and Wildlife Services Branch, Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry, 300 Water Street, Peterborough, Ontario, K9J 8M5*, at 1-800-387-7011.

How to Extract Teeth

The first premolar is a small, single-rooted peg-like tooth located just behind the canines. Premolar teeth are most easily extracted shortly after the animal has been killed while the jaw is still pliable. Care should be taken when extracting the tooth to ensure that the root is not broken. To remove the tooth, push the blade of a knife down along all sides of the tooth between it and the gum. Gently loosen the tooth by rocking it back and forth using the canine for leverage, then carefully remove the tooth using pliers. Avoid cleaning teeth by scraping or boiling as it limits the ability to obtain the necessary data.

Aging Premolars

To age a tooth, a thin section is taken from the root of each tooth. The section is then stained to make it easy to see the rings of the tooth. Just like rings in a tree, the rings visible on the root of the tooth can be counted to indicate the age of the bear.

Wild Turkey

Spring Wild Turkey Season – Shotgun or Bow

Wildlife Management Unit	Resident and Non-Resident - Open Season	Bag Limit
36, 42, 45, 46-50, 53-65, 66A, 67-82, 83A, 84-95	April 25 to May 31	One bearded turkey, per tag

Note: A hunter may purchase a maximum of two spring wild turkey tags (only valid for bearded turkey). Two bearded wild turkeys may not be taken on the same day. Turkey hunting during the spring season is restricted to 1/2 hour before sunrise to 7:00 p.m.

Fall Wild Turkey Season – Shotgun or Bow

Wildlife Management Unit	Resident and Non-Resident - Open Season	Bag Limit
59, 60, 63, 64, 65, 66A, 67-70, 72-78, 80-82, 84-87, 89-94	October 11 to October 23	One wild turkey

Fall Wild Turkey Season – Bow

Wildlife Management Unit	Resident and Non-Resident - Open Season	Bag Limit
59, 60, 63, 64, 65, 66A, 67-70, 72-78, 80-82, 84-87, 89-94	October 1 to October 31	One wild turkey

Note: A hunter may only purchase one fall wild turkey tag (valid for either a male or female) and may only harvest one turkey during the fall seasons.

Wild Turkey

Turkey Hunting Requirements

Anyone wishing to hunt wild turkeys must have the following:

- Outdoors Card,
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card,
- Wild Turkey Tag (for the appropriate spring/fall season), and
- Proof of firearm accreditation if you are hunting with a gun.

NEW

Fall Wild Turkey Seasons

The ministry has added seven new fall turkey seasons (WMUs 60, 63, 69, 70, 74, 75 and 86). See the Fall Wild Turkey Season tables and their note (p.82) for 2022 season dates and associated regulations.

Wild Turkey Hunting Regulations

Tagging and Transporting

Up to two spring tags may be purchased per hunter. Two birds may not be taken on the same day. Only one fall tag is permitted per hunter.

See the Tags section (p.19) for details on tagging and transporting. Information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting

See the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Wild turkeys may be hunted using shotguns (including muzzle-loading shotguns) or bows. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting wild turkeys are found in the General Regulations section (p.28).

Other Regulations

Party hunting is not permitted for wild turkey. You are permitted to call wild turkeys for another hunter after filling your own tag(s), but you must not be in possession of a firearm when doing so. It is illegal to use live decoys or electronic calls while wild turkey hunting in Ontario.

It is illegal to hunt wild turkeys within 400 metres (437 yards) of any place where bait has been deposited unless the place has been free of bait for at least seven days. Bait means corn, wheat, oats, other grain, pulse, any other feed that may attract wild turkey or any imitation of such feed. Standing crops, crops stacked in accordance with normal farming practices and grain scattered as a result of normal farming operations are not considered bait.

Key Safety Reminders for Wild Turkey Hunting

- Avoid wearing red, white or blue colours.
- Make sure any decoy or harvested turkey is fully concealed.
- When choosing a spot to hunt, select a solid background that is wider than your shoulders and taller than the top of your head.
- It is not safe to stalk a wild turkey - it might be another hunter calling or you might be mistaken for a wild turkey yourself.
- Using a gobble call can be unsafe as other hunters may mistake you for a wild turkey.
- Alert other hunters by yelling out in a loud, clear voice. DO NOT wave or make turkey sounds.
- Be sure of your target and beyond.

Wolf and Coyote

Wolf and Coyote Seasons

Wildlife Management Unit	Resident and Non-Resident - Open Season	Tag Requirement
1A, 1C, 1D, 2-10, 11A, 11B, 12-41, 42*, 46, 47, 48*, 49, 50*, 53A*, 53B, 54*, 55*, 56*, 57*, 58*	September 15 to March 31	2022 Wolf/Coyote Tag (September 15 to December 31) 2023 Wolf/Coyote Tag (January 1 to March 31)
43-45, 59, 60*, 61-74, 75*, 76-95	All year	None

* indicates there are geographic townships where the wolf/coyote season is closed, which include: Airy, Alice, Allen, Anson, Anstruther, Attlee, Ballantyne, Bevin, Boulter, Boyd, Bruton, Burleigh, Burns, Burwash, Butt, Caen, Calvin, Cameron, Cardiff, Carlyle, Cavendish, Chandos, Chisholm, Clancy, Clara, Clyde, Cox, Curtin, Dalton, Dickens, Dieppe, Digby, Dudley, Eden, Eyre, Finlayson, Foster, Franklin, Fraser, Goschen, Hagarty, Halifax, Hansen, Harburn, Harcourt, Harvey, Havelock, Head, Herschel, Humboldt, Killarney, Kilpatrick, Lauder, Laura, Livingstone, Longford, Lutterworth, Maria, McClintock, McClure, McCraney, McKay, Minden, Monmouth, Murchison, Papineau, Paxton, Petawawa, Richards, Rolph, Roosevelt, Ryde, Sabine, Sale, Secord, Servos, Sinclair, Struthers, Tilton, Truman, Waldie and Wylie.

Wolf and Coyote Hunting Requirements

Anyone wishing to hunt wolf or coyote must have the following:

- Outdoors Card,
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card,
- Wolf/Coyote Tag (in WMUs where a tag is required) valid for the current calendar year, and
- Proof of firearm accreditation if you are hunting with a gun.

Wolf and Coyote Hunting Regulations

Residents and non-residents may purchase a maximum of two wolf/coyote tags per calendar year. The tags may be purchased separately or at the same time.

It is illegal to hunt or trap wolf or coyote in the areas within and surrounding Algonquin Provincial Park, Killarney Provincial Park, Queen Elizabeth II Wildlands Provincial Park and Kawartha Highlands Provincial Park to help protect Algonquin wolf (formerly Eastern wolf).

See the wolf and coyote season table (p.84) for more details on these specific closures.

Generally, wolves and coyotes cannot be hunted in provincial parks or Crown Game Preserves.

Wolves and coyotes are considered furbearing mammals. It is illegal to abandon or otherwise allow the pelt of a furbearing mammal to spoil or be destroyed.

Tagging and Transporting

See the Tags section (p.19) for details on tagging and transporting.

The tag must remain attached to a wolf or coyote until the pelt has been skinned off the carcass and is being frozen or has been sent for tanning.

Mandatory Hunter Reporting

See the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

There are no special firearm restrictions, other than a maximum calibre restriction, when hunting only for wolf or coyote. You cannot carry or use a rifle of greater calibre than a .275-calibre rifle, except a muzzle-loading gun, in the geographic areas of Brant, Chatham-Kent, Durham, Elgin, Essex, Haldimand, Halton, Hamilton, Huron, Lambton, Middlesex, Niagara, Norfolk, Northumberland, Oxford, Peel, Perth, Toronto, Waterloo, Wellington or York. A person hunting for wolf or coyote while hunting for another species must also ensure they are not in possession of a firearm prohibited for hunting the other species. For example, see the Small Game and Furbearing Mammals section (p.91). For additional details on firearms, see the General Regulations section (p.28).

Party Hunting

Party hunting for wolves and coyotes is not permitted in areas where a tag is required.

See the General Regulations section (p.32) for a definition of party hunting. However, you may hunt co-operatively, meaning all hunters participating must have a valid tag and the hunter who harvests the animal must personally invalidate their tag in accordance with the tagging instructions.

Once you have used your tag, you may not continue to participate in the hunt, unless you possess a second tag. Once you have used both of your tags, you cannot hunt wolf/coyote until the following calendar year. It is illegal to use a wolf/coyote tag to tag a wolf or coyote taken by another hunter.

In areas where a tag is not required and there are no harvest limits, you may hunt co-operatively in a group without restrictions on the number of animals harvested or who can take them.

Royalty, Export, Shipping and Import

See the General Regulations section (p.37) for information on import, export and shipping. A royalty is payable to the province at the time that a person obtains an Export Licence for Furbearing Mammals or Their Pelts.

For information on possession of pelts during the closed season, see the Small Game and Furbearing Mammals section (p.93).

A Convention on the International Trade of Endangered Species (CITES) export permit is also required to export ALL wolves from Canada. Contact Environment and Climate Change Canada (see p.94) to arrange to obtain a Canadian CITES export permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES listed species that you may harvest. Please allow up to 21 days to obtain a permit.

In some countries and provinces, importation of wolves is regulated; requirements for importation should be determined by the exporter prior to shipment.

Wildlife Management Unit	Resident and Non-Resident - Open Season
1-50, 53-95	October 5 to January 31

Red Fox and Skunk Seasons

Wildlife Management Unit	Resident and Non-Resident - Open Season
1-35, 38-41	September 15 to the last day of February
36, 37, 42-50, 53-95	All year

Weasel Seasons

Wildlife Management Unit	Resident and Non-Resident - Open Season
1-50, 53-95	October 25 to the last day of February

Note: Arctic fox, raccoon, opossum, red fox, skunk, and weasel are considered furbearing mammals, which can be harvested under the authority of a small game licence. Generally, furbearing mammals may not be hunted in provincial parks and Crown Game Preserves.

It's Your Call

Your hunt of a lifetime can be ruined by the illegal act of just one poacher! Every year hunters locate the rotting carcasses of unlawfully shot and abandoned moose – these are moose that are lost to honest hunters and to the tourist industry that relies on healthy moose populations.

Protect your moose hunt – it's your call.

If you have any information about illegally shot and wasted moose, deer, or bear or any other crime, call Crime Stoppers at

1-800-222-8477

All calls to Crime Stoppers remain anonymous and you could be eligible for a cash reward.

This message is brought to you by:

Falconry Seasons and Limits

Falconry involves the use of trained raptors (birds of prey, such as red-tailed hawk) to hunt small game. All falconers must have a valid small game licence. A falconry licence is required to possess falconry birds. There are other requirements both for falconry birds and for non-indigenous falconry birds (e.g. leg bands, reporting). For more information, contact your local ministry district office.

Hunting with Falconry Birds season is from September 1 to March 31 for residents and non-residents.

Species	Wildlife Management Unit	Limits
Ruffed Grouse, Spruce Grouse	1-50, 53-67, 69B	Combined daily limit of 3 and possession limit of 15
Ruffed Grouse	68, 73-76, 82-84	Daily limit of 3 and possession limit of 15
Ruffed Grouse	69A, 70-72, 77-81, 85-95	Daily limit of 2 and possession limit of 6
Sharp-tailed Grouse	1-35, 38-41	Daily limit of 3 and possession limit of 15
Sharp-tailed Grouse	36, 37, 42-50, 53-67, 69B	Daily limit of 2 and possession limit of 6
Ptarmigan	1-4, 16-18, 24-27	Daily limit of 3 and possession limit of 15
Ring-necked Pheasant	1-50, 53-95	Daily limit of 2 and possession limit of 10
Gray (Hungarian) Partridge	36, 37, 42-50, 53-95	Daily limit of 2 and possession limit of 15
Cottontail and European Hare	36, 37, 42-50, 53-95	Daily limit of 5 Cottontail and 3 European Hare. Possession limit of 15 of each species.
Snowshoe (Varying) Hare	1-50, 53-67, 69B	Daily limit of 3 and possession limit of 15
Snowshoe (Varying) Hare	68, 69A, 70-95	Daily limit of 2 and possession limit of 6
Gray (Black) and Fox Squirrel	5-15, 19-23, 28-50, 53-95	Combined daily limit of 5 and possession limit of 15

Bullfrog Seasons

Wildlife Management Unit	Resident and Non-Resident - Open Season	Daily and Possession Limit
1-50, 53-59, 72B, 76-95	July 15 to October 15	10

Small Game and Furbearing Mammals

Small Game and Furbearing Mammal Hunting Requirements

Anyone wishing to hunt small game or furbearing mammals must have the following:

- Outdoors Card,
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card, and
- Proof of firearm accreditation if you are hunting with a gun.

A tag is required for wild turkey, and for wolf/coyote in select Wildlife Management Units (WMU). See the Wild Turkey and Wolf/Coyote sections for more information.

A municipal licence may also be required for hunting ring-necked pheasant, cottontail (rabbit) and hare in some municipalities in southwestern Ontario. Municipal licences can be obtained from the relevant municipal office. See the WMU maps for more information on where a municipal licence is required.

A falconry licence is also required to hunt with raptors native to Ontario.

Additional licensing requirements apply to migratory game birds. See page 92 and the Hunting Licence Information section (p.15) for more information.

Small Game and Furbearing Mammal Hunting Regulations

A small game licence is not valid in northern and some parts of central Ontario from June 16 to August 31. See WMU maps (p.10) for more information.

Firearms

If you are hunting small game in an area where there is an open season for deer, moose, elk or black bear, you may not possess or use a centre-fire rifle or shells loaded with ball or with shot larger than No. 2 shot (non-toxic equivalents include steel shot larger than triple BBB, or bismuth larger than double BB), unless you possess a valid licence to hunt big game (deer, moose, elk or black bear) during the relevant open season.

This restriction does not apply south of the French and Mattawa rivers during an open season for deer that is restricted to the use of bows, or to hunters with a valid small game licence who are hunting wolf or coyote during an open season for deer, moose, elk or black bear.

A person hunting small game may not carry or use a rifle of greater calibre than a .275-calibre rifle, except a muzzle-loading gun, in the geographic areas of Brant, Chatham-Kent, Durham, Elgin, Essex, Haldimand, Halton, Hamilton, Huron, Lambton, Middlesex, Niagara, Norfolk, Northumberland, Oxford, Peel, Perth, Toronto, Waterloo, Wellington or York. **Note:** It is illegal to hunt ring-necked pheasants with a rifle.

Game Bird Hunting Preserves

You may hunt ring-necked pheasant, northern bobwhite, wild turkey, gray (Hungarian) partridge and chukar throughout the year on a licensed game bird hunting preserve. **Note:** There are prohibitions on northern bobwhite and wild turkey in some areas. You must arrange with the owner/operator of the licensed game bird hunting preserve as to when you can hunt.

You are required to have a valid Outdoors Card, hunter accreditation (e.g. Licence Summary noting your accreditation) and proof of firearm accreditation if you are hunting with a gun. You will be required to present this documentation to the owner/operator of a licensed game bird hunting preserve before hunting.

Migratory Game Birds

Migratory game bird seasons are the responsibility of the federal government. The *Migratory Birds Convention Act, 1994* and its regulations govern hunting of migratory game birds.

You must have a federal Migratory Game Bird Hunting Permit (MGBHP), Wildlife Habitat Conservation Stamp, and an Ontario small game licence in order to hunt migratory game birds. This includes hunting with falconry birds. MGBHP and Wildlife Habitat Conservation Stamp are available for purchase at most post offices, or online at permis-permits.ec.gc.ca/en. Season dates and bag limits are announced mid-summer in the Migratory Birds Hunting Regulations Summary which can be found at canada.ca/en/environment-climate-change/services/migratory-game-bird-hunting/regulations-provincial-territorial-summaries/ontario.html.

It is illegal to hunt migratory birds within 400 m (437 yd.) of where bait has been deposited unless that place has been free of bait for at least seven days. It is also illegal to deposit bait in any place during the period beginning 14 days before the first day of the open season for that place and ending on the day immediately following the last day of the open season for that place for any hunted migratory game bird.

More information on migratory birds is available at the Canadian Wildlife Service website at canada.ca/en/services/environment/wildlife-plants-species/migratory-birds.html or at the Canadian Wildlife Service Ontario regional office located at 4905 Dufferin Street, Toronto, Ontario, M3H 5T4, (tel): 1-800-668-6767, or email ec.enviroinfo.ec@canada.ca.

Double-crested Cormorants

Double-crested cormorants may be hunted during their fall hunting season (p.87) in accordance with general small game licensing requirements, similar to other game bird species, subject to additional rules and requirements.

Cormorants can only be hunted using shotguns, including muzzle-loading shotguns, not larger than 10 gauge with non-toxic ammunition. You cannot use a shotgun loaded with a shell containing a single projectile.

Hunters are permitted to hunt double-crested cormorants from a stationary motorboat. This means the motorboat must not be in motion and the power to the motor must be turned off.

Hunters must have adequate means of retrieving any double-crested cormorant that is shot and must immediately retrieve the bird and include it in their bag limit. Should hunters choose not to use the birds they harvest, they must be retrieved and disposed of by either:

- Delivering it to an approved waste disposal site that permits the disposal of dead animals, or
- Delivering it to a disposal facility, or using the services of a licensed collector, under the *Disposal of Deadstock Regulation* (Ontario Regulation 105/09) (ontario.ca/laws/regulation/090105) made under the *Food Safety and Quality Act, 2001* (ontario.ca/laws/statute/01f20), or
- Burying it on private land owned by the hunter, or on private land occupied by the hunter with consent of the landowner.

All other relevant federal, provincial and municipal laws/rules related to hunting apply (for example trespassing, municipal discharge of firearms by-laws, federal firearm licensing requirements, restrictions on hunting in provincial parks).

Small Game and Furbearing Mammals

Possession of Furbearing Mammal Pelts during the Closed Season

Small game hunters who harvest furbearing mammals during the open season (including wolf and coyote) and have not sold or otherwise disposed of the pelts by the close of the season must obtain a Licence to Possess a Pelt in order to possess pelts during the closed season.

Contact your local NDMNRF district office to obtain a Licence to Possess a Pelt (available free of charge). It is illegal to abandon or otherwise allow the pelt of a furbearing mammal to spoil or be destroyed.

For more information on royalties and shipping of furbearing mammals or their pelts, see the General Regulations section (p.37).

Hunt Raccoon at Night

If you wish to hunt raccoons at night, you must be accompanied by a dog licensed for the purposes of hunting. Each dog participating in the hunt must be licensed. You can only use a rim-fire rifle. Raccoon night hunters must have their guns unloaded and encased while in a vehicle. A licensed night raccoon hunter may use a light if it is not shone from or attached to a vehicle or boat. Learn more at ontario.ca/page/hunt-raccoon-night.

Bullfrog Requirements

Bullfrogs may be taken for personal consumption under the authority of a valid sport or conservation fishing licence. No commercial harvest of bullfrogs is permitted. The only firearms permitted for harvesting bullfrogs are bows (e.g. compound, recurve, long or crossbow). A person may take bullfrogs at night without a firearm and may shine a light for that purpose.

Note: Generally, it is illegal to harvest frogs in provincial parks or Crown Game Preserves.

HAVE YOU SEEN A BADGER?

Badgers are secretive, solitary, and nomadic carnivores. A single badger may have hundreds of burrows in a home range up to 30 km across. Their burrows are about 10-12" wide and often mistaken for fox dens. You can help us learn more about them by reporting sightings of badgers and possible burrows to the Badger Hotline.

ServiceOntario Centres

Hunting and fishing licences, as well as a variety of permits, are available at participating ServiceOntario locations

To find the nearest participating ServiceOntario location, please visit ontario.ca/serviceontario or call 1-800-387-7011.

Fishing Licences – All Ontario, Canadian and Non-Resident licences and the Outdoors Card.

Hunting Licences – All Resident licences, Non-Resident licences, Outdoors Cards, replacement licence summaries and tags, Hunter Education Exam/Certificate submissions, Big Game Draw/Allocation entry.

Permits – Non-Resident Big Game Export Permits, Non-Resident Crown Land Camping Permits.

Authorized Licence Issuers

Ontario, Canadian and Non-Canadian Resident fishing and hunting licences and Outdoors Cards are also available at authorized licence issuers across the province. For the nearest location and services offered visit ontario.ca/licenceissuers or call 1-800-387-7011.

Environment and Climate Change Canada

CITES permits are available through ECCC.

Venison Stew

Served with roasted garlic, onions, carrots, squash, beets and mushrooms, this is a hearty and warm comforting dish for a chilly evening.

Preparation Time: 30 minutes
Roasting Time: 30 minutes
Slow-Cooker: 8-1/2 hours
Serves 8

2	Ontario Beets
1/2 cup (125 mL)	vegetable oil
8	cloves Ontario Garlic, minced
2	Ontario Onions, cut into 8 wedges
1	stalk celery, cut into 2-inch (5 cm) chunks
2	Ontario Carrots, cut into 1-1/2-inch (4 cm) chunks
2 cups (500 mL)	1-1/2-inch (4 cm) chunks peeled Ontario Butternut Squash
2 cups (500 mL)	small Ontario White Button Mushrooms
1	Ontario Greenhouse Sweet Yellow Pepper, cut into 1-1/2-inch (4 cm) chunks
2 lbs (1 kg)	Ontario Venison Meat, cut into 2-1/2-inch (6 cm) cubes
1/4 cup (50 mL)	potato starch
1 tbsp (15 mL)	salt
2 tsp (10 mL)	black pepper
1 tsp (5 mL)	each dehydrated minced onion and paprika
1/2 tsp (2 mL)	garlic powder
1 cup (250 mL)	beef broth
1/2 cup (125 mL)	Ontario Craft Beer
1 tbsp (15 mL)	Worcestershire sauce
1	bay leaf
1 tbsp (15 mL)	dried oregano leaves
1 tsp (5 mL)	dried thyme leaves

Nutritional Information:

1 Serving	
PROTEIN:	28 grams
FAT:	17 grams
CARBOHYDRATE:	19 grams
CALORIES:	343
FIBRE:	3 grams
SODIUM:	1060 mg

Peel beets and cut into 2-inch (5 cm) chunks. Place in medium roasting pan; toss with 2 tbsp (25 mL) of the vegetable oil; season with salt and pepper. Set aside.

In large roasting pan; place garlic, onions, carrots, squash, mushrooms and yellow pepper, drizzle with 3 tbsp (45 mL) of the vegetable oil; season with salt and pepper, toss.

Place both roasting pans in oven. Roast in 450°F (230°C) oven until vegetables are lightly browned but still firm, 20 to 30 minutes. Remove and set aside to cool slightly.

In large bowl, toss venison with potato starch, salt, pepper, minced onion, paprika and garlic powder.

In large skillet, heat remaining 3 tbsp (45 mL) of the vegetable oil over high heat. Working in small batches, add venison and cook until lightly browned on all sides, 1 to 2 minutes. Transfer to slow-cooker. Add broth, beer, Worcestershire sauce, bay leaf, oregano and thyme. Cover and cook on LOW until tender, about 8 hours. Add the roasted vegetables to slow-cooker and cook on LOW for 30 minutes to warm vegetables.
