ISSN 1925-3516 (PDF)

Every year across Ontario, many of us will gather with family and friends to take part in another hunt. It is a time where knowledge is passed down from generation to generation, stories are told and, most importantly, memories are made.

As the Minister of Natural Resources, I'm excited to kick off another year for Ontario hunters by sharing with you the Hunting Regulation Summary for 2026. This guide includes the most up to date information on the requirements for hunting in Ontario. So whether this is your first or 50th hunt, I encourage you to review this guide before you head out.

If you are new to hunting, one of the best ways to cut your teeth is through wild turkey hunting. Wild turkeys were reintroduced to Ontario in the 1980s and are one of the greatest success stories in the history of hunter-led conservation, demonstrating what can be achieved when hunters, conservation organizations and governments work together. Every year, nearly 50,000 people across Ontario

hunt wild turkey and there are plenty of opportunities to do so with a spring and fall hunt in a growing number of wildlife management units. It's for these reasons that turkey hunting is often considered a 'gateway' or entry into hunting, helping many build the skills and confidence needed for a lifetime of outdoor adventures.

As you head out this season, remember that protecting our natural resources is a shared responsibility. By harvesting responsibly and safeguarding the habitats Ontario wildlife depend on, we can ensure that future generations will have the same opportunities we do. Together, we can protect Ontario's hunting heritage and traditions for many more years to come.

Wishing you a safe, successful and memorable season.

A stylized, handwritten signature in black ink, consisting of several loops and a long horizontal stroke extending to the right.

The Honourable Mike Harris
Minister of Natural Resources

How to Use This Summary

This is a summary of information dealing with hunting licences and hunting laws in Ontario. This summary is neither a legal document nor a complete collection of the current regulations. It is meant to be a convenient reference only. For complete details, go to:

- A. *Fish and Wildlife Conservation Act, 1997*, and the regulations made under this Act;
- B. *Migratory Birds Convention Act, 1994* (Canada), and the Migratory Birds Regulations;
- C. *Endangered Species Act, 2007*, and the regulations made under this Act;
- D. *Species at Risk Act* (Canada), with regard to federally listed species that are threatened, endangered or extirpated and their critical habitat;
- E. *Invasive Species Act, 2015*, and the regulations made under this Act with regard to invasive wild pigs;
- F. *Trespass to Property Act*; and
- G. *Firearms Act* (Canada).

This summary is divided into a number of sections that provide information about hunting licences, licensing requirements and general hunting regulations. In addition, each game species or group of game species has a section in this summary. Each species section covers basic regulations on hunting the species, including open seasons and other relevant information. Open season dates are inclusive: all dates including the first and last dates stated in the summary are open. Wildlife Management Unit (WMU) boundaries are shown in the front portion of this summary. You can obtain more detailed WMU maps at ontario.ca/WMUMap.

Contact Us

Please contact the Natural Resources Information and Support Centre (NRISC) at 1-800-387-7011, Monday to Friday from 8:30 a.m. to 5:00 p.m. (ET) or by email at nrisc@ontario.ca.

About Our Cover

Hunting in Ontario is a treasured tradition that unites families, friends and communities, fostering a lasting connection to nature and wildlife. Among Ontario's diverse range of hunting options, wild turkey hunting is popular. It blends skill, challenge, and for many, it serves as the perfect introduction to a lifelong passion, welcoming them into the hunting community.

The accessibility of turkey hunting benefits all who enjoy hunting across the province. At its core, the experience creates cherished memories for both new and seasoned hunters—the peace of nature, the challenge of scouting and calling, and the thrill of witnessing a magnificent fan's approach.

This year's cover image, captured by Ontario photographer Ryan Hawkins, highlights one such incredible moment, uniquely experienced by tens of thousands of hunters each year—a turkey hunter turning to hear the call of a tom in the distance as he sets up his decoy for a morning hunt. Moments of connection with nature, like this one, bring us back to the present and seem to make time stand still.

Please respect all resource users.

Wild game is of central importance to Indigenous communities in Ontario. The practice of Indigenous hunting pre-dates the establishment of the province.

Although tools have evolved over time, hunting continues to play a significant role in the lives of Indigenous peoples, contributing to the dietary, social, cultural and economic needs of communities in Ontario.

Indigenous communities have constitutionally protected rights to hunt in Ontario. The Ministry of Natural Resources recognizes and respects these rights, which may include hunting for food, social or ceremonial purposes. These rights are fundamentally different than the privileges given to licensed hunters. For example, Indigenous people may hunt with different methods or at different times.

Just as the ministry respects these rights, we ask that licensed hunters do the same.

Important Messages for Hunters

Occasionally, additional information for hunters becomes available after the Hunting Regulations Summary is printed. For more information, please go to ontario.ca/HuntingUpdates.

**Send us bear teeth
and we'll send you a**

Bear Hunter Crest!

Help MNR manage black bear populations by sending the premolars from a harvested black bear.

Learn more on p.81.

Ontario

Invasive Wild Pigs

Under the *Invasive Species Act, 2015* it is illegal to hunt pigs in Ontario.

Any pig outside of a fence is a wild pig. Hunting wild pigs is not an effective approach to control their spread. When they are hunted, they flee into new areas and learn to avoid humans. They are quick to reproduce, and populations are known to rebound rapidly.

Given the knowledge that hunters have, and time spent outdoors across the province, the ministry is seeking your help and expertise to report wild pig sightings. The ministry assesses all wild pig reports, and where appropriate, uses a coordinated approach to prevent their establishment in the province.

Visit ontario.ca/WildPigs to learn more about reporting wild pig sightings, the rules and what the province is doing to actively address the threat of invasive wild pigs.

***New* Human Health and Hunting**

Wildlife can carry diseases that can infect humans, including avian influenza and the virus that causes COVID-19. Additionally, Ontario is experiencing an increase in the areas where ticks that may carry potentially serious infectious disease, such as Lyme disease, are found. Please go to the new Human Health and Hunting section (p.24) for more information.

***New* Hunter Reporting Penalties**

Hunter reporting penalties promote compliance and improve hunter reporting data. The 1-year prevent from purchase penalty has been eliminated for a second consecutive failure to report. Starting on July 1, 2026, a new financial surcharge will be in place for hunters who fail to report on consecutive occasions for the same species. Go to the Mandatory Hunter Reporting section (p.22) for more details.

Use or Possession of Natural Attractants

It is illegal to use or possess, for any purpose, any product containing the faeces, urine, blood, gland oil, saliva or other bodily fluids of any cervid including white-tailed deer, moose, elk and woodland caribou. Only synthetic (artificial) or plant-based products can be used. Please don't bring bait and feed from outside Ontario – you

What is the Fish and Wildlife Heritage Commission?

The Fish and Wildlife Heritage Commission (FWHC) consists of members representing all regions of Ontario that have a range of experience, knowledge and insight related to fishing, hunting and trapping activities in Ontario.

The FWHC has responsibilities to provide advice and make recommendations to the Minister related to the promotion of fish and wildlife activities and the operation of the Fish and Wildlife Special Purpose Account (SPA).

Ontario

Important Messages for Hunters

could unknowingly be importing Chronic Wasting Disease (CWD). Local sources are safer and benefit local farmers and business owners.

CWD Surveillance Program

MNR and hunters are working together to look out for Chronic Wasting Disease (CWD). We need your help! Go to p.49 for more information.

Why is monitoring important?

- Monitoring supports a rapid and aggressive response if CWD is detected

How do you benefit?

- Get your deer tested free of charge
- The first 500 hunters to submit a sample in each surveillance area receive a collectable crest
- Knowing you are helping to preserve hunting opportunities for years to come

What you need to know:

- Surveillance areas change from year to year based on CWD risk. Visit ontario.ca/CWD to find out more
- Having your deer tested does not affect your ability to consume the meat or have the head mounted

New Changes in 2027 to Moose Tag Allocation

Starting in 2027, Ontario's Moose Tag Allocation Process will change. The changes are expected to reduce unclaimed tags and help moose hunters hunt more often. The ministry will communicate details about the changes ahead of the 2027 allocation process. The current process remains in place for the 2026 season. Learn more at: ero.ontario.ca/notice/019-7813.

New Data Available Online

The annual hunter reporting infographic summaries for black bear, white-tailed deer, moose, elk, wolf/coyote and wild turkey that were located on pages 24 and 25 can be found online at ontario.ca/HunterReporting. Elk quotas and hunt codes can now only be found online at ontario.ca/ElkQuotas.

Escaped Deer or Elk and Wild Pigs

The Ministry of Natural Resources (MNR) wants to hear from you if you see an escaped deer, elk or any pig outside of a fence, or detect one in trail camera photos. These escaped animals pose a threat to native species. Please contact your local MNR work centre to report escaped deer or elk. Wild pig sightings should be reported to wildpigs@ontario.ca or 1-833-933-2355.

Ear Tags

If you harvest an animal that has an ear tag with the phone number 1-866-514-2327, this animal was chemically immobilized in the past using veterinary drugs. Health Canada has established recommended guidelines for consumption. Please call the above number for specific information on whether Health Canada would recommend that the meat be consumed.

Address, Name and Residency Changes

You must notify MNR of any address, name, residency or contact information change within 10 days of the change. You can update your address by accessing your account online at HuntAndFishOntario.com, or by calling the Natural Resources Information and Support Centre at 1-800-387-7011.

If you are hunting big game, be sure to carry:

- Outdoors Card
- Licence Summary listing the licence for the species you are hunting (printed or PDF saved to your charged mobile device)
- your valid tag for the species you are hunting (printed), or be party hunting with a person who has a printed tag
- proof of firearms accreditation (if you are hunting with a gun)

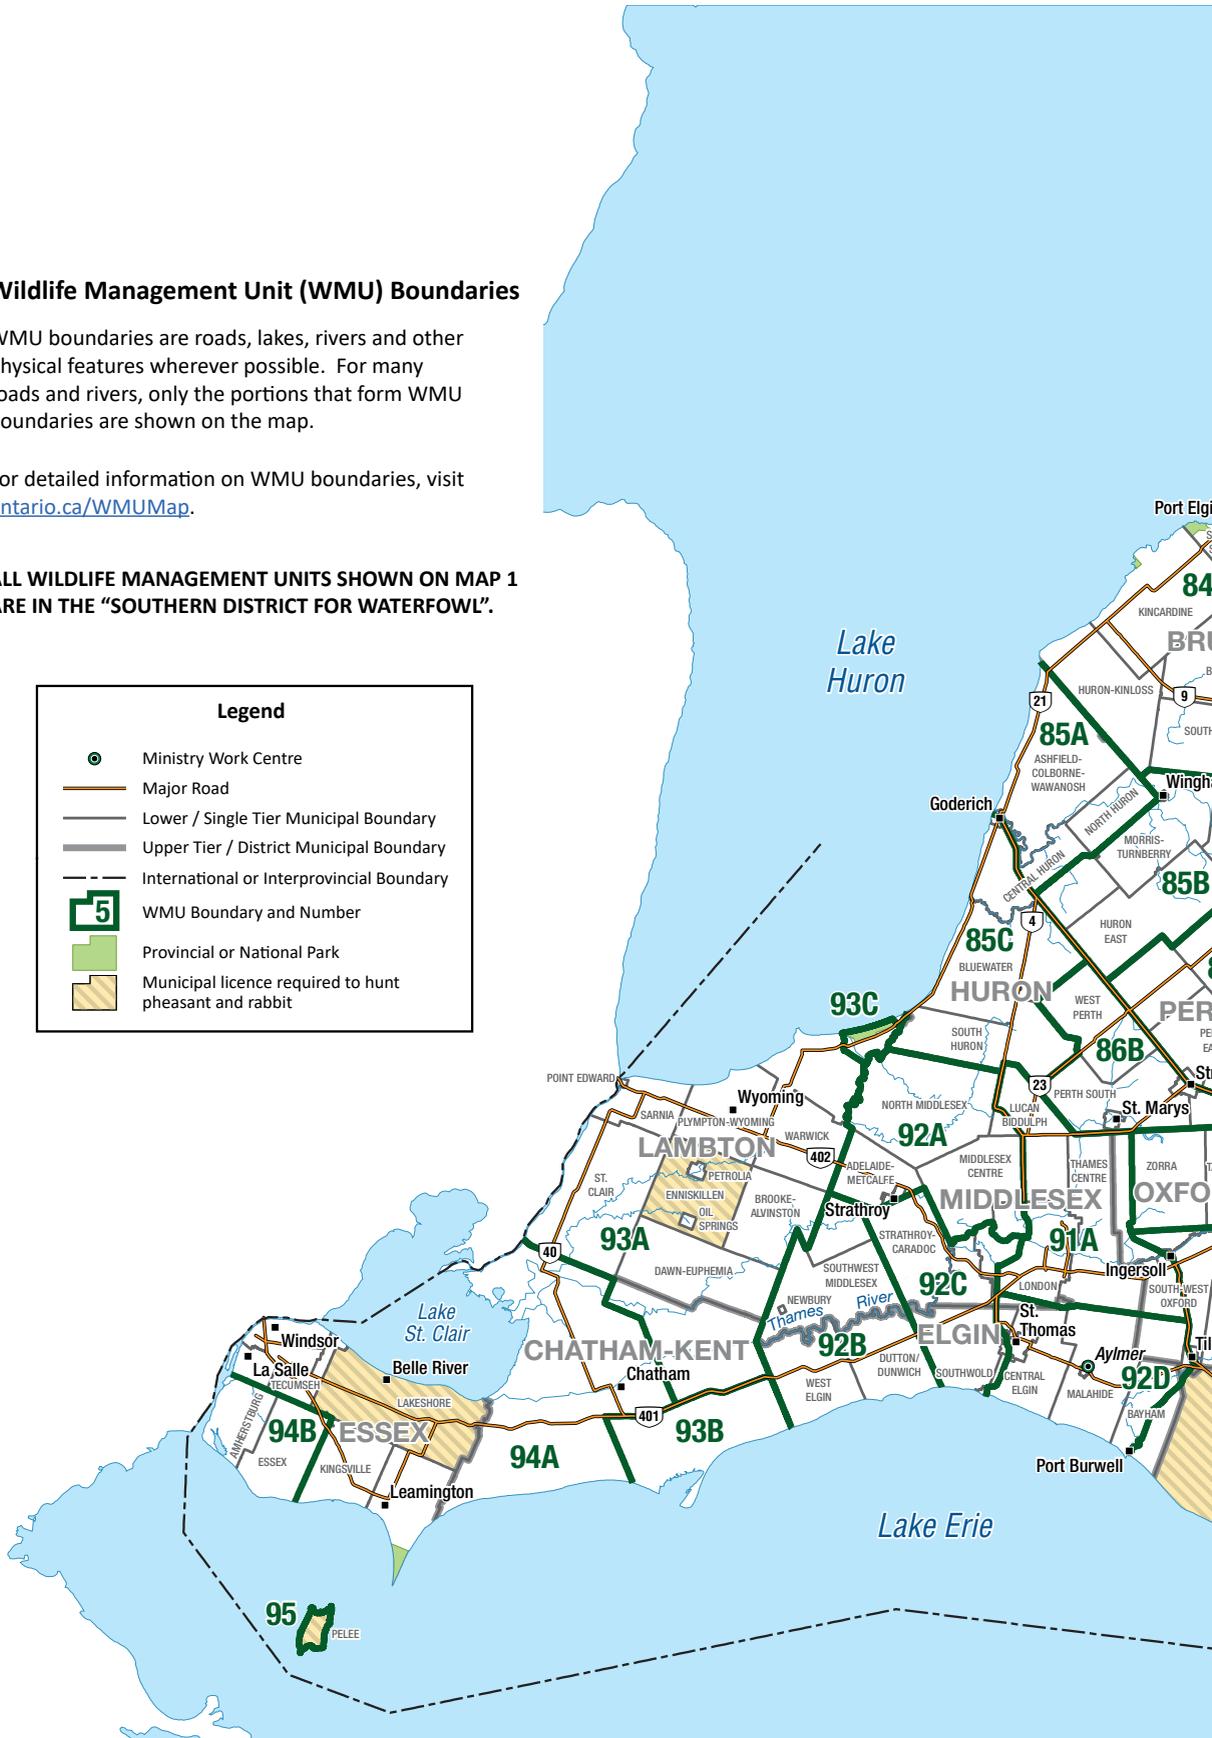

Wildlife Management Unit (WMU) Boundaries

WMU boundaries are roads, lakes, rivers and other physical features wherever possible. For many roads and rivers, only the portions that form WMU boundaries are shown on the map.

For detailed information on WMU boundaries, visit ontario.ca/WMUMap.

ALL WILDLIFE MANAGEMENT UNITS SHOWN ON MAP 1 ARE IN THE "SOUTHERN DISTRICT FOR WATERFOWL".

Legend	
	Ministry Work Centre
	Major Road
	Lower / Single Tier Municipal Boundary
	Upper Tier / District Municipal Boundary
	International or Interprovincial Boundary
	WMU Boundary and Number
	Provincial or National Park
	Municipal licence required to hunt pheasant and rabbit

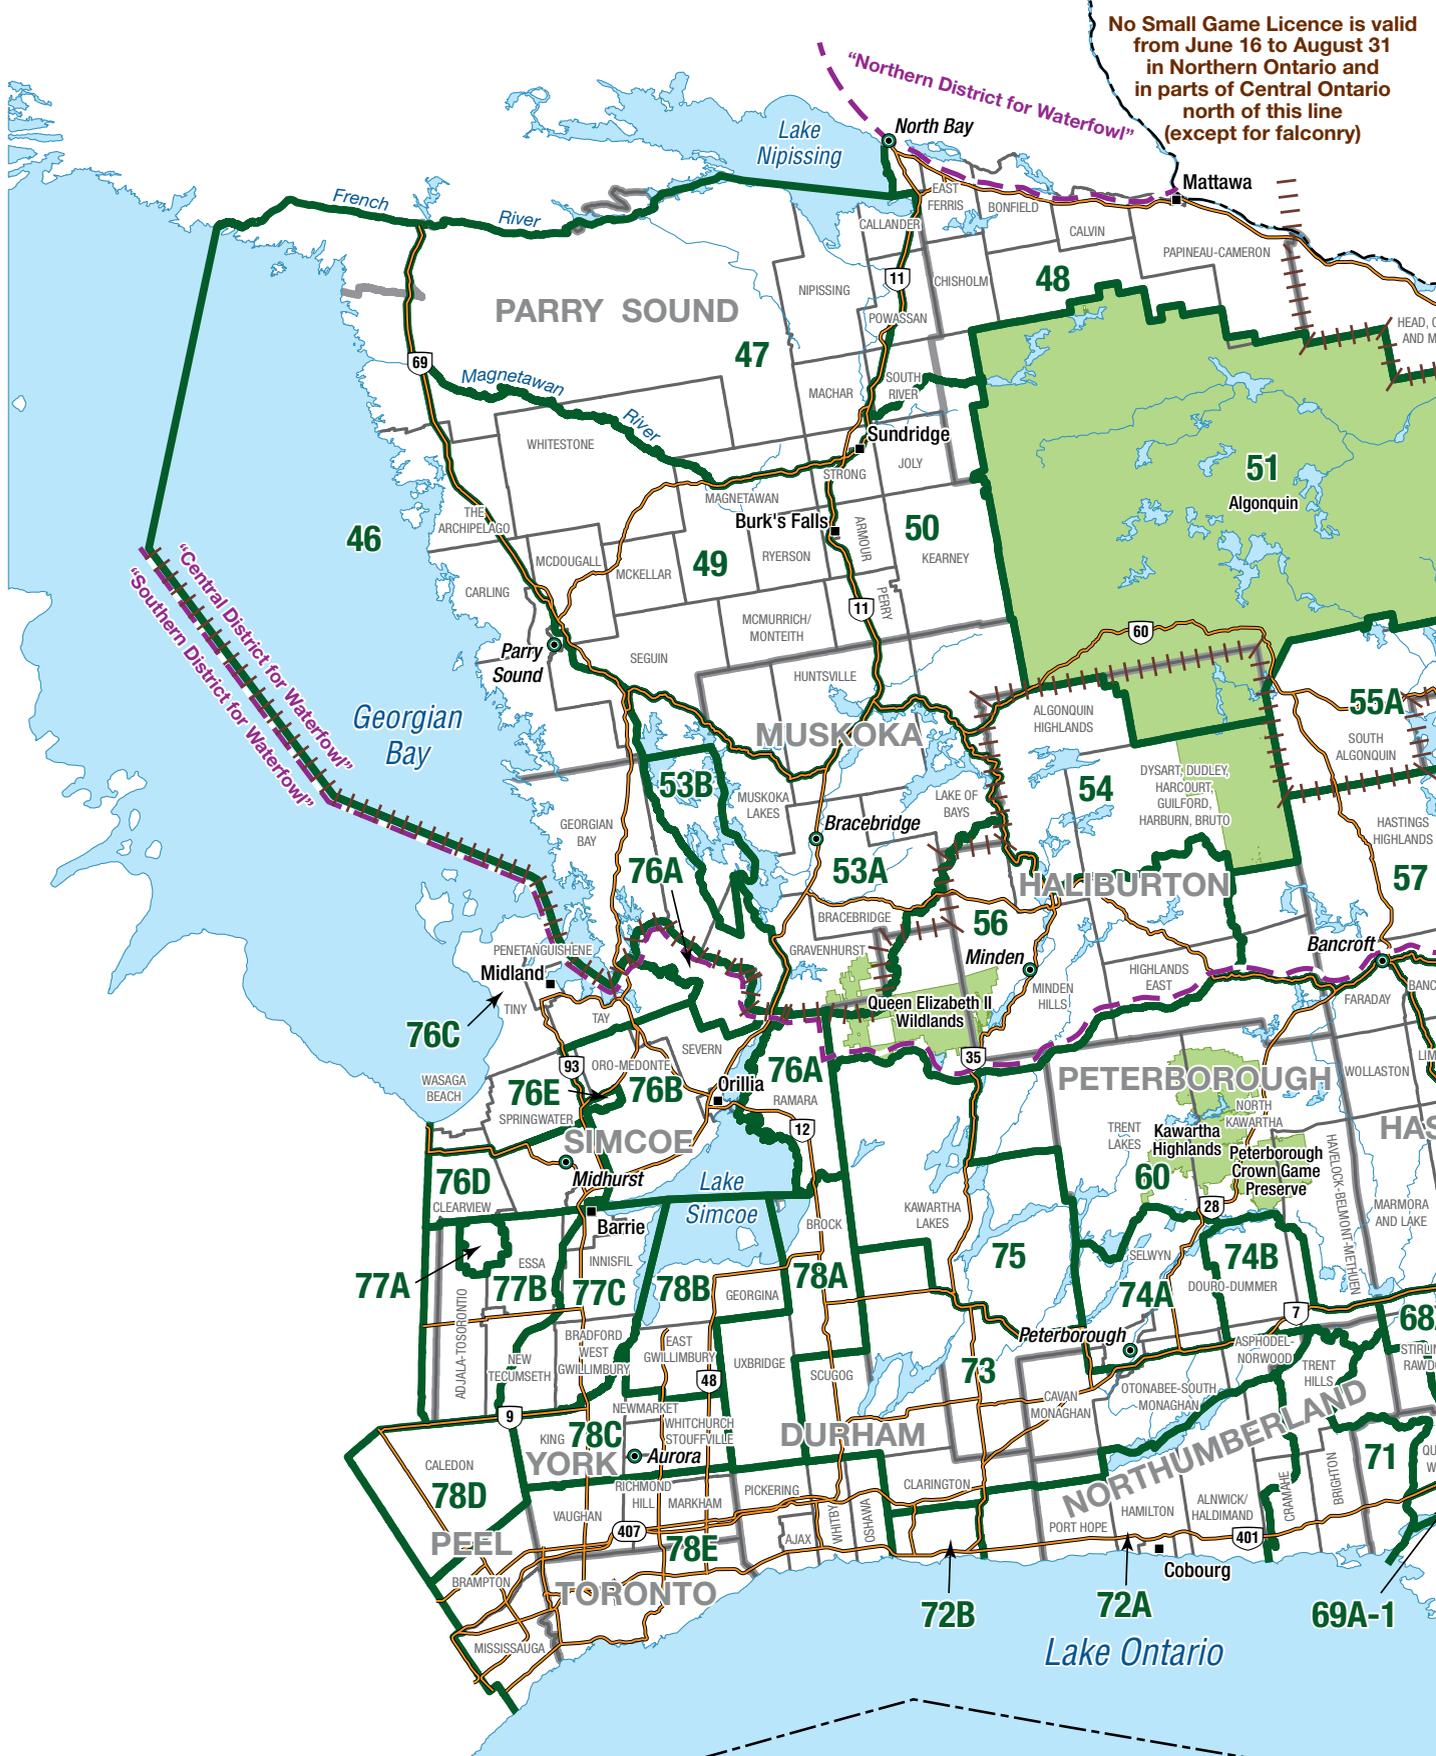

Wildlife Management Unit Map 1 – Southwestern Ontario

Wildlife Management Unit Map 2 – Southeastern Ontario

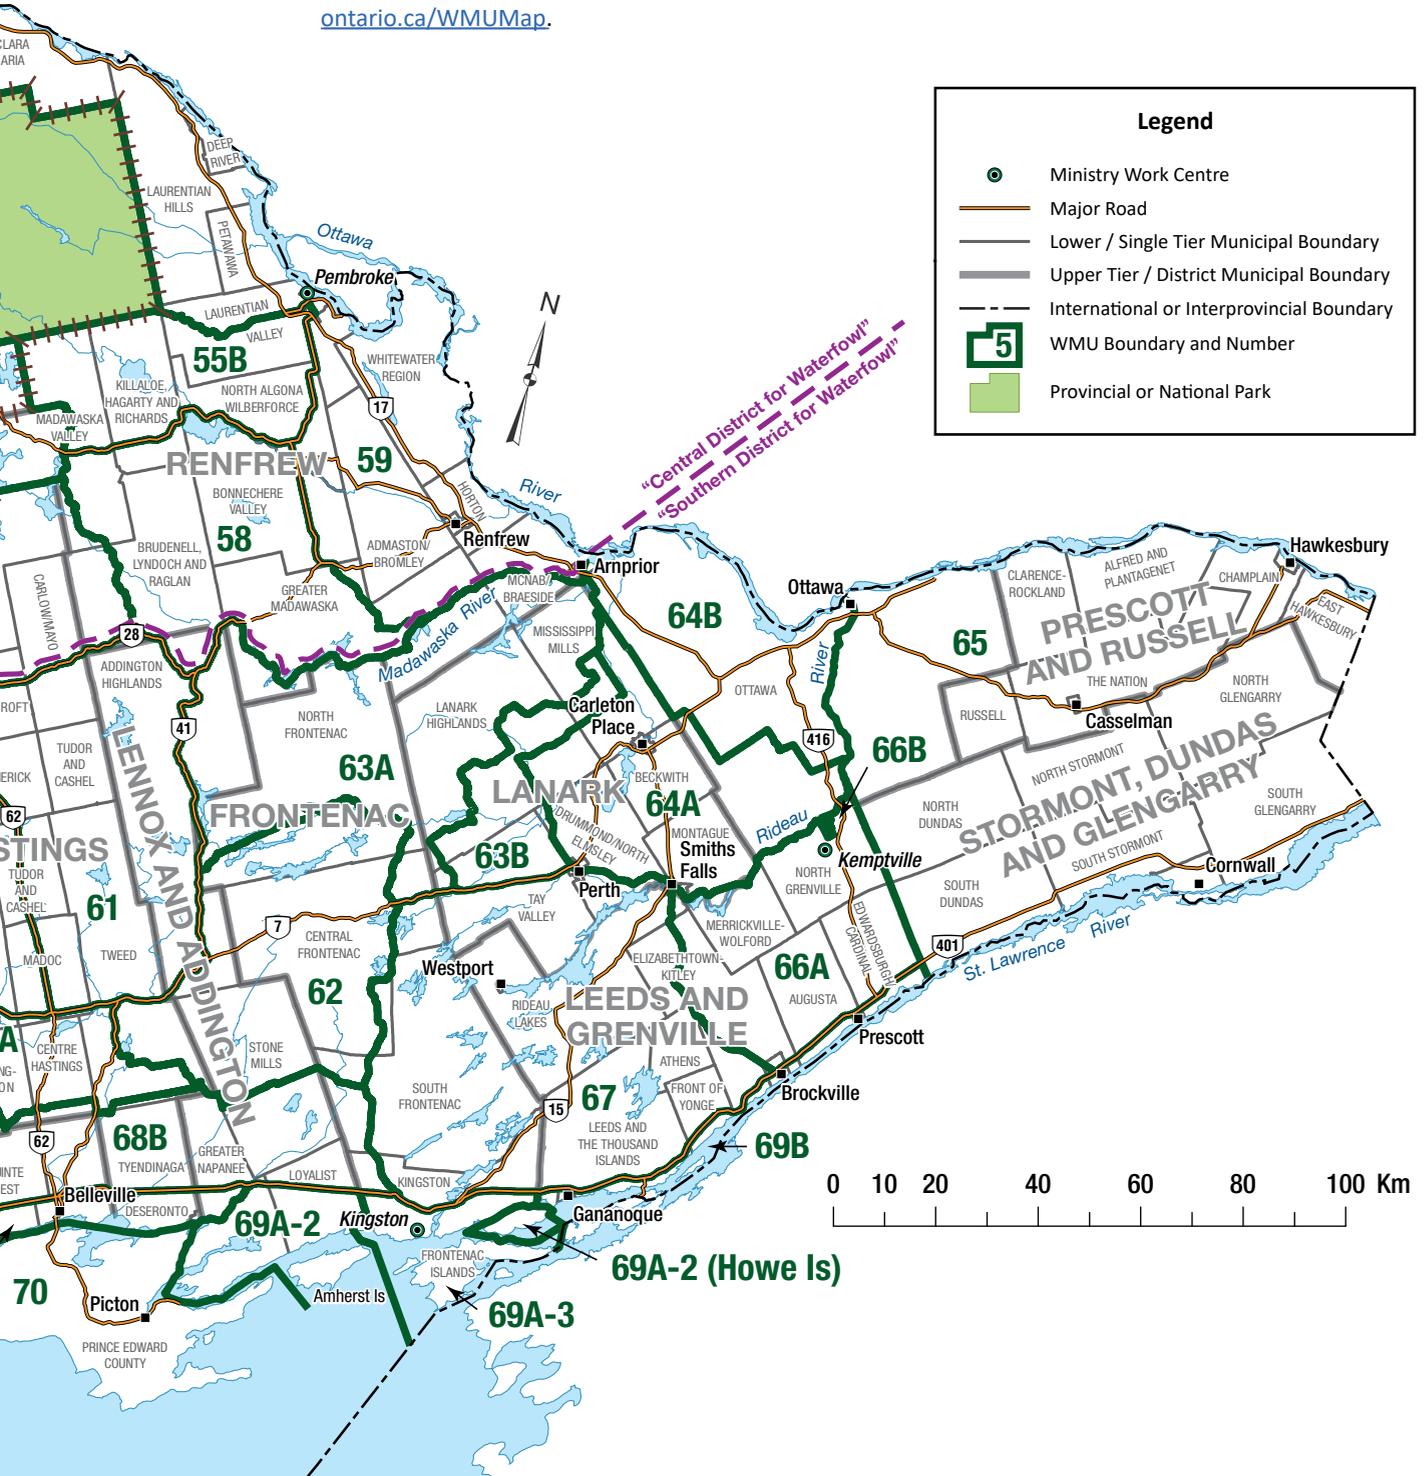

No Small Game Licence is valid from June 16 to August 31 in Northern Ontario and in parts of Central Ontario north of this line (except for falconry)

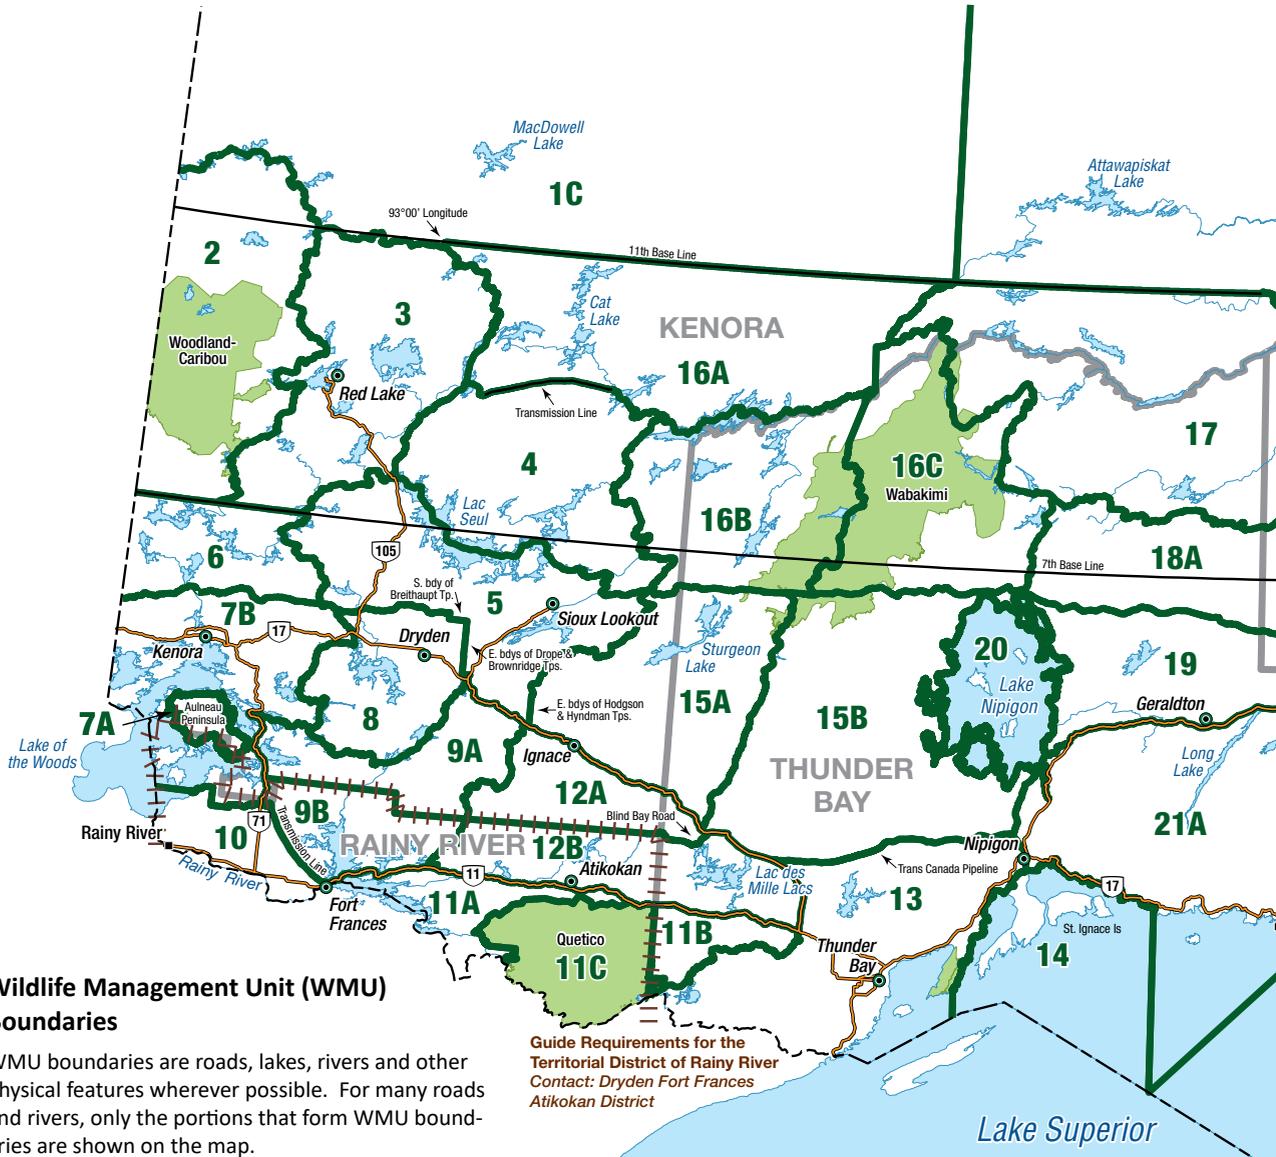

Wildlife Management Unit (WMU) Boundaries

WMU boundaries are roads, lakes, rivers and other physical features wherever possible. For many roads and rivers, only the portions that form WMU boundaries are shown on the map.

For detailed information on WMU boundaries, visit ontario.ca/WMUMap.

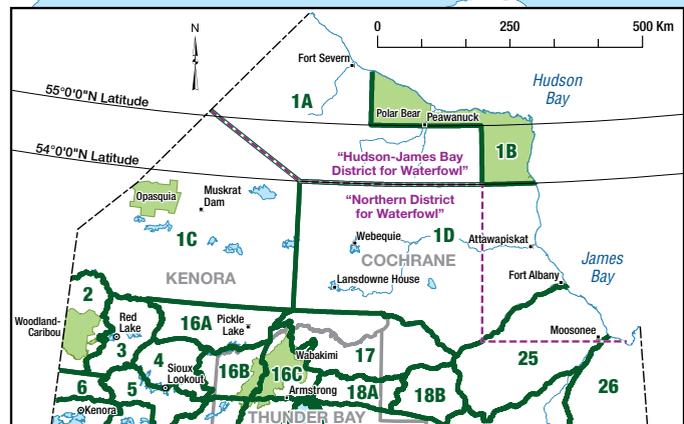

Wildlife Management Unit (WMU) Boundaries

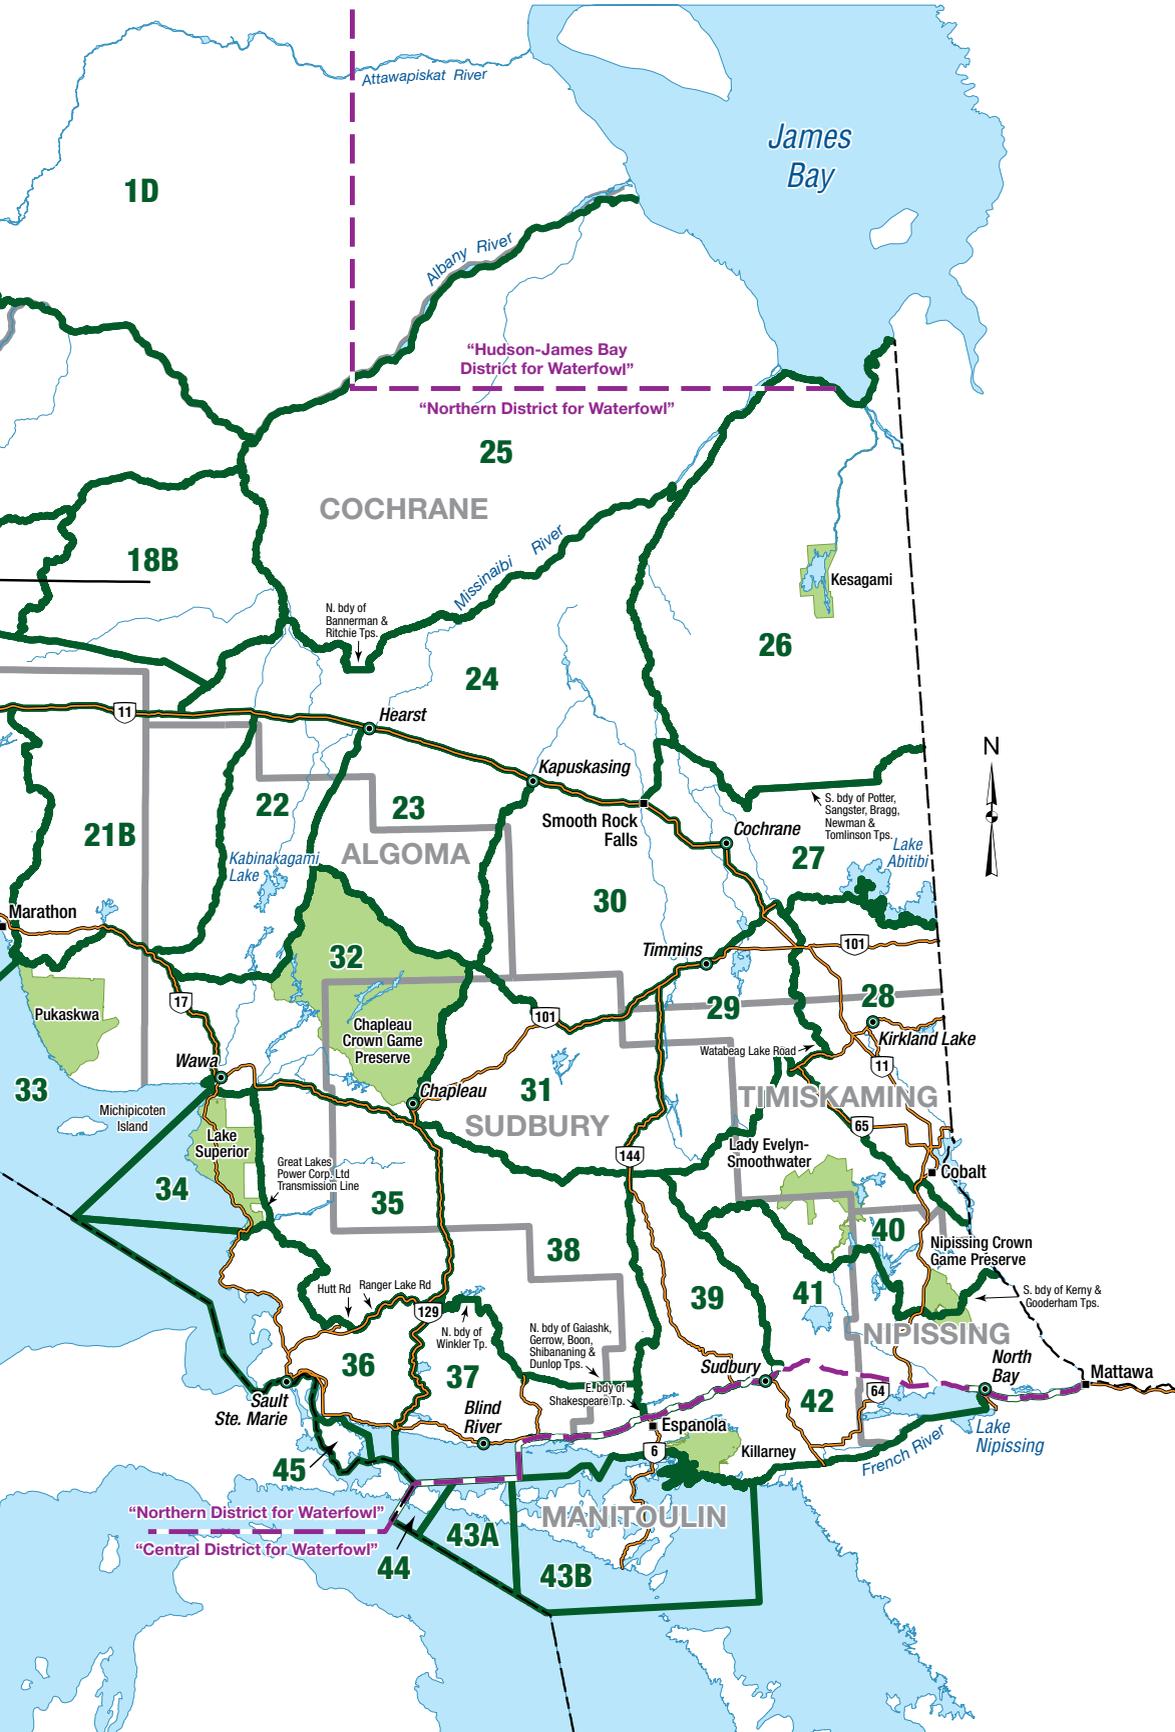

WMU boundaries are roads, lakes, rivers and other physical features wherever possible. For many roads and rivers, only the portions that form WMU boundaries are shown on the map.

For detailed information on WMU boundaries, visit ontario.ca/WMUMap.

Hunting Licence Information

Hunting Fees

All products with a fee are subject to 13% HST unless otherwise indicated.

Outdoors Card

- Ontario Outdoors Card \$8.57
(a valid Outdoors Card is required for all resident and non-resident hunters who wish to purchase hunting licences)

White-tailed Deer

- Resident Deer Licence \$43.86
- Farmer's Deer Licence \$25.14
- Resident Additional Deer Tag \$43.86
- Non-Resident Deer Licence \$240.81
- Non-Resident Additional Deer Tag \$240.81

Moose

- Application Fee \$15.00
- Resident Moose Licence \$35.29
- Calf Tag \$30.00
- Cow/Calf Tag \$150.00
- Bull Tag \$200.00
- Non-resident Moose Licence \$479.86

Elk

- Resident Elk Draw Application \$15.00
- Resident Elk Licence \$48.25

Black Bear

- Resident Bear Licence \$43.86
- Resident Second Bear Tag \$43.86
- Non-Resident Bear Licence \$240.81
- Licence to Provide Bear Hunting Services*
..... \$35.00

***Note:** Contact your local MNR work centre to purchase.

Wild Turkey

- Resident Turkey Tag (spring) \$26.33
- Resident Turkey Tag (fall) \$26.33
- Non-Resident Turkey Tag (spring) \$30.33
- Non-Resident Turkey Tag (fall) \$30.33

Wolf/Coyote

- Resident Wolf/Coyote Tag \$10.05
- Non-Resident Wolf/Coyote Tag \$255.57

Note: A Wolf/Coyote Tag is required in some Wildlife Management Units.

Small Game

- Resident Small Game Licence \$22.76
- Resident Small Game Licence (3-year) \$68.28
- Non-Resident Small Game Licence \$121.52
- Non-Resident Small Game Licence (3-year)
..... \$364.56

Falconry (HST exempt)

- Apprentice Falconry Licence \$19.81
- General Falconry Licence \$19.81
- Commercial Falconry Licence \$198.13

Note: Contact your local MNR work centre to apply.

Hunting Dogs

- Resident Hunting Dog Licence \$12.21
- Non-Resident Dog Licence \$15.21

Note: Required where dogs are permitted for hunting deer, moose, bear or raccoon.

Guides (HST exempt)

- Guide Licence \$7.68

Note: Required for guiding hunters in the territorial district of Rainy River and for guiding migratory bird hunters on Lake St. Clair. Residents may purchase online using the Fish and Wildlife Licensing Service at HuntAndFishOntario.com, or in person by visiting a participating ServiceOntario. Non-residents who are Canadian citizens must purchase through a participating ServiceOntario location.

Hunting Licence Information

Other Permits

Migratory Game Birds

To hunt migratory game birds (such as waterfowl, common snipe, woodcock and mourning dove) in Ontario, you must have: a federal Migratory Game Bird Hunting Permit and a Wildlife Habitat Conservation Stamp, as well as an Outdoors Card and Small Game Licence. These requirements are also necessary when hunting migratory game birds with a falconry bird (Falconry Licence required) or non-indigenous falconry bird. Migratory Game Bird Hunting Permits and Wildlife Habitat Conservation Stamps are available at any post office or online at permis-permits.ec.gc.ca/en.

Export Requirements

- Non-Resident Export Permit - \$35 (HST exempt)
 - Required for exporting moose, deer, elk and bear out of Ontario
- The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) Permit
 - Available through Environment and Climate Change Canada (p.94). Required for exporting wolf and black bear out of Canada, in some cases
- Export Licence for Furbearing Mammals and their Pelts
 - Required to export any furbearing mammal (including a wolf or coyote) or their pelt out of Ontario

Go to the General Regulations section (p.37) for more information on exporting requirements.

Licence to Possess a Pelt

No charge. Required to keep the pelt of a furbearing mammal after the hunting season closes if you're a licensed hunter who lawfully killed the animal. Go to the Small Game and Furbearing Mammal section (p.93) for more information or refer to the **Notice of Possession** section for information when acquiring a pelt or animal by means other than hunting.

Notice of Possession

No charge. May be required if you wish to keep a dead wild animal that was not hunted (such as roadkill, killed in protection of property). Visit: ontario.ca/KeepDeadWildAnimals for more information.

Important Licence Information

How To Buy Licences or Buy/Renew Outdoors Card

- **Online:** visit [HuntAndFishOntario.com](https://huntandfishontario.com) to use the Fish and Wildlife Licensing Service
 - **Phone:** call 1-800-288-1155 (toll-free) and use the automated telephone system
 - **In Person:** visit a participating ServiceOntario or licence issuer
- Note:** Online and phone services accept VISA, MasterCard, VISA Debit and Debit MasterCard

An Outdoors Card will be automatically mailed to you after you have completed your card purchase. The delivery time for an Outdoors Card is approximately 20 days.

You will be able to hunt while you wait for your Outdoors Card to arrive in the mail by carrying your Licence Summary, which will list your valid Outdoors Card.

If you've applied for an Outdoors Card and haven't received it within the stated timeframe or have additional questions related to your Outdoors Card, call 1-800-387-7011.

Outdoors Card Information

An Outdoors Card is a plastic, wallet-sized card issued by the Ministry of Natural Resources which you are required to carry while hunting. A valid Outdoors Card is required for all resident and non-resident hunters who wish to purchase hunting licences.

Outdoors Cards are valid for 3 calendar years, with the expiry date listed on the card. If you purchase a 3-year Small Game Licence or a 3-year Fishing Licence (or both) when you buy/renew your Outdoors Card, these 3-year licences will be printed on the back of your card and will expire with the card.

Hunting Licence Information

It is illegal for a hunter to hold more than one Outdoors Card with different numbers. It is also illegal to provide false information on an application to obtain an Outdoors Card or any other licence product.

Lost Outdoors Card

Please visit HuntAndFishOntario.com, participating ServiceOntario or licence issuer to obtain a duplicate.

Note: An administration fee will apply.

Hunter Accreditation Requirements

You must have successfully completed Ontario's Hunter Education Course (p.26) or an Ontario-recognized equivalent requirement (such as existing accreditation on record or documentation from a recognized jurisdiction) to be eligible to purchase hunting licences and hunt in Ontario.

Parental or guardian consent is required to obtain an Outdoors Card for any resident under 16 years old. Parental/guardian consent is provided by completing an attestation on the website or by attesting to the parental/guardian consent statement that a participating ServiceOntario or licence issuer representative will read aloud to you and enter into the Fish and Wildlife Licensing Service. Go to the Ontario Hunter Apprenticeship Safety Program section (p.27) for more information on apprentice hunters (12 to 14 year old residents).

Non-residents who are hunting in Ontario for the first time must be at least 16 years of age, and must provide proof of accreditation from their home jurisdiction, provided that it has hunter education requirements that are equivalent to Ontario's requirements. A list of jurisdictions with recognized equivalent education requirements can be found at ontario.ca/NonResidentHuntingLicence.

Plan ahead: Non-residents must submit an original or certified copy of acceptable hunting accreditation by:

- contacting the Natural Resources Information and Support Centre at 1-800-387-7011

(accreditation processed within 15 business days of receipt, allowing non-residents to buy products online before arriving in Ontario)

- visiting a participating ServiceOntario or licence issuer (allows non-residents to buy hunting products immediately)

Non-resident accreditation must be translated in writing into either English or French. Both the original and translated copy must be provided. Translations must be provided by a certified translator (confirmed by a seal or stamp showing the translator's membership number of a professional translation association in Canada or abroad). Go to ontario.ca/NonResidentHuntingLicence for more information.

Residency

An Ontario resident is a person whose primary residence is in Ontario and who has lived in Ontario for a period of at least 6 consecutive months during the 12 months immediately before applying for a licence. All other individuals are considered non-residents (some exceptions apply to active military and RCMP personnel who have been stationed in Ontario for a period of at least 1 month with appropriate documentation).

Report hunting injuries

The law requires you report to a conservation officer any hunting injury caused by the discharge of a firearm (including a bow) which requires treatment by a physician.

Call 1-877-847-7667.

Ontario

Licence Summary

Your Licence Summary is a document that lists all of your valid hunting and fishing licence products. An updated Licence Summary will be issued to you each time you purchase a new licence product. It may be carried as a paper copy or as a download on a mobile device (or both). Your Licence Summary must remain intact and readable at all times.

Report Resource Abuse / Signaler un abus des ressources: 1-877-847-7667
ontario.ca/outdoorscard | 1-800-387-7011 | ontario.ca/cartepleinair

Digital Copy: You can carry your Licence Summary in a digital format, such as on a mobile device. You can have a copy of your Licence Summary sent to your email address by accessing your account using the Fish and Wildlife Licensing Service at HuntAndFishOntario.com. If you choose to carry your Licence Summary on your mobile device, it must be in the PDF format provided to you from the Fish and Wildlife Licensing Service (a photograph or screenshot of your Licence Summary is not valid). You are responsible for ensuring that your device has battery power and is protected from the elements to be able to display it when and where requested by a conservation officer (unless you are also carrying a paper copy with you).

You must carry your Outdoors Card, your hunting licence (either listed on your paper or electronic Licence Summary or printed on the back of your Outdoors Card), and any relevant tag(s) with you while hunting.

Note: If you are hunting wild turkey or wolf/coyote (in a WMU where a tag is required) and your Small Game Licence is printed on the back of your Outdoors Card, you can simply carry your Outdoors Card and your relevant tag.

All hunting licences are valid for the year specified and expire on December 31 in the year in which they were issued unless otherwise noted. Licences are restricted to the relevant open season for hunting.

Transfer of Licences or Tags

It is illegal to transfer an Outdoors Card, licence, tag or any component of a licence to another person unless authorized to do so by MNR (such as an approved moose tag transfer). It is also illegal to use or possess an Outdoors Card, licence, tag or any component of a licence that was issued to someone else. Only the person who was issued the tag may possess the tag unless it has been invalidated (notched) and affixed to an animal.

Firearms Licence Requirement

Firearms in Canada are regulated by the *Firearms Act* and Part III of the *Criminal Code* – anyone in possession of a firearm on their own must have a valid federal firearms licence to possess it. Hunters should be aware of these requirements if hunting with a gun in Ontario.

If you are in possession of a gun (includes air and pellet guns) for the purpose of hunting in Ontario, you are required to carry proof of your firearms accreditation — this includes apprentice hunters (12 to 14 year old residents). You are not required to carry proof of firearms accreditation if you are hunting with a bow or crossbow in Ontario. Every gun hunter must carry one of the following: a valid Possession and Acquisition Licence (PAL), a valid Minor's Licence, or a copy of a Canadian Firearms Safety Course (CFSC) student report as official documentation showing successful completion of the CFSC. Under federal law, a person with only a CFSC student report (no licence) or an expired firearms licence must be under the direct and immediate supervision of a valid PAL holder. For non-residents, this could also include a valid Non-resident Customs Declaration Form (RCMP 5589) confirmed by a Canadian customs officer, or a valid temporary firearms borrowing licence for non-residents issued under the *Firearms Act* (Canada) by the Chief Firearms Office.

You are required to produce this documentation to a conservation officer upon request. **Note:** You may submit an application for a Possession and Acquisition Licence (PAL) up to 6 months before you turn 18 years old. Please ensure you plan ahead to avoid any delays.

Contact the Canadian Firearms Program at 1-800-731-4000 (or rcmp.ca/en/firearms) for information about the requirements for firearm ownership, supervision, licensing, storage and transportation.

Requirements for Indigenous Persons

Many Indigenous communities in Ontario hold Aboriginal or treaty rights to hunt. MNR is committed to respecting these constitutionally-protected rights. After conservation goals are met, Aboriginal and treaty rights to hunt take priority before allocation and management of the resource for other purposes.

Aboriginal rights to hunt stem from customs, practices or traditions that are integral to the distinctive culture of an Indigenous community. Treaty rights to hunt are reserved through treaties between the Crown and Indigenous peoples. Aboriginal and treaty rights are collectively held and are associated with an Indigenous community's traditional or treaty territory. These rights are not generic and different communities may hold different rights. Aboriginal and treaty rights to hunt can be exercised using modern means.

Members of Indigenous communities exercising an Aboriginal or treaty right generally do not require an Outdoors Card, Ontario hunting licence(s) and tag(s) when hunting for food, social or ceremonial purposes within their traditional or treaty territory. Indigenous individuals should be prepared to provide identification showing their community membership if requested by conservation officers. Members of Indigenous communities hunting outside of their traditional or treaty area must hold a valid hunting licence(s) and tag(s) and follow the corresponding regulations, or have written permission from a First Nation to hunt within their traditional or treaty territory (R v. Shipman et al., 2007).

Non-Indigenous people may accompany Indigenous people who are hunting, but may not help them to exercise their hunting rights. For example, a non-Indigenous person may not assist an Indigenous hunter by shooting their game, carrying a gun, searching for or flushing game. They can assist in the retrieval of game or transporting of lawfully harvested game while accompanying an Indigenous person.

Getting a Tag

A **tag** authorizes the tag holder to hunt a member of the species of game specified on the tag, subject to conditions specified on the tag. Only 1 animal may be harvested per tag. Tags must be carried in paper format. Tags cannot be carried or presented to a conservation officer on an electronic device. Tags are equipped with document security features to discourage fraudulent activities. **It is illegal to have multiple copies of a tag or validation certificate, or to alter, modify or counterfeit a tag or validation certificate, or to possess such a product.**

Tags are printed on regular paper and can be obtained:

- online through the Fish and Wildlife Licensing Service at HuntAndFishOntario.com and printed using a personal computer
- in person by visiting a participating ServiceOntario or a licence issuer

Hunters will be able to print most tags immediately at the time of purchase with the exception of Moose, Deer or Elk Tags which will be available for print starting on August 18.

Note: Any Controlled Deer Hunt Validation will appear on your Licence Summary on September 1 after the purchase of a Deer Licence. An Elk Licence is required before an Elk Tag can be printed.

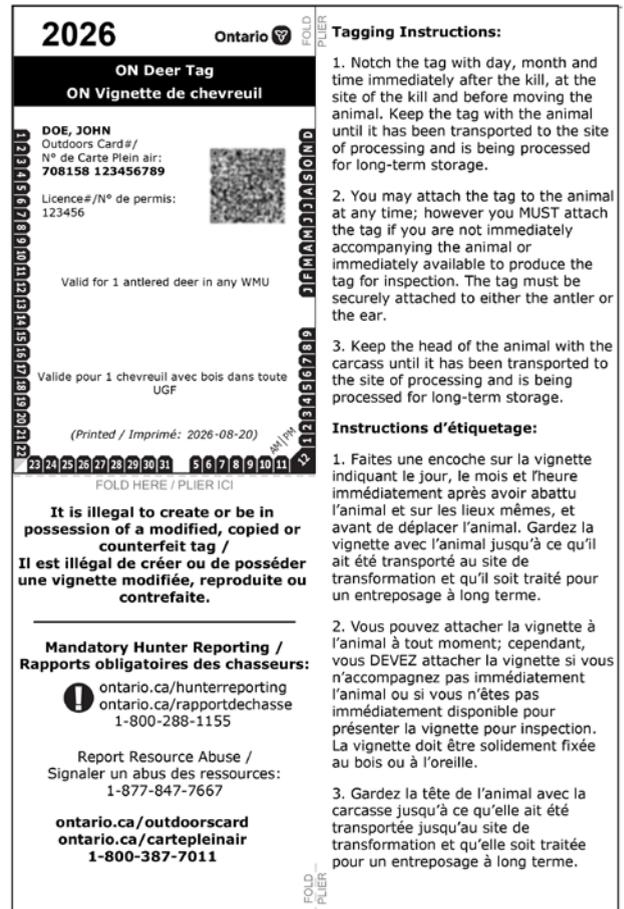

Tags can only be printed once. If a tag did not print or is lost, damaged, stolen and a replacement is necessary, you will be required to visit a participating ServiceOntario or licence issuer for a replacement. Damaged tags must be surrendered before a replacement tag will be issued. All replacements will be tracked in the Fish and Wildlife Licensing Service. An administration fee of \$10.50 is applied for any replacement tags.

It is illegal to apply for, purchase or possess more than 1 tag, unless specifically permitted (for example, Additional Deer Tag, second Bear Tag).

Note: The tag issued with your Deer, Bear and Elk Licence will not be listed on your Licence Summary.

Maintaining a Tag

Tags must remain intact and readable at all times. It is your responsibility to ensure paper tags are protected from the weather or other types of damage. There are products available to help ensure your tag is protected from damage (such as commercially available tag holders or resealable plastic bags).

Tagging Requirements

Specific tagging instructions will be provided with your tag. Make sure you carefully read and follow the tagging instructions that accompany your tag. A summary of the tagging requirements is provided below:

Notching: You must invalidate your tag by notching the day, month and time immediately after the kill, at the site of the kill and before moving the animal.

Attaching Your Tag: You are not required to attach the tag if you are both immediately accompanying the animal and immediately available to produce the tag for inspection. For example, the tag holder may carry the notched/invalidated tag in a pocket while bringing the harvested animal out of the bush, provided that the tag holder remains with the animal while it is being moved.

However, you **must** attach the tag if you are not immediately accompanying the animal or immediately available to produce the tag for inspection. For example, the tag holder must attach the tag if they leave the harvested animal at any time, including:

- transporting the animal in one vehicle while the tag holder is in another vehicle
- leaving the animal at camp while the tag holder goes out party hunting
- leaving the animal at a butcher for processing

Important: If you are unsure about whether or not to attach your tag, you should attach it.

Make sure to follow the instructions provided with the tag and shown in the table on p.21. Your tag should be accessible and visible for inspection purposes even when the tag is attached to the harvested animal.

The tag must remain on your person or attached to the animal (when required) until it has been transported to the site of processing and is being prepared for long-term storage. The animal is being prepared for long-term storage when it is being cut, wrapped and frozen/preserved.

When transporting part of or a portion of a carcass that does not have a tag (for example, the animal was divided or quartered at your hunt camp prior to final transport), you must be prepared to provide information about the tag holder (such as name, Outdoors Card number, licence number, validation number), the animal (such as antlered or antlerless for relevant species, sex and age) and details of the hunt (for example, date and location of kill) if requested by a conservation officer. Go to the General Regulations section (p.37) for additional requirements if you are shipping or transporting wildlife in containers.

Identifying Features: For deer, moose and elk you must keep relevant identifying features with or attached to the animal according to the instructions provided with the tag, until it has been transported to the site of processing and is being prepared for long-term storage. This means you need to keep these parts with or attached to the animal until it is dropped off at the butcher or until you have prepared the animal for long-term storage yourself.

The instructions provided with your tag will specify what identifying features must remain with or attached to the animal. The relevant identifying features must remain with the animal regardless of whether you have attached the tag, or you are accompanying the animal without the tag attached.

Summary of Species Tagging Locations and Identifying Features

Species	Tagging location and identifying features
White-tailed deer	Attach the tag to either the antler or the ear, keeping the head with the animal
Elk	Attach the tag to either the antler or the ear, keeping the head with the animal
Moose – bull	Attach the tag to one of its hind legs with scrotal sac attached to that leg by connective tissue
Moose – cow	Attach the tag to one of its hind legs with vulva attached to that leg by connective tissue
Moose – calf	Attach the tag to the lower jaw, which shall be left whole and kept with the animal
Black bear	Attach the tag through the cartilage separating the nostrils
Wild turkey	Attach the tag to the lower part of a leg
Wolf/coyote	Attach the tag through the cartilage separating the nostrils

Note: Be sure to reference the tagging instructions provided with your tag for more details. Whether you have attached your tag or not, you must keep the relevant identifying features with or attached to the animal according to the instructions provided with your tag (applies to deer, moose and elk only).

Mandatory Hunter Reporting

General Requirements

All hunters that purchase or are issued a tag to hunt elk, deer, bear, wild turkey and wolf/coyote (in WMUs where a tag is required) and any hunter issued a licence to hunt moose must complete a hunter report. You are required to complete a hunter report even if you did not participate in the hunt or harvest an animal.

Consequences of Failing to Report

Thanks to all hunters who continue to submit their hunter reports. This information is an important part of wildlife management and hunters play an important role.

Hunters who fail to report will have a \$25 surcharge automatically applied to their next product purchase (such as, a licence, tag or application) for that species.

***NEW* The 1-year prevent from purchase penalty has been eliminated and replaced by a \$50 surcharge for a consecutive failure to report for the same species. A \$50 surcharge will apply to any consecutive failure to report that occurs after July 1, 2026. This means the first time any hunter could receive a \$50 surcharge is in 2027.**

Subsequent consecutive failures to report for the same species will also incur a \$50 surcharge until the hunter has submitted a report for that species on time.

Hunters who provide false or misleading information may be subject to penalties under the *Fish and Wildlife Conservation Act, 1997*.

Reporting Deadlines

Generally, hunter reports must be submitted within 14 days following the end of the last hunting season for that species. Moose and black bear hunters who are required to submit their report to a moose tourist outfitter or black bear operator must provide their report back to the outfitter or operator within 7 days of the close of the season. More details on the requirements are provided on the next page.

All hunters are encouraged to provide their report as soon as their hunting activities are completed. However, hunters should not report until they know they are done, and must ensure the information they provide is accurate. Timely submission of reports when a hunt is complete helps to ensure accurate data to support harvest planning.

Hunter reporting

Species report	Submission deadline
Spring wild turkey hunter report	June 14, 2026
Fall wild turkey hunter report	November 14, 2026
Spring non-resident black bear hunter report	June 22, 2026
Fall non-resident black bear hunter report	December 7, 2026
Resident black bear hunter report	December 14, 2026
Elk Tag holder report	October 18, 2026
Non-resident moose hunter report for tourist outfitter	November 22, 2026
Resident moose tag holder hunter report for tourist outfitter	December 22, 2026
Moose hunter report	December 29, 2026
Deer hunter report	January 14, 2027
Wolf/Coyote Tag holder report	January 14, 2027

Mandatory Hunter Reporting

How to Report

For most hunters (including apprentice hunters who have chosen to purchase their own licence/tag), reports must be completed by logging into your account at [HuntAndFishOntario.com](https://www.huntandfishontario.com) or by calling 1-800-288-1155. The Fish and Wildlife Licensing Service can help you remember important dates by sending you email reminders.

For more information on mandatory hunter reporting, visit ontario.ca/HunterReporting.

Important Reporting Notes

Turkey hunters are reminded that they must report at the end of their hunt and not each time they harvest.

Resident black bear hunters must provide information on all their hunting activity and harvest for the year in a single report due December 14. Bear hunters should not submit their report until they are done hunting for the year and should make note of their spring hunting activities, observations and harvest to ensure accurate information is provided.

Non-resident black bear hunters must return their completed report to the bear operator. The operator is responsible for returning all reports completed by their hunters to MNR.

All **non-resident moose hunters** who are registered guests of tourist outfitters **must return their completed report to the outfitter**. The outfitter is responsible for returning all reports completed by their hunters to MNR.

Ontario resident moose hunters who acquire a tag from a tourist outfitter must complete **both** a regular moose hunter report and provide a report to the tourist outfitter with information unique to each type of hunt reported separately.

Resident moose hunters who are hunting with a tourist outfitter but do not hold a tag issued by the outfitter must report once, either online or by calling 1-800-288-1155.

Non-resident moose hunters who hunt with an immediate relative who has a valid Moose Tag must submit their report by December 29 online at [HuntAndFishOntario.com](https://www.huntandfishontario.com) by logging into their account or by calling 1-800-288-1155.

Wolf/coyote hunters are reminded that tags are valid until December 31 and that all hunting activities from the calendar year (January 1 – December 31) must be reported on by the reporting deadline of January 14 of the following year.

Information You Will Be Asked to Provide

Hunters will be asked to provide the following information and are encouraged to keep records if they will not be providing the information until the end of the season.

- **Participation** – Did you hunt?
- **Harvest** – Did you harvest an animal? If so, where, when and what type of animal was it (such as male or female)?
- **Effort** – What WMU(s) did you hunt in and how many days did you hunt in each?
- **Observations** – What observations did you have during the hunt? Hunters should report only the animals they saw while actively hunting.

How Hunter Reporting Information is Used

Information provided by hunters through mandatory hunter reporting is important for managing wildlife in Ontario. It specifically helps:

- monitor wildlife populations
- set tag quotas and determine the availability of additional tags
- make changes to seasons and bag limits
- inform management policies

For more information on mandatory hunter reporting and to find detailed data and high-level infographic summaries of past results, please visit ontario.ca/HunterReporting.

It's important to protect yourself from diseases that can infect both wildlife and humans.

Field Dressing, Transporting and Preparing Game

Meat from wild game is not government inspected. Hunters are responsible for proper field dressing, transportation and processing of wild game to ensure it is as safe as possible for human consumption. For more information, please visit ontario.ca/PreparingWildGame.

Highly Pathogenic Avian Influenza (bird flu)

Highly pathogenic avian influenza (HPAI) is a very contagious virus that can infect all bird species and some mammals. Anyone in close contact with infected wildlife is at increased risk. Spring and fall are high-risk periods because of wild bird migration. For more information, please visit ontario.ca/AvianInfluenzaWildlife.

Ticks

Tick-borne diseases can cause potentially serious infections in people who are bitten (for example, Lyme disease). Detections of Rocky Mountain spotted fever—a tick-borne disease that can be fatal if not treated quickly—have been increasing in Ontario. To learn more, including how to protect yourself, please visit ontario.ca/ticks.

Lead and Cadmium

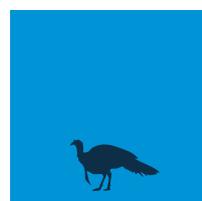

To learn how to decrease your risk of consuming toxic lead and cadmium in game meat, please visit ontario.ca/CadmiumLeadWildlife.

Fish and Wildlife Health

To learn more about diseases that impact fish and wildlife health in Ontario, including epizootic hemorrhagic disease (EHD), please visit ontario.ca/FishWildlifeHealth.

Hunter reporting results are online

Annual hunter reporting data for black bear, white-tailed deer, moose, elk, wolf/coyote and wild turkey can be found online — easily access high-level hunter reporting summaries and detailed reporting data by species for previous years.

Ontario Hunter Education Course

The Ontario Hunter Education Course instills responsible hunting practices to respect hunting regulations, prevent accidents and ensure public safety. The course can be taken in person from a certified instructor or online.

The course provides information about:

- wildlife management
- hunter responsibilities
- hunting laws and regulations
- hunting safety and equipment
- hunting techniques
- wildlife identification

For more information about the course or how to find a course in your area, please visit ohep.net.

Successful completion of the course, and purchase of applicable licences allows hunters to hunt with a bow in Ontario. To hunt with a gun, successful completion of the Canadian Firearms Safety Course (CFSC) is required. Go to the Hunting Licence Information section (p.18) for more information.

The Ontario Hunter Education Course and the CFSC are often delivered together in person. However, both courses are available independently if desired.

Plan Ahead: Make sure you plan ahead to ensure you obtain training and accreditation well in advance of the hunting season. In Ontario, students who have taken a CFSC and test will receive a copy of their CFSC student report form. The copy of your CFSC student report form will be the official documentation showing the successful completion of the CFSC before you receive your Possession and Acquisition Licence (PAL) or Minor's Licence.

Ontario 

Hunter Apprenticeship Safety Program

Hunter Apprenticeship Safety Program – Residents Only

Ontario’s Hunter Apprenticeship Safety Program (HASP) allows individuals to safely develop their hunting skills while under the direct and immediate supervision of a qualified mentor. The program provides practical training for future hunters.

Apprentice hunters must be residents who are 12 to 14 years old and have an Outdoors Card with hunting accreditation. Hunters who are 15 years of age and older must purchase an Outdoors Card and their own licence(s)/tag(s) in order to hunt.

Apprentice hunters may hunt without their own licence(s) or tag(s), but must share the bag limits or tags of their mentor, or be hunting in a party with their mentor under the tag of another party member for moose, elk, deer or black bear — go to the General Regulations section (p.32) for party hunting regulations. Apprentices cannot apply to hunt big game. Apprentices who hold an Outdoors Card may purchase select hunting licences and tags not obtained through a draw or allocation, which will allow them to hunt with their own bag limit.

Apprentices can buy an Outdoors Card by visiting a participating ServiceOntario in person, where they will need to submit proof of having successfully completed the Ontario Hunter Education Course (Certificate of Completion) and attest to the parent/guardian consent statement.

Other Hunter Apprenticeship Safety Program Requirements

- Only residents who are 12 to 14 years old are eligible. If you are 15 years of age or older, you may still hunt with a mentor to develop your hunting skills, but you are required to have your own licence(s)/tag(s) if you are hunting
- Apprentices must carry their Outdoors Card
- Apprentices must be under the direct and immediate supervision of a mentor who is 18 years of age or older, and who holds a valid Outdoors Card and hunting licence (and tag if applicable) for the species being hunted
- Apprentices must share a single firearm with their mentor
- Apprentices must possess a federal Migratory Game Bird Hunting Permit to hunt migratory game birds
- Game wildlife must be added to the daily bag limit of the mentor, unless the apprentice has obtained his/her own licence(s) or tag(s) for the relevant species
- All hunters (including apprentices) are required to carry their firearms licence or proof of completing the Canadian Firearms Safety Course (CFSC) if in possession of a gun for the purpose of hunting

Ontario 

Fish and Wildlife Conservation Act, 1997

The Fish and Wildlife Conservation Act, 1997 (FWCA), is the main provincial law regulating hunting and trapping. It is enforced by conservation officers, which includes police officers.

The penalties for offences under the FWCA can include:

- general offences: \$25,000, 1 year imprisonment, or both
- commercialization-related offences: \$100,000, 2 years imprisonment, or both
- tickets with set fines
- court-ordered hunting licence cancellations and suspensions and court orders prohibiting licence-related activities
- automatic financial penalties (surcharges) for failing to submit mandatory hunter reports as required

Hunting includes lying in wait for, searching for, being on the trail of, pursuing, chasing or shooting at wildlife, whether or not the wildlife is killed, injured, captured or harassed. You need a valid hunting licence to do any of these things, except where the FWCA states otherwise.

For a complete list of all “Game Wildlife and Specially Protected Wildlife”, go to the *Wildlife Schedules Regulation* at: ontario.ca/laws/regulation/980669.

Hunter Orange

All licensed hunters, including bow hunters, falconers, wild turkey hunters, bear hunters and trappers who are hunting under their Trapping Licence, during a gun season for deer, elk or moose, are required to wear hunter orange. This requirement does not apply to persons who are hunting double-crested cormorants or migratory game birds, except woodcock.

In addition, all licensed bear hunters hunting during the open season for black bear, when it is not also a gun season for deer, elk or moose, are required to wear hunter orange except when in a tree stand.

A hunter orange garment and head cover must be worn. The hunter orange garment must cover a minimum of 400 square inches (2,580 square centimetres) above the waist and be visible from all sides (a vest made up of only a front and rear panel may not be visible from all sides). The hunter orange garment must be solid and cannot contain open mesh or camouflage orange. A garment with 400 square inches of hunter orange that also includes retro-reflective silver or yellow stripes meets the requirement. Any backpack that is worn must not completely conceal the hunter orange from being visible on that side. As a best practice, hunters should have hunter orange on their backpacks. The hunter orange on the head cover must not contain camouflage material. The hunter orange head cover may have open mesh, a peak or brim colour other than hunter orange, and a crest or logo that does not completely cover the hunter orange on the side where it is affixed.

Hunters using ground blinds are required to wear hunter orange even when in their blind. They should also take steps to make their blind clearly visible to other hunters who may be in the area. Use of hunter orange material on the outside of the blind is an appropriate method to mark a ground blind.

Firearms

Firearms include rifles, shotguns, muzzle-loading guns, air or pellet guns and bows (including longbows, crossbows, compound bows and recurve bows). You may use semi-automatic or repeating firearms for hunting in Ontario, but not restricted or prohibited firearms (such as fully automatic firearms). Air and pellet guns are not permitted for hunting big game but may be used for hunting small game.

If you are hunting with a gun, you are required to carry proof of your firearms accreditation (p.18).

Hunting carelessly is an offence. Hunters who handle or discharge firearms without due care and attention or consideration for persons and property

General Regulations

are liable to a fine of up to \$25,000 or imprisonment for up to 2 years — or both. Depending on the circumstances, a person may also be subject to charges under the *Criminal Code of Canada*.

Any injury caused by the discharge of a firearm while in possession of a firearm for the purposes of hunting or trapping, which requires treatment by a physician, must be reported to a conservation officer.

Before hunting, check local sunrise-sunset times. You may only hunt from half an hour before sunrise to half an hour after sunset (exceptions: night raccoon hunting and spring hunting hours for wild turkey). If you are in an area usually inhabited by wildlife during the period from half an hour after sunset to half an hour before sunrise, you must unload and encase any firearms in your possession.

To be considered encased, firearms must be enclosed on all 6 sides.

A firearm is considered to be loaded if it has an unfired shell or cartridge in the chamber or in a magazine that is attached to the firearm.

A muzzle-loading gun is a gun that is loaded through the muzzle. A percussion muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and a percussion cap on the nipple. A flint-lock muzzle-loading gun is considered to be loaded if there is a charge of powder and a projectile in the barrel and the vent is unplugged. An electronic ignition muzzle-loading gun is considered to be loaded if there is a projectile in the barrel and a battery connected to the primer or charge. Under federal regulations pertaining to storage and transport of firearms, a muzzle-loading gun is not unloaded unless any propellant, projectile or cartridge has been removed from the breech or firing chamber. There is an exemption on transport restrictions when traveling between hunting sites.

A crossbow is considered to be loaded if the bow is cocked and there is a bolt in the crossbow. A bow other than a crossbow is considered to be loaded if the bow is strung and an arrow is nocked.

Contact the Canadian Firearms Program at 1-800-731-4000 or rcmp.ca/en/firearms for information about the requirements for firearm ownership, licensing, storage and transportation.

The draw length of a bow (compound, recurve, long) is the measured distance from the outer edge of the main riser (handle), following the line of an arrow to the string at the anchor point. The draw length of a crossbow is measured along the bolt ramp (where the bolt rests) from the outer edge of the main limb, to the anchor point (release latch mechanism) at full draw.

Arrows must be at least 60 cm (23.6 inches) in length. The length of an arrow is measured from the base of the arrowhead to the bottom of the nock slot.

A head (broadhead) used for hunting big game or wild turkey must be at least 22 mm (0.87 inches) wide and have at least 2 sharp cutting edges.

A shotgun must be plugged so that it cannot hold more than a total of 3 shells in the chamber and magazine combined.

On the Aulneau Peninsula (WMU 7A), from August 15 to December 15, you may not use a centre-fire rifle or a shotgun loaded with ball or with shot larger than number 2 lead shot, triple BBB steel shot or double BB bismuth shot.

Under the *Criminal Code of Canada* you generally cannot possess any clip/magazine that holds more than 5 shots for a semi-automatic centre-fire firearm.

Municipal By-laws

Some municipalities have by-laws restricting the discharge of firearms. Check with the local municipal office for details.

Sunday Gun Hunting

Sunday gun hunting is permitted in areas north of the French and Mattawa rivers. You can find out which municipalities permit Sunday gun hunting south of the French and Mattawa rivers by visiting: ontario.ca/SundayGunHunting.

Summary of Firearms Restrictions Related to Roads and Trails

You must not shoot from or across a right of way for public vehicular traffic anywhere in Ontario.

You must not possess a loaded firearm on or near a right of way for public vehicular traffic in most of Southern Ontario.

You must not possess a loaded firearm on or near a right of way for public vehicular traffic during an open gun season for deer or elk in large portions of Central and Northwestern Ontario.

Note: A right of way for public vehicular traffic includes a road or trail open to public use by vehicle traffic. Please refer to the table below for the specific restrictions and applicable geographic areas.

Restrictions	Applicable geographic areas
No discharge of firearms from or across the travelled portion of a right of way for public vehicular traffic	All of Ontario
You must not possess a loaded firearm on or within 8 metres of the travelled portion of a right of way for public vehicular traffic (or its fenceline where one exists)	Brant, Bruce, Chatham-Kent, Dufferin, Durham, Elgin, Essex (except the single-tier municipality of Pelee), Frontenac (except the lower-tier municipalities of Central and North Frontenac), Grey, Haldimand, Halton, Hamilton, Hastings (except the lower-tier municipalities of Bancroft, Carlow/Mayo, Deseronto, Faraday, Hastings Highlands, Limerick, Madoc, Marmora and Lake, Tudor and Cashel and Wollaston), Huron, Kawartha Lakes, Lambton, Lanark, Leeds and Grenville, Lennox and Addington (except the lower-tier municipality of Addington Highlands), Middlesex, Niagara, Norfolk, Northumberland, Ottawa, Oxford, Peel, Perth, Peterborough (except the lower-tier municipalities of Galway-Cavendish-Harvey and North Kawartha), Prescott and Russell, Prince Edward, Simcoe, Stormont, Dundas and Glengarry, Toronto, Waterloo, Wellington, York.
You must not possess a loaded firearm on or within 8 metres of the travelled portion of a right of way for public vehicular traffic (or its fenceline where one exists) during an open gun season for deer or elk	Lower-tier municipalities of Central and North Frontenac in the geographic area of Frontenac, Haliburton, lower-tier municipalities of Bancroft, Carlow/Mayo, Deseronto, Faraday, Hastings Highlands, Limerick, Madoc, Marmora and Lake, Tudor and Cashel and Wollaston in the geographic area of Hastings, the lower-tier municipality of Addington Highlands in the geographic area of Lennox and Addington, Muskoka, the lower-tier municipalities Galway-Cavendish-Harvey and North Kawartha in the geographic municipality of Peterborough, Renfrew, the single-tier municipalities of Alberton, Chapple, Dawson, Emo, Fort Frances, La Vallee, Morley, Rainy River and the geographic townships of Morson, McCrosson, Tovell, Dance (excluding Lyons Bay Road and Lost Creek Road), Kingsford (excluding Fleming Road), Miscampbell (excluding Boffin Road), Pratt, Nelles, Spohn and Sutherland all within the Territorial District of Rainy River, and the single-tier municipality of Kenora, geographic townships of Boys, Ewart, Forgie, Gidley, Glass, Gundy, Kirkup, Pellatt and the unorganized area south and east of the geographic township of Boys township, south of the geographic township of Pellatt and west of the single-tier municipality of Kenora to the shore of Lake of the Woods all within the Territorial District of Kenora.

General Regulations

Summary of Firearms Restrictions for Hunting in Ontario

Be sure to check relevant species sections to identify different season types and dates restricting certain types of firearms (such as Bows Only seasons, Muzzle-loading Guns and Bows Only, etc.).

Firearm	Moose, elk and bear	Deer	Wild turkey
Rifle	Yes – Centre-fire rifle only	Yes – Centre-fire rifle only	No
Shotgun	Yes – Shotgun not smaller than 20 gauge when using shot; shot size must be SG or number 1 buck or larger.	Yes – Shotgun not smaller than 20 gauge when using shot; shot size must be SG or number 1 buck or larger.	Yes – Shotgun not larger than 10 gauge or smaller than 20 gauge, using shot size of 4, 5, 6 or 7.
Muzzle-loader	Yes	Yes	Yes, shotgun only
Bow	<p>Yes – Bow must have a draw weight of at least 22 kg (48.5 lb) at a draw length of 700 mm (27.6 in) or less.</p> <p>Arrows must be at least 600 mm (23.6 in) long and have at a minimum a 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>	<p>Yes – Bow must have a draw weight of at least 18 kg (39.7 lb) at a draw length of 700 mm (27.6 in) or less.</p> <p>Arrows must be at least 600 mm (23.6 in) long and have at a minimum a 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>	<p>Yes – Bow must have a draw weight of at least 18 kg (39.7 lb) at a draw length of 700 mm (27.6 in) or less.</p> <p>Arrows must be at least 600 mm (23.6 in) long and have at a minimum a 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>
Crossbow	<p>Yes – Crossbow must have a draw length of at least 300 mm (11.8 in) and a draw weight of at least 54 kg (119 lb).</p> <p>Bolts at a minimum must have a 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>	<p>Yes – Crossbow must have a draw length of at least 300 mm (11.8 in) and a draw weight of at least 45 kg (99.2 lb).</p> <p>Bolts at a minimum must have 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>	<p>Yes – Crossbow must have a draw length of at least 300 mm (11.8 in) and a draw weight of at least 45 kg (99.2 lb).</p> <p>Bolts at a minimum must have 22 mm (0.87 in) wide broadhead with at least 2 sharp cutting edges.</p>

Party Hunting

A person may hunt moose, deer or black bear in a party of 2 or more people who each hold a licence to hunt that species, even if the person has already invalidated their tag for that species. In these cases, at least 1 member of the party must hold a tag that has not yet been invalidated, and the group must comply with the following conditions:

- each person must have a valid licence to hunt the big game species being hunted
- the total number of moose, elk, deer or bear of a specified sex, age or type killed by the party does not exceed the total number of tags for that sex, age or type held by the members of the party
- all members of the party must hunt together in the same Wildlife Management Unit or portion thereof, for which the tag is valid
- **each member of the party must hunt within 5 km of the person who holds the tag** that is valid for the wildlife being hunted
- each member of the party must be able to reliably and immediately communicate with other members of the party
- all members of the party, including the person who holds the tag that is valid for the species that the party is hunting, must actively participate in the hunt and hunt co-operatively

Party hunting is also permitted for elk in accordance with the conditions noted above, however some additional rules apply. Go to the Elk section (p.75) for these additional rules.

The person who kills the animal while hunting in a party shall immediately notify all other members of the party that the animal has been killed. If the tag holder is not the person who kills the animal, the tag holder must immediately go to the kill site, confirm the type/sex/age of the animal and then invalidate their tag. Go to the Tags section (p.19) for more information.

If you have questions about party hunting, the best time to get answers is before the hunt begins. Contact your local MNR work centre or NRISC at 1-800-387-7011 or nrisc@ontario.ca.

Note: The term ‘invalidated tag’ refers to a tag that has been notched by the tag holder immediately after the kill, at the site of the kill and before moving the animal. Go to the Tags section (p.20) for information.

Use of Vehicles, Boats, Drones or Aircraft

Aircraft, including drones and balloons, may not be used while hunting (including searching for a wounded animal).

Vehicles (includes any kind of vehicle that is driven, propelled or drawn on land or ice by any kind of power, including muscular power, and includes snowmobiles, and the rolling stock of a railway) or boats may not be used for chasing, pursuing, harassing, capturing, injuring or killing any wildlife.

It is illegal to have a loaded firearm in or on, or discharge a firearm from, an aircraft, vehicle (including snowmobile and all-terrain vehicle) or motorboat (a motorboat is considered a boat with a motor that is attached to the boat and that is capable of being used as a means of propulsion) or anything towed by the boat. A loaded firearm may be carried in, and discharged from, a canoe or boat that is being paddled, with no motor attached.

There is an exception to the prohibition on loaded firearms in a motorboat if you are hunting double-crested cormorants in accordance with the regulations (p.92 for more information) or waterfowl in accordance with the *Migratory Birds Convention Act, 1994*.

General Regulations

Note: There is an exception (requires authorization) to having a loaded firearm in a vehicle or motor boat if a person has a mobility disability and meets one of the following criteria:

- has paraplegia or hemiplegia
- has a single (above-the-knee) lower limb amputation or a double (below-the-waist) amputation
- has a severe disability and cannot hunt without the use of a wheelchair or similar means of locomotion. In this case, the hunter must provide a medical certificate stating the disability

Please plan ahead to allow for the processing of requests. To apply for an authorization, please visit ontario.ca/ResidentHunting or call NRISC at 1-800-387-7011, Monday to Friday from 8:30 a.m. to 5:00 p.m.

Dogs

All dogs used to hunt deer, moose or black bear must be licensed for the purposes of hunting. There are some areas where dogs are not permitted to be used for hunting deer or moose (go to the season tables of the Deer and Moose sections for additional details). Dogs may not be used to hunt elk.

Dogs are prohibited from running at large in areas usually inhabited by big game during the closed season. It is your responsibility to ensure your dog does not enter private property that you do not have permission to hunt on or where hunting is prohibited in contravention of the *Trespass to Property Act*. Hunters are responsible for ensuring their dogs are under their control and that hunting activities are conducted lawfully.

During lawful hunting hours, you are permitted to use a leashed dog (the dog does not require a licence) to track and retrieve wounded big game during the open season provided the dog is kept

on a leash that has a maximum length of 10 m and the dog is under the physical control of the dog handler at all times. The licensed hunter who wounded the animal must be with the dog and handler, and if party hunting, the holder of the tag must also be present.

The person handling the tracking dog must not be carrying a firearm unless properly licensed to hunt the animal being tracked.

To hunt raccoon at night, you must be accompanied by a dog licensed for the purposes of hunting and you must have a resident Small Game Licence or be hunting under the authority of a Trapping Licence in the area described on the licence.

To conduct dog training and field trials on game species during the closed season, an authorization or licence issued by MNR is required. An appropriate hunting licence is required during the open hunting season.

Many municipalities have by-laws regarding dogs, including by-laws that may affect the use of dogs while hunting. Check with the local municipal office for details.

If you are bringing a dog into Canada from the United States, you must have a certificate signed by a veterinarian licensed in Canada or in the United States, stating that the dog has been vaccinated against rabies during the preceding 36 months. For more information, check with the Canada Border Services Agency.

Snares

Snares cannot be used under a Small Game Licence, except by the holder of a resident Small Game Licence taking snowshoe hare north of the French and Mattawa rivers with a snare constructed of copper or brass wire between 22 and 24 gauge. The opening of the snare wire loop must be 10 cm (4 in) or less in diameter.

General Regulations

Poison and Adhesives

It is illegal to use poison and adhesives to kill, injure or capture wildlife, including in protection of property.

Big Game – Swimming

You may not hunt moose, elk, deer or black bear while they are swimming.

Trespassing

It is unlawful to enter private property once notice has been given that entry is prohibited, or that certain activities, such as hunting, are prohibited. Notice of no trespassing may be given in a variety of ways, including verbally, by signs, symbols (for example, a red circle 10 cm in diameter), coloured markings or fences. Lands under cultivation are also considered to provide notice against entry.

Always ask for permission and obey posted signs.

Not all land is signed. Unsigned lands may be private land as well. It is your responsibility to find out who owns the land you wish to hunt on and to determine whether entry is prohibited or certain activities, such as hunting, are prohibited. If unsure, stay out. If a wounded animal runs onto private property where notice has been given that entry is prohibited, or certain activities like hunting have been prohibited, you must seek permission to retrieve the animal. Positive landowner or occupier/hunter relationships are important to the future of hunting in Ontario.

You may not enter private land in a party of more than 12 persons without the express permission of the occupier if any member of the party possesses a firearm or other hunting device.

Hunt safe

- It is illegal to shoot from, down or across a public road in any part of the province.
- It is illegal to have a loaded firearm in or on a vehicle, including all-terrain vehicles and snowmobiles.
- Firearms must be unloaded and encased (enclosed on all 6 sides) from 30 minutes after sunset to 30 minutes before sunrise.

Call 1-877-847-7667 if you suspect any fish and wildlife violations.

Ontario 

General Regulations

Before hunting on Indian Reserves, ask the permission of the Band Council.

You must have written permission from the landowner on the form provided by MNR to hunt elk on private land to hunt moose in WMU 65 on private land and to hunt deer in WMUs 43A, 43B and 44 on private land. Form is available online though through the Central Forms Repository at forms.mgcs.gov.on.ca/dataset/fw4511.

Wildlife Management Areas

There are some designated areas within the province which provide special opportunities for hunting (such as Special Hunting Areas, Provincial Wildlife Areas, Wildlife Extension Landowner Agreement Areas, etc.). The majority of these areas are located in the southern part of the province. These areas may have seasonal or daily user fees. Hunters interested in hunting in these areas should contact their local MNR work centre for more information.

Crown Game Preserves

It is illegal to hunt or trap in Crown Game Preserves. In addition, you may not use or possess firearms in Crown Game Preserves, unless you live on private land within a Crown Game Preserve.

Hunting in Provincial Parks

Hunting is permitted in a number of provincial parks in Ontario. Hunters should always check with the appropriate park office regarding areas open to hunting, species that can be hunted, seasons and other restrictions that apply in each park. Visit ontarioparks.ca/park-locator to find contact information for different provincial park offices, or call 1-800-387-7011 for assistance.

Camping on Crown Land and in Conservation Reserves

Most Crown land and conservation reserves are available year-round for personal, temporary use at no cost. Some restrictions apply to certain activities and areas. Non-residents of Canada who are 18 years of age or older generally require a permit to camp on Crown land in Northern Ontario or in a conservation reserve anywhere in Ontario.

For more information:

- contact the local MNR work centre
- contact Natural Resources Information and Support Centre at 1-800-387-7011 or nrisc@ontario.ca
- visit ontario.ca/CrownLandCamping

Note: Non-residents are prohibited from camping on Crown land within 1 km of the following road systems in Kenora and Fort Frances Districts between October 1 and November 15:

- Hwy 71 and roads branching off Hwy 71 from Strachan Road to the junction of Hwy 17
- Hwy 596, Caribou Falls Road and Sand Lake Road, and all roads branching off these roads to the junction of the English River Road
- Rush Bay Road and branch roads
- Shoal Lake Road and branch roads
- Gundy Lake Road and branch roads

For more information, contact the Kenora Work Centre at 1-807-468-2501 or the Fort Frances Work Centre at 1-807-274-5337.

Trespassing is illegal

Obtain permission to enter private land before you go hunting.

Ontario 

Conservation Officers

Conservation officers are appointed under the *Fish and Wildlife Conservation Act, 1997*, and include: Royal Canadian Mounted Police, a police officer or First Nations constable appointed under the *Police Services Act*, a game officer designated under the *Migratory Birds Convention Act, 1994*, a park warden designated under the *Canada National Parks Act*, and a person whose primary employment responsibility is enforcement of fish and wildlife laws in a border jurisdiction if they are acting under the direction of a conservation officer. Conservation officers have powers of inspection, arrest, search and seizure under the various laws they enforce, including the *Fish and Wildlife Conservation Act, 1997*, the *Migratory Birds Convention Act, 1994*, and the *Fisheries Act*.

Conservation officers have authority to enforce the *Off-Road Vehicles Act*, *Motorized Snow Vehicles Act*, *Liquor Licence and Control Act, 2019*, and *Canada Shipping Act, 2001*. When carrying out their duties, or investigating an offence under these statutes or the corresponding regulations, conservation officers may have the power to:

- stop and/or inspect a vehicle, boat or aircraft
- inspect firearms, ammunition, wildlife or fish
- ask questions relevant to the inspection
- inspect buildings or other places
- enter and cross-over private property
- search with a warrant
- search without a warrant in circumstances requiring immediate action
- seize items related to the offence
- arrest anyone they believe has committed, is committing or is about to commit an offence

Conservation officers operate game check stations throughout the year. At these stations, conservation officers collect information on game taken by hunters and make sure the regulations are being followed in order to better manage our wildlife resources. During an inspection, hunters are required to provide reasonable assistance and provide accurate information about the hunt.

When transporting game harvested by another hunter, you must be prepared to provide information about the hunter (such as name, Outdoors Card number, licence number) and details of the hunt (such as date and location of kill) if requested by a conservation officer.

Game Wildlife and Parts

It is illegal to possess a gallbladder that has been removed from a black bear.

With the exception of furbearing mammals or double-crested cormorants (subject to disposal requirements, p.92) you may not let the flesh of any harvested game wildlife that is suitable for food become spoiled or abandoned. This includes black bear.

A hunter who kills a furbearing mammal (for example, coyote or raccoon) shall not abandon the pelt or permit the pelt to be spoiled or destroyed. A pelt is the untanned skin of a furbearing mammal, whether or not the skin is on a carcass.

In general, it is illegal to buy, sell or barter any game wildlife or specially protected wildlife or their parts (including taxidermy mounts). There are some exemptions – please contact your local MNR work centre for more information. You may purchase the meat of a furbearing mammal from a licensed trapper or farmer for consumption by your immediate family. A person selling a carcass of a furbearing mammal for consumption must advise the buyer in writing that the meat has not been inspected under the *Food Safety and Quality Act, 2001*.

For information on buying or selling hides or cast (naturally shed) antlers, or on serving wild game at charitable events, visit ontario.ca/HidesAndAntlerSales or ontario.ca/ServeFishGame, or call 1-800-387-7011.

General Regulations

Shipping

Unless accompanied by the hunter or trapper who lawfully harvested the animal, receptacles (or containers) containing game wildlife or specially protected wildlife that are being shipped or transported to points inside or outside Ontario must have the names and addresses of the sender and receiver, and a list of the contents, written on the outside.

Import

It is an offence to possess wildlife that was killed, captured, taken, possessed, transported, bought, sold or removed from another jurisdiction contrary to the laws of that jurisdiction. It is an offence to sell wildlife from another jurisdiction if the sale is not permitted in the jurisdiction from which it was originally exported.

To prevent the introduction of Chronic Wasting Disease (CWD), Ontario restricts the import and possession of whole carcasses and high-risk parts from all members of the deer family (including deer, elk, moose, caribou) harvested in other jurisdictions. Go to ontario.ca/CWD for more information.

Export

Non-residents must have an Ontario **Non-Resident Export Permit** to export moose, deer, elk or black bear that were killed in Ontario, or their parts.

Export Permits are not required for taxidermy mounts or tanned hides of a black bear, white-tailed deer, moose or elk.

An **Export Licence for Furbearing Mammals and their Pelts** is required to export any furbearing mammal (including a wolf or coyote) or their pelt out of Ontario whether it originated from Ontario or not. This also includes pelts from farmed animals, carcasses and live furbearing mammals. Royalties are payable on all wild Ontario furbearing mammals prior to their export from Ontario. You may obtain an Export Licence from a local MNR work centre.

Export Licences are also not required for pelts or other parts of furbearing mammals that have been treated by a taxidermist or that have been lawfully bought or sold and are tanned, treated, or manufactured into commercial products. Artwork or jewellery made from game wildlife, where the primary value is in the artwork or jewellery and not in the wildlife, is also exempt from the requirement for an export permit.

In some provinces and countries, importation of wildlife is regulated. Hunters should check for any import requirements to avoid delays when returning home with harvested game.

Canadian CITES Export Permits

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) is an international agreement which regulates trade in a number of species of animals and plants, their parts and derivatives, and any articles made from them. In some instances a CITES permit is required to export an animal, or parts of an animal, from Canada.

Residents and non-residents need a Canadian CITES export permit to export wolf, black bear and several other species from Canada. The CITES permit requirement is waived for U.S. or Canadian residents in some instances where a black bear is being exported. Go to the Black Bear section (p.79) for more information. Please contact Environment and Climate Change Canada (p.94) to make arrangements to obtain a CITES permit. Please allow up to 21 days to receive a permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES-listed species that you may harvest.

How to Apply to Hunt Big Game

Applying to Hunt Big Game

Some big game hunting opportunities for Ontario residents require a hunter to apply to and be successful in a draw or allocation process.

These include obtaining:

- an Antlerless Deer Tag in the Antlerless Deer Draw
- a Controlled Deer Hunt Validation in the Controlled Deer Draw
- a Moose Tag in the Moose Tag Allocation Process
- an Elk Tag and/or Licence in the Elk Draw

When applying to hunt big game make sure you:

- have a valid Outdoors Card
- apply early in the application period – do not wait until the last day
- submit only one application in your name per draw or allocation stage
- are at least 15 years old on the date you apply

Hunters may apply to hunt big game in 1 of 3 ways:

- by visiting [HuntAndFishOntario.com](https://www.huntandfishontario.com)
- by calling 1-800-288-1155
- by visiting a participating ServiceOntario or licence issuer in person

To apply you will need:

- a valid Outdoors Card
- method of payment (VISA, MasterCard, VISA Debit and Debit MasterCard are accepted)
- any hunt codes that correspond to your choices. Hunt codes can be found in the Deer, Moose and Elk sections of this summary

Note: No hunt codes are needed for the Antlerless Deer Draw.

- your group number (if you are applying to the Controlled Deer Draw or Elk Draw as a member of a group)

Whichever option you choose to apply, online, phone or in person, it is your responsibility as an applicant to ensure that applications are valid and choices are entered correctly.

Applying Online

You can visit [HuntAndFishOntario.com](https://www.huntandfishontario.com) to purchase a licence and apply to a deer draw either all at once or in separate transactions. Applying to the Elk Draw or Moose Tag Allocation Process requires an application fee. The information you enter electronically is your application to the draw or allocation and you will be asked to confirm that your choices are correct.

Once you have completed and submitted the application, save a copy of your application receipt for future reference.

Note: Even if there are no fees associated with your transaction, you still need to select “Complete Transaction” to submit the application.

Applying by Telephone

You can apply to hunt big game by calling 1-800-288-1155 during the application period. This toll-free number is open from 8:30 a.m. ET on the first day of the application period and operates 24 hours a day, 7 days a week until 11:59 p.m. ET of the application deadline. Phone lines will be open during the following periods:

- Moose Primary Allocation: April 1 to April 30
- Moose Second Chance Allocation: June 15 to July 7
- Elk: April 15 to June 10
- Antlerless Deer: March 1 to June 30
- Controlled Deer: July 1 to July 31

Once you have completed your application, you will be asked to confirm that your choices are correct and you will receive an authorization number.

Applying in Person

You can apply to hunt big game in person at a participating ServiceOntario or licence issuer. Find participating ServiceOntario Centres at [ontario.ca/ServiceOntario](https://www.ontario.ca/ServiceOntario) and licence issuers at [ontario.ca/LicenceIssuers](https://www.ontario.ca/LicenceIssuers).

How to Apply to Hunt Big Game

Individual Applications

You can only apply to the Antlerless Deer Draw and the Moose Tag Allocation Process as an individual applicant. The Controlled Deer Draw and the Elk Draw allow for individual or group applications.

If applying as an individual, you must enter your choice of WMU, or hunt code (if applicable) which represents your choice of WMU, animal type (if applicable) and season/firearm type (if applicable). Each individual applicant will be given an Authorization Number. The Authorization Number confirms that the hunter has successfully entered into the draw or allocation. Please record this Authorization Number for your records.

Group Applications

If you intend to hunt in a party in a controlled deer season or for elk, it is to your advantage to apply as a group. The maximum number of hunters that can apply as a group is 4 (the Group Leader plus up to 3 Group Members).

Group Leader

The **Group Leader** must be the first member of the group to apply. The Group Leader is the only member of a group who enters the hunt code representing the group's choice of WMU/harvest area and season (if applicable). The Group Leader is then provided with a **Group Number** to identify the group and its choices. The Group Leader must give the Group Number to the Group Members so they may add their names to the group's application when submitting their application.

Group Member

Each **Group Member** must obtain the Group Number from the Group Leader before entering the draw. Members will be asked for the Group Number so the group can be identified and linked together for application to the draw.

Application Results

Applicants can go online at [HuntAndFishOntario.com](https://www.huntandfishontario.com) or call 1-800-288-1155 for their application results. Go to the Important Dates section (p.5) to find when results are available. Hunters will need their 15-digit Outdoors Card number (or account login information if checking online) to access their results.

Moose Tag Allocation

Applicants awarded a tag must claim the tag to be issued it. All moose hunters must have a Moose Licence. **Applying to the Moose Tag Allocation Process does not provide you with a Moose Licence.** Go to the Moose section (p.56) or [ontario.ca/MooseTagProcess](https://www.ontario.ca/MooseTagProcess) for details.

Failure to pay fines

Under the *Fish and Wildlife Conservation Act, 1997* and the *Fisheries Act*, any person who does not pay a fine can have their licence suspended or future hunting and fishing privileges revoked until the penalty has been paid.

Don't feed wildlife

Feeding wild animals may do more harm than good.

- Wildlife may become habituated to artificial food sources.
- Artificial feed is not healthy for wildlife.
- Feeding near roads may cause increases in vehicle-wildlife collisions.
- Feeding can increase conflicts between wildlife and humans or pets.
- Feeding can increase the risk of spreading parasites or disease.

Important dates for controlled deer hunters

- draw application period: **July 1 – 31**
- draw results released: **September 1**
- additional tags available: **September 8**

ontario.ca/HuntBigGame 

Controlled deer hunt notes:

Unless otherwise indicated, only shotguns, muzzle-loading guns and bows are permitted in controlled deer hunts.

- ^ indicates that rifles, shotguns, muzzle-loading guns and bows are permitted
- * indicates that only muzzle-loading guns and bows are permitted
- + indicates that only shotguns and muzzle-loading guns are permitted
- ~ indicates that only muzzle-loading guns are permitted

The use of dogs is not permitted during controlled deer hunts.

WMU 77A is a federal military base and has unique access permission requirements. Please contact your local MNR work centre for more information.

Hunter reporting is required

All hunters that purchase or are issued a tag to hunt elk, deer, bear, wild turkey and wolf/coyote (in WMUs where a tag is required), and any hunter issued a licence to hunt moose must complete a hunter report. You are required to complete a hunter report even if you did not participate in the hunt or harvest an animal. Refer to the Mandatory Hunter Reporting section (p.22) for details on timelines, how to submit your report and consequences for not reporting.

ontario.ca/HunterReporting

Deer Hunting Requirements

Anyone wishing to hunt deer must have the following:

- Outdoors Card
- Deer Licence or Farmer's Deer Licence listed on your Licence Summary
- Deer Tag or Additional Deer Tag (validated for the appropriate season/firearm, area, and type of deer) **or** be party hunting with a person who has a valid Deer Tag or Additional Deer Tag
- proof of firearm accreditation (if you are hunting with a gun)

The Deer Tag included with the purchase of a Deer Licence is valid for 1 antlered deer (a deer with at least 1 antler of at least 7.5 cm long) in any WMU with an open season. **Note:** The Controlled Deer Hunt section (p.47) describes the additional requirements for hunting during a controlled deer hunt season.

Resident hunters wishing to hunt an antlerless deer (a deer with no antlers or with both antlers less than 7.5 cm long, which generally includes adult female deer and fawns of both sexes) should apply to the antlerless deer draw and/or the controlled deer hunt draw, depending on their WMU and season of preference. **Note:** Hunters may also hunt an antlerless deer by purchasing an Additional Deer Tag valid for antlerless deer or by party hunting with a person who has a Deer Tag or Additional Deer Tag valid for an antlerless deer.

Resident hunters successful in the antlerless deer draw will be issued a Deer Tag that identifies the tag as being valid for 1 antlerless deer in a specific WMU or 1 antlered deer in any WMU.

Farmer's Deer Licence

Farmers (or an immediate relative) whose primary occupation is farming who live upon and till land which they own are eligible to purchase a Farmer's Deer Licence. The immediate relatives of a farmer may only purchase this licence if their primary occupation is farming, and they also live upon and till the land.

Note: A Farmer's Deer Licence and Deer Tag are valid for the geographic area (that is, the county or territorial district) in which the farmer's land is located. Farmers must identify the geographic area in which their land is located and complete an attestation online or in person at a participating ServiceOntario or licence issuer. The geographic area is shown on your Licence Summary and Deer Tag.

Farmer's Deer Licence holders may apply to the antlerless deer draw and/or the controlled deer hunt draw for a WMU within the geographic area in which their land is located. Farmers intending to hunt deer outside of that geographic area must purchase a Deer Licence, not a Farmer's Deer Licence.

Deer Hunting Regulations

Hunters are only permitted to harvest the type of deer identified on their Deer Tag or Additional Deer Tag, except in the following circumstances:

- if party hunting, a hunter may harvest the type of deer identified on the Deer Tag (or Additional Deer Tag) of a member of their hunting party
- if hunting in a controlled deer hunt, a hunter may only harvest the type of deer identified on their (or their party member's) Controlled Deer Hunt Validation listed on their Licence Summary or their Additional Controlled Deer Tag

Tagging and Transporting

Go to the Tags section (p.19) for details on tagging and transporting. Additional information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting Requirements

Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including deer, may only be hunted with a firearm (includes bows). When hunting deer, you may only use or carry a firearm of the type

White-tailed Deer

permitted for hunting deer at that time in that WMU. For example, when hunting deer during a Bows Only season, you may only use and carry a bow. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting deer are found in the General Regulations section (pp.28 to 37).

Party Hunting for Deer

Party hunting is permitted during the open season for deer under a set of specific conditions. The list of conditions is listed in the General Regulations section (p.32).

A person shall not hunt deer in a party during a controlled deer hunt season unless their Licence Summary has been validated for that specific controlled deer hunt season. The exception is an apprentice hunter who is hunting with a licensed mentor (in which case the mentor must have their Licence Summary validated for the relevant controlled deer hunt season).

Dogs

The use of dogs is permitted for hunting deer during some seasons (a Dog Licence is required in these cases) — go to the Deer Season tables for information on when dogs are not permitted (pp.40 to 45). In areas where the use of dogs is prohibited for hunting, dogs may still be used to track and retrieve a deer that has been wounded during a lawful hunt — go to p.33 for more information.

Guides

Non-residents must employ 1 licensed guide for each 2 hunters when hunting deer in the Territorial District of Rainy River. WMUs within the Territorial District of Rainy River are 9B, 10, 11A and parts of 7B and 12B — go to the WMU Maps section (p.12) and Deer Season tables for more information.

Additional Deer Tags

When deer populations in certain WMUs warrant, hunters may be offered the opportunity to harvest an additional deer by purchasing Additional Deer Tags or Additional Controlled Deer Tags.

Information regarding this year's Additional Deer Tags (WMUs, hunt codes, and sales dates) will be posted online at ontario.ca/AdditionalDeerTag when available. If you do not have internet access, please contact the Natural Resources Information and Support Centre at 1-800-387-7011.

Additional Deer Tags are available on a first come, first served basis. Additional Deer Tags may also be available to non-residents in WMUs with a non-resident deer season. A Deer Licence is required before you can purchase an Additional Deer Tag.

Note: Additional Deer Tags are not valid during controlled deer hunt seasons. Additional Deer Tags may have a geographic restriction and be valid in only the part of the WMU specified online and on the tag. Hunters are responsible to ensure they are hunting in the correct WMU or part of a WMU.

Controlled Deer Hunt

To hunt in a Controlled Deer Hunt (CDH) season (pp.44 to 45), you must be an Ontario resident and have a CDH Validation for the CDH season listed on your Licence Summary.

CDH Validations:

- can be applied for in the CDH draw **July 1 to 31** (p.38), or can be applied for directly by eligible farmers and landowners (p.48) **July 1** until the season ends
- require purchase of a Deer Licence or Farmer's Deer Licence before appearing on your Licence Summary. **Note:** A Farmer's Deer Licence is only valid for the geographic area shown on your Licence Summary and Deer Tag (p.46).

- are not required for apprentice hunters (12 to 14 years old), who may hunt in a CDH season with a mentor who has a CDH Validation for that season
- are not a Deer Tag. CDH Validation holders must be hunting on their own valid Deer Tag or Additional Controlled Deer Tag, or be party hunting on the tag(s) of other holders of CDH Validations for the same CDH season
- generally specify that an antlerless or an antlered deer can be harvested using the Deer Tag included with the CDH Validation holder's Deer Licence or Farmer's Deer Licence. However, some validations are for antlered deer only in WMUs 76A, 76B, 76C, 76D, 76E, 77B, 77C, 78A, 78B, 81A and 81B to limit the harvest of antlerless deer while maintaining hunting opportunities

Whether a hunter has been successful in the antlerless deer draw is not relevant to the type of deer they can harvest during a CDH season.

Additional Controlled Deer Tags are specific to a CDH season and may only be purchased by a person who holds a CDH Validation for that season. In contrast, Additional Deer Tags are specific to the Bows Only seasons in WMUs with CDH seasons.

Hunters can apply to the CDH draw in a group of up to 4 hunters so that they will be successful if other group members are successful.

For instructions on how to apply to the CDH draw, go to the How to Apply to Hunt Big Game section (p.38).

Farmer and Landowner Controlled Hunt Validation

Farmers and landowners (or an immediate relative) may be eligible to receive a CDH Validation for 1 CDH season if they meet one of the following criteria:

- they own a parcel of 20 hectares (50 acres) or more of land in a WMU with a controlled hunt
- their occupation is farming and they have an Ontario Ministry of Agriculture, Food and Agribusiness Farm Business Registration Number (or letter of exemption from the Farm Organization Accreditation Tribunal) in a WMU with a controlled hunt
- they are the owner or the sole designated representative (president, vice-president, treasurer or secretary) of a company which owns a parcel of land of 20 hectares (50 acres) or more in the WMU with a controlled deer hunt

Farmers and landowners who meet the eligibility criteria may apply for a CDH Validation by completing an attestation statement online or in person at a participating ServiceOntario or licence issuer. An eligible farmer or landowner meeting the above criteria also qualifies to receive a CDH Validation for one or more immediate relatives. During the application process, the farmer or landowner will indicate if they wish to add any immediate relatives. A separate application can be made if the immediate relative wants a validation for a different CDH season than the farmer or landowner (must be within the same WMU). The farmer or landowner will require the Outdoors Card number of their immediate relative. An immediate relative is a person's grandparent, parent, spouse, sibling, child, step-child or grandchild (including equivalent step-family relationships).

Your experience matters. Share the hunt.

The **Hunter Apprenticeship Safety Program** provides an opportunity to introduce young, aspiring hunters to Ontario's hunting tradition in the same way countless generations have learned before — side-by-side with an experienced mentor.

Traditions don't happen by accident.
They are passed on, one hunt at a time.

Learn more about how the apprenticeship program works on **p.27**.

Turkey Barley Stew

Root vegetables and barley add great flavour to this hearty turkey stew - no one will suspect leftovers.

Preparation Time: 25 minutes

Cooking Time: 1 hour

Makes 6 servings

2 tbsp (25 mL) vegetable oil
2 Ontario Onions, chopped
2/3 cup (150 mL) pearl or pot barley
2 cloves Ontario Garlic, minced
2 each Ontario Carrots and Parsnips, sliced
1-1/2 cups (375 mL) cubed, peeled Ontario Rutabaga
2-1/2 cups (625 mL) sodium-reduced chicken or turkey broth
1 can (28 oz/796 mL) diced tomatoes, undrained
1/4 cup (50 mL) chopped fresh Ontario Parsley
1 tsp (5 mL) each dried thyme leaves and Worcestershire sauce
1/2 tsp (2 mL) dried basil leaves
Salt and pepper
2 cups (500 mL) coarsely cubed cooked Ontario Turkey
1-1/2 cups (375 mL) fresh or frozen Ontario Green Peas
6 crusty rolls

In large saucepan, heat oil over medium heat. Add onions and cook for 3 minutes. Add barley and cook, stirring often, for 4 minutes. Stir in garlic, carrots, parsnips and rutabaga. Stir in broth, tomatoes, half of the parsley, thyme, Worcestershire sauce, basil, salt and pepper to taste; bring to boil. Reduce heat to low, cover and simmer for 40 minutes or until vegetables are tender. Stir in turkey and peas; sprinkle with remaining parsley.

Meanwhile, with knife cut lid from the top of rolls. Scoop out interior, leaving about 1-inch (2.5 cm) thick shell; reserve bread for another use. In small bowl, combine 2 tbsp (25 mL) butter and 1 clove of garlic minced; brush inside of rolls. Place on baking sheet and heat in 350°F (180°C) oven for 5 minutes or until heated through. Place on serving plate and spoon in hot stew.

White-tailed Deer

Chronic Wasting Disease (CWD)

CWD is a highly contagious and deadly disease of white-tailed deer, moose, elk and caribou (cervids) that continues to spread across North America. With the help of hunters, the ministry has found no evidence that CWD is present in Ontario, but it's important to remain vigilant. CWD is very difficult to eliminate once established, and provinces with CWD have seen reduced deer populations over time. We are taking action to keep CWD out of Ontario, monitor for it, and prepare for a rapid, aggressive response if it is detected.

For more detailed information please visit: ontario.ca/CWD.

Signs

CWD is a progressive disease. An infected animal may appear normal and continue to spread CWD for several years before signs are noticeable.

How CWD is Spread

CWD is very contagious. It can be spread through the saliva, urine, faeces and blood of infected animals, or by exposure to a contaminated environment. There is evidence that the abnormal prions that cause the disease may remain infectious in the environment, such as in soil, for years.

CWD and Humans

There have been no reported cases of CWD infection in humans. However, some research suggests it may be possible. Public health agencies recommend that humans and animals do not eat meat or organs from CWD-infected or sick-appearing animals.

Ontario's CWD Plan

Ontario's CWD Prevention and Response Plan is working to minimize the threat posed by CWD and protect the significant benefits provided by cervid species in the province.

Signs of CWD

Similar signs may be observed in other diseases.

*Sometimes no visible signs are shown.

Lack of coordination

Excessive thirst, salivation and urination

Progressive weight loss

Unusual behaviour (such as lack of fear of humans)

Help us monitor wildlife health

If you find a wild animal in Ontario that looks sick, is acting strange or is dead, please report it and consider submitting samples (where feasible) to the Canadian Wildlife Health Cooperative (CWHC).

- Call 1-866-673-4781
- Learn more online at CWHC.WildlifeSubmissions.org

You can submit samples at no cost.

Thank you for helping us monitor disease in wildlife to keep Ontario's wildlife healthy.

ontario.ca/WildlifeHealth

Ontario 

White-tailed Deer

Keeping Chronic Wasting Disease Out of Ontario

Ontario has a number of laws in place to help prevent CWD from entering Ontario.

Allowed to import:

- packaged and deboned meat
- finished taxidermy mounts
- tanned hides and skins
- cleaned skull plate and antlers with no tissue attached

Illegal to possess or use:

- products (including lures) that contain bodily fluids from cervids for any purpose, including hunting

Most jurisdictions have rules in place governing the transport of cervid carcasses. Contact the jurisdictions where you intend to transport cervid carcasses to avoid inconvenience, potential seizure of game and charges.

Our best defense against CWD is to prevent it from arriving in the first place.

How Hunters and the Public Can Help

- Know, follow and tell others about CWD prevention rules

- Avoid feeding wild cervids to limit the spread of disease
- Only use synthetic (artificial) or plant-based attractants
- Only use bait produced in Ontario
- Practice safe carcass handling procedures (such as wear rubber or latex gloves when field dressing deer, and minimize contact with eyes, brain, spinal cord, spleen, tonsil, lymph nodes, or bones of the skull and spinal column)
- Report any deer displaying signs of illness by noting the location, taking photos if it is safe to do so, and contacting the Canadian Wildlife Health Cooperative at 1-866-673-4781, the Natural Resources Information and Support Centre at 1-800-667-1940, or emailing cwd@ontario.ca
- Immediately contact cwd@ontario.ca or your local MNR work centre if you become aware of a positive CWD test from an animal that was harvested out-of-province, so that your meat can be safely disposed
- Take part in the annual CWD Surveillance Program by providing samples of any deer harvested in a surveillance area. Learn more about the program, how to submit a sample and get your results at ontario.ca/CWD

Help keep Chronic Wasting Disease (CWD) out of the province.

If you hunt cervids outside of the province, such as deer, moose or elk, you can only bring back the following low CWD-risk parts:

- butchered, deboned and packaged meat
- a cleaned skull plate and antlers
- tanned hides and capes
- finished taxidermy mounts

It's illegal to bring any other cervid parts into Ontario. Be sure to review the rules for the import and possession of any cervid species.

Help keep Ontario's cervid populations healthy. **#ProtectTheHunt**

Roadway safety

It is illegal to shoot from, down or across a public road in any part of the province.

Ontario 

Help prevent the establishment of invasive wild pigs in Ontario

To report invasive wild pig sightings:

- email wildpigs@ontario.ca
- call 1-833-933-2355

Do not hunt pigs; it is illegal.

Remember that:

- any pig outside of a fence is a wild pig
- MNR responds to all sightings

ontario.ca/WildPigs

Ontario 

Cervid Family Comparison

Ontario has 4 different wild members of the cervid/ deer family. You must have a valid licence and tag for the species you are hunting. There is no open season for caribou and a limited open season for elk, so you must be absolutely certain that the animal you see is the right species, sex and age.

There are differences in the size, shape and colour of moose, white-tailed deer, elk and caribou.

Woodland caribou (no open season)

Size: 1.0 to 1.2 m at the shoulders

Bull: 160 to 210 kg

Cow: 110 to 150 kg

Elk (limited open season for residents)

Size: 1.2 to 1.5 m at the shoulders

Bull: average 354 kg

Cow: 227 to 239 kg

Moose

Size: 1.5 to 1.8 m at the shoulders

Bull: 400 to 545 kg

Cow: 375 to 535 kg

White-tailed deer

Size: 0.9 to 1.1 m at the shoulders

Adult buck: 45 to 136 kg

Adult doe: 39 to 60 kg

Moose

Moose seasons

Moose Tags are valid only for the WMU, moose type(s) and season(s) indicated on the tag. A Bull Tag or a Cow/Calf Tag valid for the Bows Only season (that is, a “bow tag”) is valid only during the Bows Only season. A Bull Tag or a Cow/Calf Tag valid for the every firearm/“gun” season is valid only during that season. Calf Tags are valid for the full length of the moose hunting season(s) in the WMU they are issued for (such as in both the Bows Only and “gun” seasons).

Rifles, Shotguns, Muzzle-loading Guns and Bows (the “gun” seasons when “gun tags” are valid)

Wildlife Management Unit	Resident – open season	Non-resident – open season
1A, 1C, 1D, 16-17, 25	September 19 to December 15	September 21 to November 15
2-4, 18A, 18B	October 10 to December 15	October 12 to November 15
5, 6, 7B, 8, 9A, 9B, 11A, 11B, 12-15, 19, 21A, 21B	October 17 to December 15	October 19 to November 15
22, 23, 28-42	October 17 to November 15	October 19 to November 15
24, 27	October 10 to November 15	October 12 to November 15
26	September 19 to October 31	September 21 to October 31
46-50, 53-63	October 19 to October 25	None

Note: The hunting of predominantly white-coloured moose (over 50 percent white) is not permitted in WMUs 30 and 31.

Bows and Muzzle-loading Guns Only (seasons when bows and muzzle-loading guns only tags are valid)

Wildlife Management Unit	Resident – open season	Non-resident – open season
7A	October 17 to December 15	October 19 to November 15
18B	September 19 to October 9	September 19 to October 9

Moose

Bows Only

(seasons when “bow tags” are valid)

Wildlife Management Unit	Resident – open season	Non-resident – open season
2-4, 18A, 24, 27	September 19 to October 9	September 19 to October 9
5, 6, 7B, 8, 9A, 9B, 11A, 11B, 12-15, 19, 21-23, 28-33, 35-42	September 26 to October 16	September 26 to October 16
46-50, 53-63	October 3 to October 9	None

Note: The hunting of predominantly white-coloured moose (over 50% white) is not permitted in WMUs 30 and 31.

Resident Seasons with Controlled Hunter Numbers

Wildlife Management Unit	Resident – open season	Firearm type	Restrictions
11B	September 26 to October 16	Rifles, shotguns, muzzle-loading guns	For hunters with a lower limb disability (go to the Opportunities for Moose Hunters with Lower Limb Disabilities section on p.58).
65	October 5 to October 7	Bows only	For hunters with a lower limb disability (go to the Opportunities for Moose Hunters with Lower Limb Disabilities section on p.58). For WMU specific rules, go to the Moose Hunting in WMU 65 section on p.58.
65	October 8 to October 14	Bows only	For WMU specific rules, go to the Moose Hunting in WMU 65 section on p.58.

Moose Hunting Requirements

Anyone wishing to hunt moose in Ontario must have the following:

- Outdoors Card
- Moose Licence listed on your Licence Summary
- Moose Tag (valid for the appropriate season/firearm, area, and type of moose) **or** be party hunting with a person who has a valid Moose Tag
- proof of firearms accreditation (if you are hunting with a gun)

Reminders

Applying to the Moose Tag Allocation Process does not provide you with a Moose Licence. To party hunt with a tag holder, you must purchase a

Moose Licence prior to your hunt. In order to hold a Moose Tag you must purchase a Moose Licence.

A Moose Licence does not include a Calf Tag. WMU-specific Calf Tags can be applied for through the allocation process described on p.58 of this section and at ontario.ca/MooseTagProcess.

Tag types are:

- Bull Tags valid only for the harvest of a bull moose and specific to a WMU and season (such as Bows Only season)
- Cow/Calf Tags valid for either a cow OR a calf moose and specific to a WMU and season (such as gun season)
- Calf Tags valid only for the harvest of a calf moose and specific to a WMU and all seasons (such as both the Bows Only and gun seasons)

Moose Hunting Regulations

Tagging and Transporting

Go to the Tags section (p.19) for details on tagging and transporting. For additional information on shipping and exporting, go to the General Regulations section (p.37).

Mandatory Hunter Reporting

There is a mandatory hunter reporting requirement for all Moose Licence holders. Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including moose, may only be hunted with a firearm (includes bows). When hunting moose, you may only use or carry a firearm of the type (rifle, shotgun, muzzle-loading gun or bow) permitted for hunting moose at that time in that WMU. For example, when hunting moose during a Bows Only season, you may only use and carry a bow. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting moose are found in the General Regulations section (pp.28 to 37).

Party Hunting for Moose

Party hunting is permitted during the open season for moose under a set of specific conditions. The list of conditions is listed in the General Regulations section (p.32).

To party hunt on a Moose Tag from a tourist outfitter, you must be a registered guest of the outfitter. Go to the Hunting with a Tourist Outfitter Section (p.64).

Moose Hunting in WMU 65

In WMU 65 there are no dogs allowed. Hunters wishing to hunt moose in WMU 65 are required to obtain written landowner permission. Hunters must

have a tag specifically valid for WMU 65 or have a partner permit (in addition to their Moose Licence) that is associated with the hunter who has a tag validated for WMU 65. Contact Kemptville Work Centre at 1-613-258-8204 for details.

Opportunities for Moose Hunters with Lower Limb Disabilities

Hunters with disabilities may apply for a Moose Tag in any WMU, however there are 2 WMUs (11B and 65) that offer seasons specifically for resident moose hunters with lower limb disabilities. Hunters who qualify for these seasons are people who:

- have paraplegia or hemiplegia
- have a single, above the knee, lower limb amputation, or a double, below the waist amputation
- have a severe disability and cannot hunt without the use of a wheelchair (or similar means of locomotion). These cases require a medical certificate

Qualified hunters wishing to take part should apply for a tag in the points-based allocation process. Such applications will be considered like any other; there are no separate quotas.

For more information regarding WMU 11B, please contact Thunder Bay Work Centre at 1-807-475-1471. For more information regarding WMU 65, please contact the Kemptville Work Centre at 1-613-258-8204.

Points-based Moose Tag Allocation Process

Overview

- Moose Tags are distributed to Ontario residents using a points-based process
- The process includes 2 stages with different application periods: the primary allocation stage and the second chance allocation stage
- Hunters awarded a tag in either stage will decide whether to claim it before the respective tag claim deadline

Moose — Tag Allocation Process

- The minimum points required to be awarded each tag type and whether tags remain available beyond the first choice is not set in advance, but is determined solely by how many hunters choose each tag type relative to the quota and their points
- Go to What to Consider When you Apply (p.67) for information about last year's allocation results

Primary Allocation Stage

Tag quotas and hunt codes are available at [ontario.ca/MooseQuotas](https://www.ontario.ca/MooseQuotas) or by calling **1-800-288-1155**. Hunt codes are also available on p.73.

Review Quotas and Apply: April 1 to April 30

- **April 1** – MNR publishes tag quotas for the primary allocation stage and the application period opens
- Hunter pays \$15 application fee
- Hunter can make up to 3 choices for a tag type: WMU, moose type and season/firearm type. Go to p.57 for information on tag types. You can apply for a point directly by selecting WMU "99Z" (hunt code "999") as your first choice rather than applying for a tag. You will be allowed to change your mind and apply for a tag in the second chance allocation stage. Complete your application by **April 30** for the primary allocation stage. Hunters are encouraged to apply early in the application period and make sure to keep record of their application receipt or confirmation number for reference
- You can apply online at [HuntAndFishOntario.com](https://www.HuntAndFishOntario.com), by calling the automated phone line at 1-800-288-1155 or in person at a licence issuer or participating ServiceOntario
- Go to the How to Apply to Hunt Big Game section on (p.38) for more information and (p.63) for service options

How it Works

Each tag type is allocated separately in a series of up to three steps:

1. Each tag type will be allocated to the hunters with the most points who selected that tag type as their first choice.
 - For example, all first-choice applicants for a given tag type will be ordered by their points. Tags will be awarded in descending order from highest to lowest points.
2. If tags remain available, the applicants with the most points that selected that tag type as their second choice will be awarded tags.
3. If tags are still available, this process will be repeated for third-choice applicants.

A random draw will be used to break ties when there are more applicants with the same points than the number of tags that remain available.

Check Primary Allocation Results and Claim Tag: May 16 to June 8

- Allocation results for the primary allocation will be available **May 16**
- Check if you were awarded a tag online at [HuntAndFishOntario.com](https://www.HuntAndFishOntario.com) or by calling the automated phone line at 1-800-288-1155
- Claim your tag before the **June 8** deadline by buying your Moose Licence and purchasing your tag. Fees are described on p.14
- Your points will reset to zero when you claim a tag awarded in the primary allocation stage
- You can claim your tag by purchasing a Moose Licence and your tag online, by phone or at a licence issuer or participating ServiceOntario
- You must claim your tag by **June 8** for it to be issued to you. Unclaimed tags will be made available for other hunters to apply for in the second chance allocation stage
- There is currently no penalty for not claiming a tag
- Hunters who choose not to claim a tag or who are unsuccessful in the primary allocation stage can apply to the second chance allocation stage without paying a second application fee

Second Chance Allocation Stage

Apply: June 15 to July 7

- On **June 15**, MNR publishes the remaining number of tags available for the second chance allocation stage and the second chance application period opens
- Numbers of tags remaining available can be accessed at ontario.ca/MooseQuotas or by calling 1-800-288-1155. Hunt codes for remaining tag types will remain unchanged between stages
- Tags available will include those that weren't applied for, or went unclaimed in the primary allocation stage
- Hunters can submit a new application to the second chance allocation stage unless they already claimed a tag in the primary allocation stage. Your previous choices will not automatically carry forward to the second chance allocation
- Hunters can again make up to 3 choices for a tag type
- Hunters can select WMU "99Z" (hunt code "999") as their first choice if they do not wish to be awarded a tag based on points. They can also enter a second or third choice for a tag awarded by random draw

How it Works

- Like the primary allocation stage, tags will be awarded to the first-choice applicants with the most points
- If tags remain available, a random draw will be used to allocate tags among hunters who applied for that tag type as their second choice
- If tags are still available, a random draw will be used to allocate tags among hunters who applied for that tag type as their third choice

Check Second Chance Allocation Results and Claim Tag: August 1 to End of Season

- Allocation results for the second chance allocation will be available **August 1**
- You can choose to claim your tag after **August 1** and before the end of the relevant season by buying your Moose Licence and paying for your tag
- You can claim your tag by purchasing a Moose Licence and your tag online or at a licence issuer or participating ServiceOntario
- Your points will reset to zero if you claim a tag you were awarded from your first choice in the second chance allocation stage. If you applied to WMU "99Z" or you chose to claim a tag from your second or third choice you will retain your points and gain a point

Hunting?

WARNING!

Never hunt near power lines, dams and hydroelectric generating stations!
STAY SAFE AND AWAY FROM FACILITIES.

Moose

Draw History and Points

Your Points from the Past Moose Tag Draw

Your current points may reflect points you gained based on your draw history from 1993 through 2020. Go to ontario.ca/MooseTagProcess for more information.

Your Points Under the Tag Allocation Process

Under the points-based allocation process, a hunter will accumulate a single point in any year they apply to one or both allocation stages, if they don't claim a tag awarded based on points.

If you claim a tag awarded based on points from the primary allocation or the first choice of the second chance allocation, your points will reset to zero (early next year).

You will retain your points and will gain a point (early next year) if you claim a tag awarded to you on either your second or third tag choices in the second chance allocation.

You can accumulate a single point per year without being considered for a tag awarded based on points by selecting WMU "99Z" (hunt code "999") with your first choice in either the primary or second chance allocation.

Obtaining a Moose Tag from a tourist outfitter will not affect your points. You cannot hold more than 1 Moose Tag per year. Your points are available through your online account at HuntAndFishOntario.com or by calling the automated phone line at 1-800-288-1155. Please note ServiceOntario and licence issuers are not able to access your points for you.

Northern Ontario Preference Point

Northern Ontario resident hunters will receive a small preference by receiving 1 additional point (non-accumulating) in choices they enter for a northern WMU (WMUs 1-42). This small preference replaced the Northern Resident Draw.

Tag Transfers

Moose Tag transfers are no longer permitted. In exceptional circumstances such as injury, illness or death of the tag holder or an immediate family member; or redeployment by the Canadian Armed Forces, a tag transfer may be considered with written request and documentation. If necessary, please contact the Natural Resource Information and Support Centre at nrisc@ontario.ca.

Why Moose Tag Quotas Change

- Although many factors impact moose, ensuring sustainable harvest levels by adjusting tag quotas is currently the most immediate and effective tool to manage moose populations. Quotas are usually held stable for 3 to 5 years until a WMU has a new moose aerial inventory (MAI).
- Based on MAI results, planned harvests are adjusted to manage the population to be within the WMU's population objective range (POR). Planned harvests consider sustainable numbers with biologically appropriate ratios of bulls, cows and calves.
- If a moose population declines, planned harvests are often reduced to support population growth. If a population grows, an increase in planned harvests can be considered.
- Decisions on whether to increase or reduce planned harvests are based on consideration of a number of factors, including the status of the population relative to its population objective range.
- Tag fill rates are used to calculate tag quotas from planned harvests. Lower tag fill rates allow for a higher tag quota to achieve a given planned harvest. Cow/calf and calf tag fill rates tend to be lowest, so may have higher tag quotas than for bulls, but lower harvests.
- Learn more at ontario.ca/MoosePopulations.

Important dates for moose hunters

 **April 1 to April 30:** primary allocation stage application period

 **May 16 to June 8:** tags awarded in the primary allocation stage available to claim

 **May 16:** Moose Licences become available for purchase

 **June 15 to July 7:** second chance allocation stage application period

 **August 1 to end of season:** tags awarded in the second chance allocation stage available to claim

 **August 18:** tags available to print until end of season

Moose

Moose Hunting Fees

Hunters pay an application fee to apply to the allocation process, instead of having to purchase a licence to apply. Hunters only need to purchase a Moose Licence before claiming a tag or party hunting with a tag holder. Find the application fee, licence fee and tag fees on p.14.

Additional Moose Hunting Regulations for Non-Residents

Non-resident moose hunters can only hunt moose:

- during an open non-resident moose season, and
- as a registered guest of a tourist outfitter hunting on a tag issued to them or a party member by the tourist outfitter, or
- by party hunting on a tag issued through the Moose Tag Allocation Process to an immediate relative who is an Ontario resident, and only on that tag

A non-resident may not party hunt on a tag issued through the Moose Tag Allocation Process to an Ontario resident that is not their immediate relative. Immediate relative means grandparent, parent, spouse, child, sibling or grandchild (including equivalent step-family relationships). An attestation statement verifying the immediate relative relationship must be completed by the non-resident online or in person at a licence issuer or participating ServiceOntario location at the time the non-resident Moose Licence for an immediate relative is purchased.

Non-residents are required to have hunter accreditation that is recognized by Ontario – go to the Hunting Licence Information section for more details (p.16).

Non-residents must employ 1 licensed guide for each 2 hunters when hunting moose in the Territorial District of Rainy River. WMUs with moose hunting seasons in the Territorial District of Rainy River are: 9B, 11A and parts of 7B and 12B (p.12).

Hunting with a Moose Tourist Outfitter

Residents or non-residents can acquire a hunt package that includes a tag from a tourist outfitter if they:

- have the proper hunter accreditation (p.16)
- carry proof of firearms accreditation if hunting with a gun (p.18)
- have a valid Outdoors Card
- haven't already been issued a tag for that year
- are not a person restricted from being provided a tag by the outfitter (for example, an owner or employee, or their immediate relatives)
- follow the outfitter's instructions on purchasing a Moose Licence and the tag before arriving at the outfitter (both must be purchased before an outfitter can provide the tag)

Any hunter issued or party hunting on a tag from an outfitter must have a Moose Licence and be a registered guest of the outfitter. A registered guest must:

- stay in accommodations provided by the outfitter for the duration of the hunt (not the hunter's own camper, tent, etc.)
- carry a registered guest form provided by the outfitter while hunting
- submit a hunter report to the outfitter (except for residents that were not issued a tag; for more information go to pp.22 to 23)

Do the right thing

Self-report wrongfully shot moose to a conservation officer.

Call 1-877-847-7667.

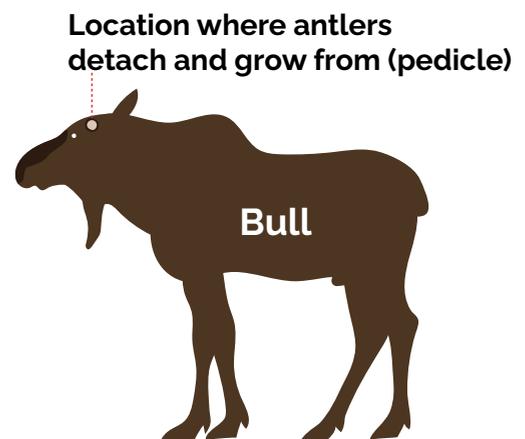

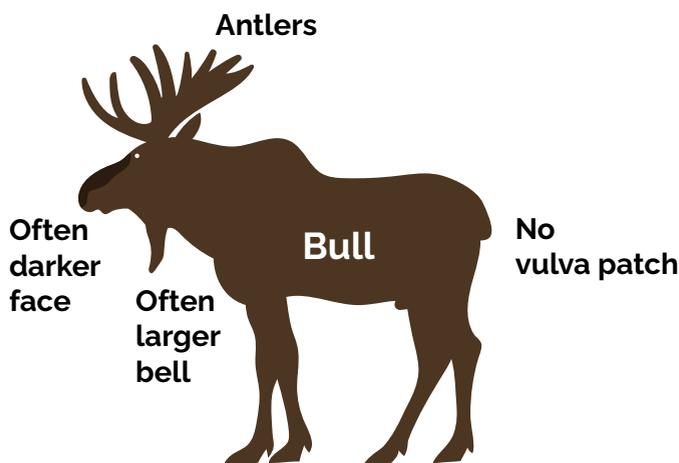

Ontario 

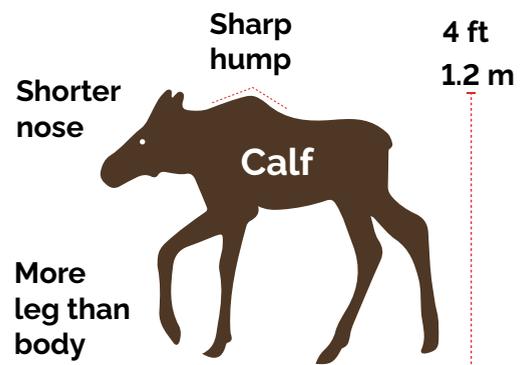

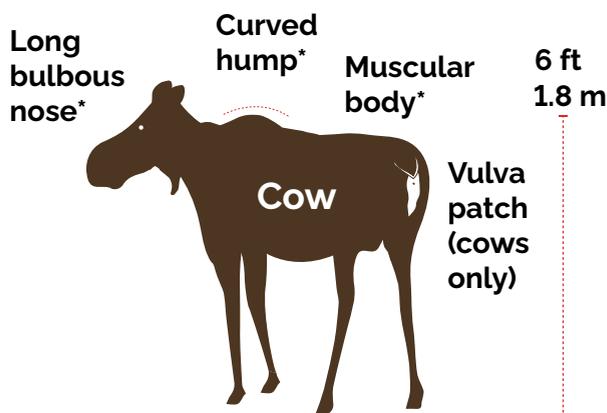

How to properly identify a moose before you shoot

As a moose hunter, you are responsible for properly identifying your target and only harvesting a moose that you or a person you are party hunting with has a valid tag for. Evaluating multiple physical characteristics of the moose will better enable you to correctly identify the age/sex of the moose before harvesting it. If in doubt, do not shoot.

An adult moose (cow or bull) is a moose that is at least one year old at the time of the hunt. A calf moose is a moose that is less than one year old at the time of the hunt.

Bull moose may lose their antlers before the end of the hunting season. A bull tag is still required to harvest a bull moose with or without antlers.

Calf moose are seldom alone.

Last Year's Moose Tag Allocation Process Results

- 90,720 hunters applied for a tag
- 9,996 hunters applied for a point only
- 15,100 tags were available in the primary allocation
- 8,469 tags were available in the second chance allocation

Overall, 13,970 tags were awarded, including:

- 100% of bull tags
- 93% of cow/calf tags
- 87% of calf tags

Of the applicants awarded tags:

- 12% were awarded by random draw (points not applicable (N/A))
- 46% had 0–4 points
- 24% had 5–9 points
- 10% had 10–14 points
- 6% had 15–19 points
- 2% had 20–24 points
- <1% had 25–31 points

The average minimum points required (MPR) for a tag in 2025 remained at 6.8 points in the primary allocation and decreased by 0.2 points in the second chance allocation (6.6 to 6.4) compared to 2024.

The overall percentage of awarded tags that were claimed:

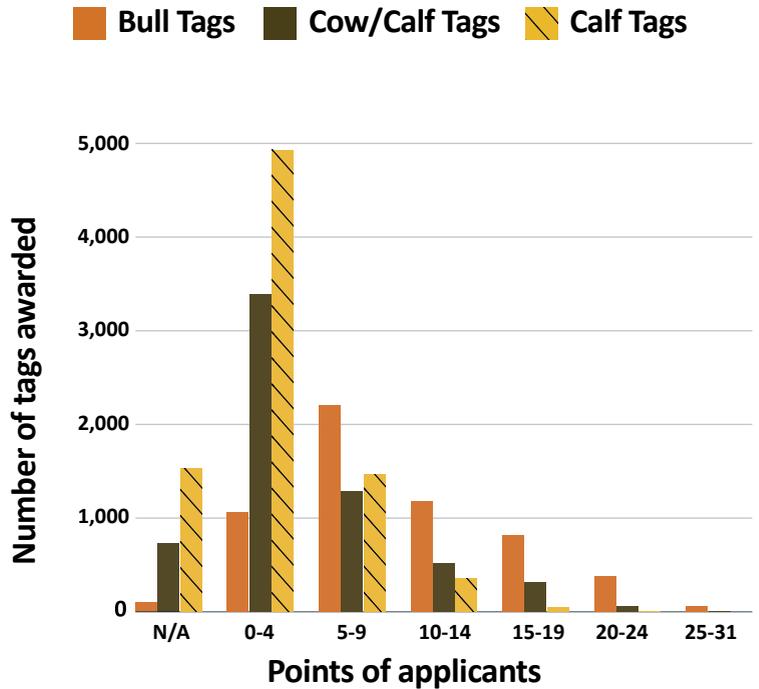

- 83% of bull tags
- 75% of cow/calf tags
- 75% of calf tags

Most hunters' second and third choices had no chance of success. Second choices for tag types with no tags remaining available:

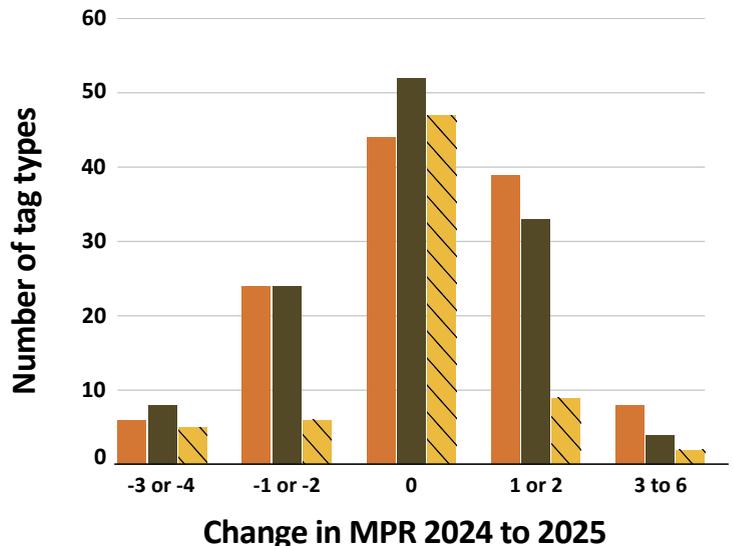

- 97% in primary allocation
- 90% in second chance allocation

Tag types that had an MPR above 0 last year are likely to have all tags awarded to first choices again.

Results datasets are available through ontario.ca/moose. The summary dataset is updated with MPR results after tags are awarded in the primary and second chance allocations.

Tags awarded by points of applicants in 2025. 82% of tags were awarded to applicants with 0 to 9 points or by random draw (points N/A).

The primary allocation minimum points required (MPR) stayed the same for 143 tag types, decreased for 73 tag types, and increased for 95 tag types.

Moose — What to Consider When You Apply

- Last year's minimum points required (MPR) for each tag type in the primary and second chance allocation stages is available in the tables on pp.68 to 72. The MPR may vary from year to year based on tag quotas and the number of points of each applicant.
 - There is no guarantee you will be awarded a tag if you have the MPR for a tag last year. This information is provided to help hunters understand when you may have enough points for your preferred tag type and to apply strategically.
 - For most tag types, a tie-breaking random draw was required to award the remaining tags among applicants that were tied at the MPR. You may have had the same number of points as the MPR but were unsuccessful in a tie-breaking random draw.
 - Your second choice will not be considered for a tag type where all available tags were awarded to first-choice applicants, regardless of how many points you have. For second choices to be considered, all of the first-choice applicants for that tag type need to have been awarded tags (MPR = 0).
 - If you enter a second or third choice, it should be for a tag type likely to be available (MPR = 0 last year) that you would claim.
 - If you are awarded a tag on your first choice, then your second and third choices are not considered in that allocation stage. Similarly, if you are awarded a tag on your second choice, your third choice is not considered in that allocation stage.
 - You cannot be awarded a tag on a later choice that you also applied for with an earlier choice. All of your choices within an allocation stage should be for different tag types.
 - The results tables can also be used to predict which tag types may remain available for second and third choices in either allocation stage. MPR values with an asterisk (*) indicate that there were tags still available after all first-choice applicants had been awarded a tag. These are the tag types most likely to be available when considering second- and third-choices. Tag types without an asterisk had all available tags awarded to first-choice applicants. If you desire one of these tag types, you should select it as your first choice.
 - Your first, second and third choices of the primary allocation, and your first choice of the second chance allocation will require you to use all of your points to claim a tag. Your second and third choices of the second chance allocation do not require you to use your points to claim a tag.
 - **Consider other hunters when applying to the second chance allocation.** A tag you are awarded in the primary allocation that you choose not to claim will be made available in the second chance allocation, but being awarded a tag in the second chance allocation that you don't claim removes that hunting opportunity from other hunters and may mean they miss the moose hunt entirely. Please don't apply for a tag you won't claim.
 - If you are not willing to use your points on a tag in the second chance allocation, then you can apply to WMU "99Z" (hunt code "999") with your first choice and still enter a second (and third) choice.
 - Tags in far Northern Ontario may be in low demand because there is limited to no road access. Moose hunting in **WMUs 1A, 1D and 17** is by water or fly-in access only. The limited roads in **WMUs 1C, 2, 16A, 16C, 18B and 25** concentrate hunters, potentially lowering hunter success. Please consider these aspects before applying to these WMUs.
 - Learn more about what to consider when you apply at ontario.ca/MooseTagProcess.
 - More detailed moose tag allocation results are available through ontario.ca/moose.
- Notes for tables on pp.68 to 72:** WMUs not listed did not have a quota of that type last year. Second Chance Minimum Points Required is not applicable (N/A) where there were no Second Chance Tags Available. The MPR values include the Northern Ontario preference point (p.61). MPR values with an asterisk (*) are tag types that were available after all first-choice applicants had been awarded a tag. Values without an asterisk had all available tags awarded to first-choice applicants. For WMU 18B "bow" tags are for the bows and muzzle-loading guns only season.

^ For these WMUs, “bow tags” are for the Bows and Muzzle-loading Guns Only season.

“N/A” indicates the WMU does not have the applicable season.

Note: Not all hunt codes listed may have a quota. Check quotas online at ontario.ca/MooseQuotas or by calling 1-800-288-1155.

Elk season

Wildlife Management Unit	Resident – open season
57, 58, 60–62, 63A	September 21 to October 4

Note: There is no open season for non-residents. Elk Tags are valid for Harvest Areas (p.77), which are areas smaller than Wildlife Management Units.

Elk Hunting Requirements

Anyone wishing to hunt elk in Ontario must have the following:

- Outdoors Card
- Elk Licence listed on your Licence Summary
- Elk Tag (for appropriate, harvest area and type of elk) or be party hunting with a person who has a valid Elk Tag in accordance with the modified party hunting rules for elk
- proof of firearm accreditation (if you are hunting with a gun)

Elk Draw

Tag quotas and hunt codes are available online at ontario.ca/ElkQuotas.

For a chance to hunt elk, a resident hunter must apply to the draw for a tag and pay the draw application fee. Applicants cannot select a Bull or Cow Tag type; these will be randomly assigned.

Hunters can apply to the draw in a group of up to 4 hunters.

For further instructions on how to apply to the Elk Draw, go to the How to Apply to Hunt Big Game section (p.38).

Note: Hunters who are successful in the Elk Draw and are issued an Elk Tag are not eligible to receive another Elk Tag in their name for 5 years, but may continue to be listed as a member of a group and party hunt for elk during this time.

Elk quotas and hunt codes are available online!

ontario.ca/ElkQuotas

Elk Hunting Regulations

Tagging and Transporting

Go to the Tags section (p.19) for details on tagging and transporting. Additional information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting

Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Big game, including elk, may only be hunted with a firearm (this includes bows). When hunting elk, you may only use or carry a firearm of the type permitted for hunting elk at that time in that WMU. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting elk are found in the General Regulations section (pp.28 to 37).

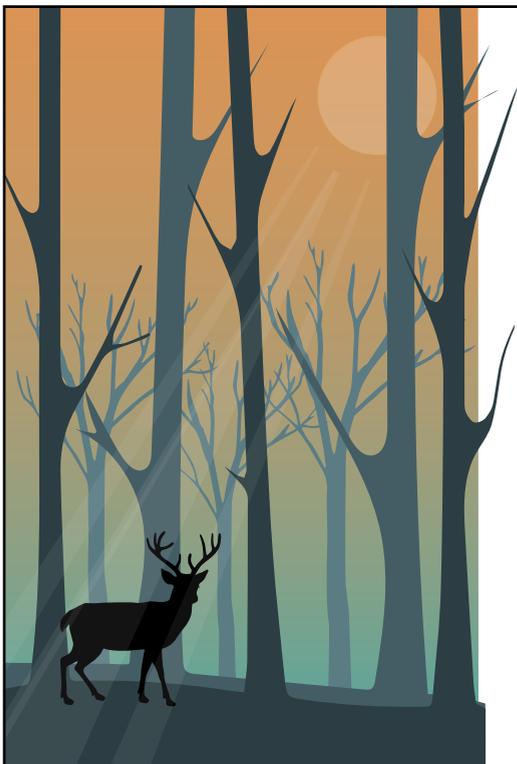

Modified Party Hunting for Elk

Party hunting rules are listed in the General Regulations section (p.32). Additional party hunting rules apply for elk, which include:

- a person may only party hunt with the holder of an Elk Tag if they are part of the tag holder's hunting group, with the validation number listed on their licence. Hunters wishing to party hunt for elk must apply to the Elk Draw as a group and list all members on the same application
- party hunting for elk is limited to a maximum of 4 hunters (including the tag holder, but not including apprentice hunters)
- multiple parties may not hunt cooperatively

Dogs

Dogs may not be used to hunt elk. Dogs may be used to track an elk that has been wounded during a lawful hunt. Go to the General Regulations section (p.33) for details.

Are you hunting big game?

Make sure you carry:

- ✓ Outdoors Card
- ✓ Licence Summary listing the licence for the species you are hunting (printed or PDF saved to your charged mobile device)
- ✓ your tag for the species you are hunting (printed), or be party hunting with a person who has a printed tag
- ✓ proof of firearms accreditation if you are hunting with a gun

Elk Hunting on Private Property

If you wish to hunt elk on private land, you must carry your valid Elk Licence and the written consent of the landowner on the form provided by MNR. Forms are available for download online at ontario.ca/HuntElk.

Last Year's Elk Draw Summary

General Draw Statistics

- 12 total tags available
- 2,166 total applicants entered in the draw

First Choice Applications by Area

- Area 2, WMU 57: **775**
- Area 5, WMU 61: **768**
- Area 6, WMU 61: **623**

Elk Tag Transfers

A transfer of an Elk Tag can only occur within a group of hunters that applied to the draw as a group. Groups are permitted 1 automatic transfer each year. You can complete automatic tag transfers yourself by accessing your account in the Fish and Wildlife Licensing Service at HuntAndFishOntario.com from August 1 to 18 or by visiting a participating ServiceOntario. Beginning August 19, tag transfers can only be completed at a participating ServiceOntario with an application, and the return of the original Elk Tag if it has been printed from the Fish and Wildlife Licensing Service. After the season opens, the transfer of an Elk Tag will only be considered under specific circumstances, approved by MNR.

A message from Ontario's conservation officers

It is an offence to shoot an animal you are not authorized to hunt. Use binoculars to make sure of your target and confirm the area behind the animal is safe.

Call 1-877-847-7667 if you suspect any fish and wildlife violations.

Going hunting?

Debris and grass build-up under your ATV can heat, fall and ignite! Reduce the risk of sparking a wildland fire.

1. Keep your machine clean.
2. Stop often and remove any debris from your ATV.
3. Let your machine cool.
4. Ensure your ATV has a proper spark arrestor.
5. Pack a shovel, collapsible pail or fire extinguisher in case of fire.

It's wildland fire season, don't be the reason.

ontario.ca/FirePrevention

Elk Harvest Areas

For the purposes of harvest management, Elk Tags are valid for areas smaller than a WMU, referred to as Harvest Areas.

Harvest Area 1: The part of WMU 57 west of a line formed by Hwy 62 south of Maynooth and Hwy 127 north of Maynooth.

Harvest Area 2: The part of WMU 57 east of a line formed by Hwy 62 south of Maynooth and Hwy 127 north of Maynooth.

Harvest Area 3: The part of WMU 58 south and west of the Madawaska River.

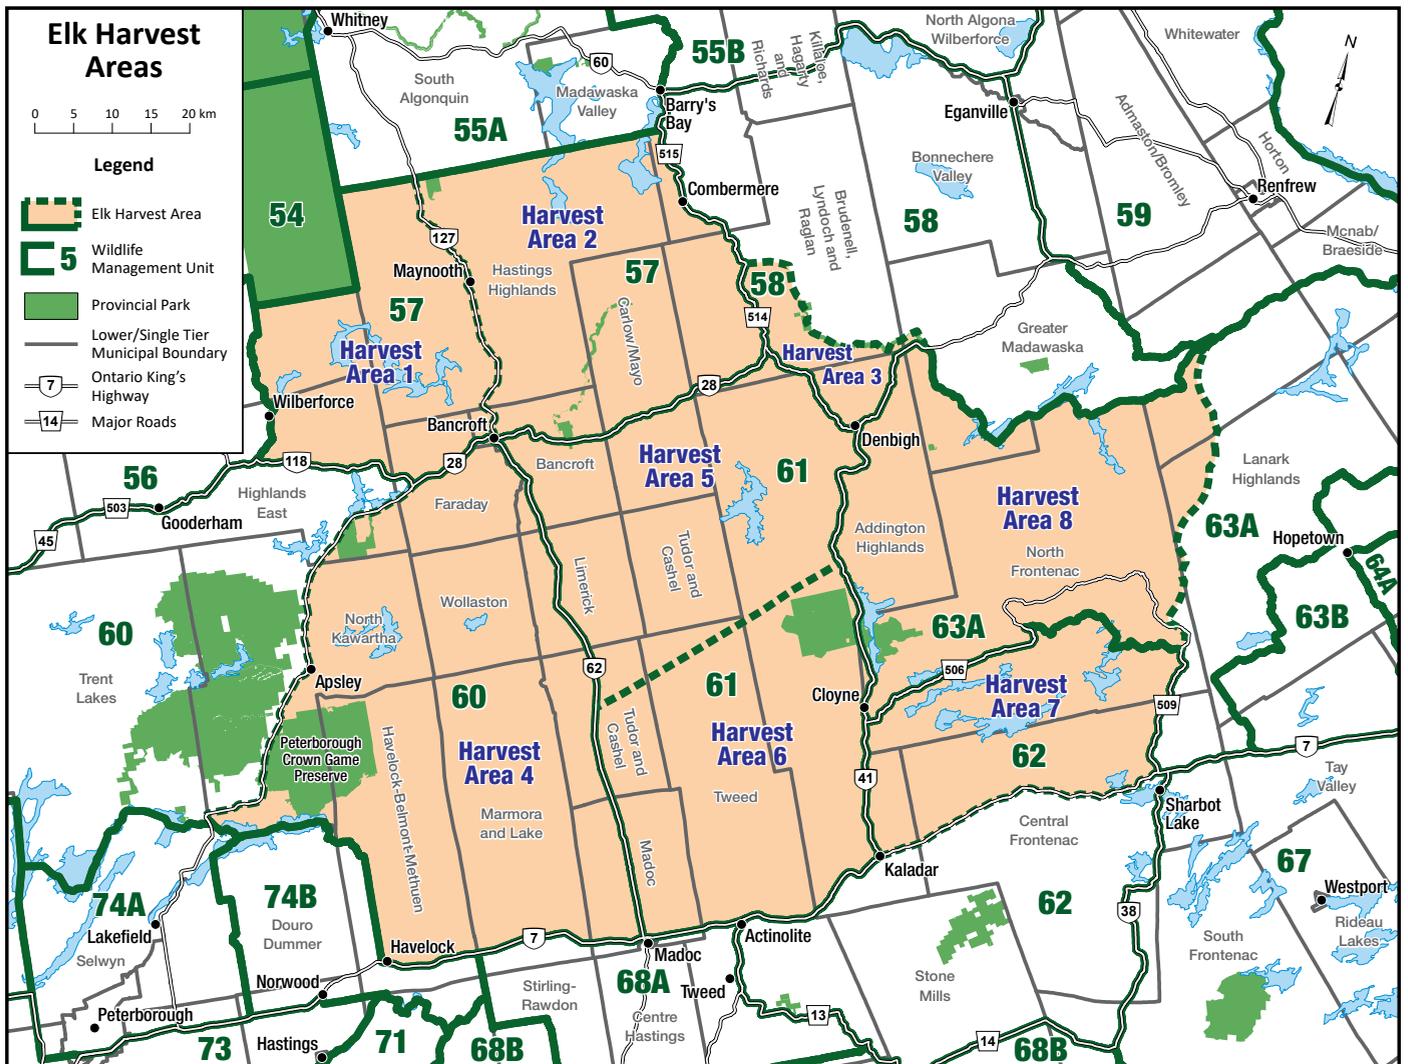

Harvest Area 4: The part of WMU 60 east of Hwy 28.

Harvest Area 5: The part of WMU 61 north of the northern edge of the Hydro One transmission line running through Tudor, Grimsthorpe and Effingham Townships.

Harvest Area 6: The part of WMU 61 south of the northern edge of the Hydro One transmission line running through Tudor, Grimsthorpe and Effingham Townships.

Harvest Area 7: The part of WMU 62 north of Hwy 7.

Harvest Area 8: The part of WMU 63A west of the former K&P Railway line.

Black Bear

Black bear seasons

Spring black bear seasons

Wildlife Management Unit	Resident and non-resident — open season
1A, 1C, 1D, 2–6, 7A [^] , 7B, 8–10, 11A, 11B, 12–19, 21–50, 53–64, 66–69, 71–76	May 1 to June 15
82A*, 83, 84*	May 1 to May 7

[^] Only bows and muzzle-loading guns are permitted in WMU 7A.

* Indicates bear hunting is only permitted in the geographic townships of Keppel and Sarawak in WMU 82A, the geographic township of Amabel in WMU 84.

Note: The shooting of cubs or female bears accompanied by a cub is not permitted during the spring season.

Fall black bear seasons

Wildlife Management Unit	Resident and non-resident — open season
1A, 1C, 1D, 2–6, 7A [^] , 7B, 8–10, 11A, 11B, 12–19, 21–45	August 15 to October 31
46, 47, 49, 50, 53, 64, 66, 67, 69, 71–76	September 28 to November 30
48, 54–63, 68	September 1 to November 30

[^] Only bows and muzzle-loading guns are permitted in WMU 7A.

Note: It is illegal to hunt black bear in the fall in the Bruce Peninsula, which includes WMU's 82A, 83 and 84.

Black Bear Hunting Requirements

Anyone wishing to hunt black bear must have the following:

- Outdoors Card
- Bear Licence listed on your Licence Summary
- Bear Tag, or be party hunting with a person who has a valid Bear Tag
- proof of firearm accreditation (if you are hunting with a gun)

In addition, non-residents are also required to have a Black Bear Hunting Validation Certificate.

Note: A licensed trapper is permitted to hunt black bear under the authority of the Trapping Licence and in the area designated on the licence.

Black Bear

Black Bear Hunting Regulations

Tagging and Transporting

Go to the Tags section (p.19) for details on tagging and transporting. Bear Licences and tags are valid for both the spring or fall season.

Mandatory Hunter Reporting

Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report. Resident hunters should note that the reporting requirements have changed.

Firearms

Big game, including black bears, may only be hunted with a firearm (includes bows). If you are hunting deer or moose at the same time that you are hunting black bear, you must only use or carry (on your person, in a vehicle or boat) a firearm of the type permitted for deer or moose, as the case may be, at that time in that WMU. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting black bear are found in the General Regulations section (pp.28 to 37).

Party Hunting for Black Bears

Party hunting is permitted during the bear season under a set of specific conditions. The list of conditions are listed in the General Regulations section (p.32).

Bait Placement

During the spring and fall black bear seasons, bait may not be placed for the purpose of bear hunting within:

- 500 m of a dwelling, unless written permission is obtained from the owner of the dwelling
- 500 m of a public building
- 30 m of a right of way for public vehicular traffic or a sign posted/marked recreational trail that is established and maintained by an organization for the general public

Export and Shipping

Go to the General Regulations section (p.37) for information on import, export and shipping.

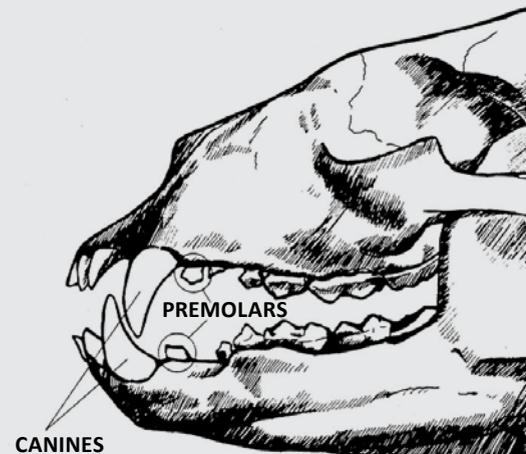

In some instances, both a Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and a Provincial Export Permit are required. A resident or non-resident black bear hunter wishing to export a black bear out of Canada must contact Environment and Climate Change Canada (p.94) to arrange to obtain a Canadian CITES export permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES-listed species that you may harvest. Please allow up to 21 days to obtain a permit.

A Canadian CITES export permit is required for taxidermy mounts, black bear organs and other parts (such as baculum). **Note:** It is illegal to be in possession of a black bear gallbladder.

Voluntary Black Bear Tooth Submission Form

All successful black bear hunters are encouraged to submit 2 premolar teeth from each black bear harvested to assist in determining the age structure and genetic analysis of local bear populations. Go to the back side of this form for required information.

If you would like to receive an Ontario Bear Hunter Crest as a thank you, please include your Outdoors Card number.

A CITES permit is not required for U.S. or Canadian resident black bear hunters transporting their black bear hunting trophy consisting of the hide, hide with paws and claws attached, skull and/or meat in a fresh, frozen or salted condition back to the U.S. or through the U.S. en route to another part of Canada at the conclusion of their hunt. The hunter must be accompanying the black bear in these cases.

In some countries and provinces, importation of black bears is regulated; requirements for importation should be determined by the exporter prior to shipment.

Second Bear Tags

WMU-specific bear second tags may be available to resident bear hunters in WMUs where population levels permit. The second tag allows you to harvest a second black bear in the WMU specified on the tag. A second tag purchased in the spring can be used in either the spring or fall season. A Bear Licence is required before a second tag can be purchased. A second tag can be used before the tag received with the licence is filled. These tags are available through the Fish and Wildlife Licensing Service at HuntAndFishOntario.com. Second tags are available April 15 — visit ontario.ca/HuntingUpdates or a participating ServiceOntario at that time for information on WMUs where second tags are available.

Non-Resident Hunting Regulations

All non-residents are required to hunt through an operator licensed to provide black bear hunting services (such as guiding and baiting services).

To hunt a black bear in Ontario non-residents must have an Outdoors Card, a Non-Resident Bear Licence, a Bear Tag and a Black Bear Hunting Validation Certificate. The Non-Resident Bear Licence is valid in both the spring and fall seasons. A Black Bear Hunting Validation Certificate must be obtained from the licensed bear operator who has been contracted to provide black bear hunting services to the non-resident client.

A non-resident hunter must hunt only in the areas designated on the Black Bear Hunting Validation Certificate issued by the operator. These areas can include Crown or private land located within a Bear Management Area (BMA) and private land located within a WMU listed on the operator's licence. The operator's licence does not permit the operator to provide bear hunting services on private land located within a BMA licensed to another operator. The operator must have the landowner's permission in order to provide black bear hunting services to clients on private land.

Other Regulations

It is illegal to:

- possess a bear gallbladder that has been separated from the carcass

Please cut out at the dotted line, complete information required, and include with teeth:

Sex of harvested bear:

WMU within which the bear was harvested:

Date the bear was harvested:

Outdoors Card Number:

Resident black bear hunters can submit teeth along with this form, including the required information, by mail to:

Big Game Harvest Assessment Program
Natural Resources Information Section
Ministry of Natural Resources
1350 High Falls Road
Bracebridge, ON, P1L 0L1

Non-residents can submit teeth to their operator, who will submit the teeth on your behalf.

Black Bear

- let spoil or abandon the flesh of any harvested game wildlife, including black bear, that is suitable for food
- hunt black bears within 400 m of a waste disposal site, regardless of whether the land is Crown or private
- shoot or interfere with black bears in their dens, or damage or destroy their dens

Note: Anyone wanting to provide black bear hunting services (such as guiding or baiting) to resident hunters in a BMA must possess a Licence to Provide Bear Hunting Services that allows them to provide services within that BMA.

Black Bear Population Surveys

Barbed Wire Hair Trap (BWHT) survey stations may be established in several WMUs and monitored weekly from mid-May to the end of June. If you encounter a survey station, for your safety and the integrity of the data, please do not disturb the station.

Voluntary Black Bear Tooth Submission

Information derived from hunters' reports and hunter-submitted teeth contributes to assessments of the sustainability of black bear harvests and helps our scientists to address various questions about black bear ecology and management. Specifically, we use the hunter-reported sex and age estimated from the teeth to calculate the percentages of females, and of adult females, in the harvest. This information is used to help us better manage Ontario's black bear population.

Personal information is collected under the authority of the *Fish and Wildlife Conservation Act, 1997*, and will be used to fulfill your request for an Ontario Bear Hunter Crest. The crest will be mailed to the existing address on file (collected when the Bear Licence was purchased). Questions about the collection and use of this personal information should be directed to the Natural Resources Information and Support Centre at 1-800-387-7011.

How to Extract Teeth

The first premolar is a small, single-rooted peg-like tooth located just behind the canines. Premolar teeth are most easily extracted shortly after the animal has been killed while the jaw is still pliable. Care should be taken when extracting the tooth to ensure that the root is not broken. To remove the tooth, push the blade of a knife down along all sides of the tooth between it and the gum. Gently loosen the tooth by rocking it back and forth using the canine for leverage, then carefully remove the tooth using pliers. Avoid cleaning teeth by scraping or boiling as it limits the ability to obtain the necessary data.

A small amount of flesh attached to the tooth assists in genetic analysis of bear populations. The amount of flesh should not exceed the size of the tooth. The tooth should be allowed to dry before packaging.

Aging Premolars

To age a tooth, a thin section is taken from the root of each tooth. The section is then stained to make it easy to see the rings of the tooth. Just like rings in a tree, the rings visible on the root of the tooth can be counted to indicate the age of the bear.

Wild Turkey

Spring wild turkey season – shotgun or bow

Wildlife Management Unit	Resident and non-resident — open season	Bag limit
36, 42, 45, 46–50, 53–65, 66A, 67–82, 83A, 84–95	April 25 to May 31	One bearded turkey, per tag

Note: A hunter may purchase a maximum of 2 spring Wild Turkey Tags (only valid for bearded turkey). Two bearded wild turkeys may not be taken on the same day. Turkey hunting during the spring season is restricted to half an hour before sunrise to 7:00 p.m.

Fall wild turkey season – shotgun or bow

Wildlife Management Unit	Resident and non-resident — open season	Bag limit
59, 60, 63, 64, 65, 66A, 67–70, 72–78, 80–82, 84–87, 89–94	October 13 to October 25	One wild turkey

Fall wild turkey season – bow

Wildlife Management Unit	Resident and non-resident — open season	Bag limit
59, 60, 63, 64, 65, 66A, 67–70, 72–78, 80–82, 84–87, 89–94	October 1 to October 31	One wild turkey

Note: A hunter may only purchase 1 fall Wild Turkey Tag (valid for either a male or female) and may only harvest 1 turkey during the fall seasons.

Wild Turkey

Turkey Hunting Requirements

Anyone wishing to hunt wild turkeys must have the following:

- Outdoors Card
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card
- Wild Turkey Tag (for the appropriate spring/fall season)
- proof of firearm accreditation (if you are hunting with a gun)

Wild Turkey Hunting Regulations

Tagging and Transporting

Up to 2 spring tags may be purchased per hunter. Two birds may not be taken on the same day. Only 1 fall tag is permitted per hunter.

Go to the Tags section (p.19) for details on tagging and transporting. Information on shipping and exporting can be found in the General Regulations section (p.37).

Mandatory Hunter Reporting

Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

Wild turkey may be hunted using shotguns (including muzzle-loading shotguns) or bows. Specifications on the firearms, ammunition, arrows and broadheads that are permitted when hunting wild turkey are found in the General Regulations section (pp.28 to 37).

Other Regulations

Party hunting is not permitted for wild turkey. You are permitted to call wild turkeys for another hunter after filling your own tag(s), but you must not be in possession of a firearm when doing so. It is illegal to use live decoys or electronic calls while wild turkey hunting in Ontario.

It is illegal to hunt wild turkey within 400 m (437 yd) of any place where bait has been deposited unless the place has been free of bait for at least 7 days. Bait means corn, wheat, oats, other grain, pulse, any other feed that may attract wild turkey or any imitation of such feed. **Note:** Standing crops, crops stacked in accordance with normal farming practices and grain scattered as a result of normal farming operations are not considered bait.

Key Safety Reminders for Wild Turkey Hunting:

- avoid wearing red, white or blue colours
- make sure any decoy or harvested turkey is fully concealed
- when choosing a spot to hunt, select a solid background that is wider than your shoulders and taller than the top of your head
- it is not safe to stalk a wild turkey – it might be another hunter calling or you might be mistaken for a wild turkey yourself
- using a gobble call can be unsafe as other hunters may mistake you for a wild turkey
- alert other hunters by yelling out in a loud, clear voice. **Do not** wave or make turkey sounds
- be sure of your target and beyond

Wolf and Coyote

Wolf and coyote seasons

Wildlife Management Unit	Resident and non-resident — open season	Tag requirement
1A, 1C, 1D, 2–10, 11A, 11B, 12–41, 42*, 46, 47, 48*, 49, 50*, 53A*, 53B, 54*, 55*, 56*, 57*, 58*	September 15 to March 31	2026 Wolf/Coyote Tag (September 15 to December 31) 2027 Wolf/Coyote Tag (January 1 to March 31)
43–45, 59, 60*, 61–74, 75*, 76–95	All year	None

* Indicates there are geographic townships where the wolf/coyote season is closed, which include: Airy, Alice, Allen, Anson, Anstruther, Attlee, Ballantyne, Bevin, Boulter, Boyd, Bruton, Burleigh, Burns, Burwash, Butt, Caen, Calvin, Cameron, Cardiff, Carlyle, Cavendish, Chandos, Chisholm, Clancy, Clara, Clyde, Cox, Curtin, Dalton, Dickens, Dieppe, Digby, Dudley, Eden, Eyre, Finlayson, Foster, Franklin, Fraser, Goschen, Hagarty, Halifax, Hansen, Harburn, Harcourt, Harvey, Havelock, Head, Herschel, Humboldt, Killarney, Kilpatrick, Lauder, Laura, Livingstone, Longford, Lutterworth, Maria, McClintock, McClure, McCraney, McKay, Minden, Monmouth, Murchison, Papineau, Paxton, Petawawa, Richards, Rolph, Roosevelt, Ryde, Sabine, Sale, Secord, Servos, Sinclair, Struthers, Tilton, Truman, Waldie and Wylie.

Wolf and Coyote Hunting Requirements

Anyone wishing to hunt wolf or coyote must have the following:

- Outdoors Card
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card
- Wolf/Coyote Tag (in WMUs where a tag is required) valid for the current calendar year
- proof of firearm accreditation (if you are hunting with a gun)

Wolf and Coyote Hunting Regulations

Residents and non-residents may purchase a maximum of 2 Wolf/Coyote Tags per calendar year. The tags may be purchased separately or at the same time.

It is illegal to hunt or trap wolf or coyote in the areas within and surrounding Algonquin Provincial Park, Killarney Provincial Park, Queen Elizabeth II Wildlands Provincial Park and Kawartha Highlands Provincial Park to help protect Eastern wolf. Go to the Wolf and Coyote Season table (p.84) for more details on these specific closures.

Generally, wolves and coyotes cannot be hunted in provincial parks or Crown Game Preserves.

Wolves and coyotes are considered furbearing mammals. It is illegal to abandon or otherwise allow the pelt of a furbearing mammal to spoil or be destroyed.

Tagging and Transporting

Go to the Tags section (p.19) for details on tagging and transporting.

The tag must remain attached to a wolf or coyote until the pelt has been skinned off the carcass and is being frozen or has been sent for tanning.

Mandatory Hunter Reporting

Go to the Mandatory Hunter Reporting section (p.22) for details on timelines and how to submit your report.

Firearms

There are no special firearm restrictions, other than a maximum calibre restriction, when hunting only for wolf or coyote. You cannot carry or use a rifle of greater calibre than a .275-calibre rifle, except a muzzle-loading gun, in the geographic areas of Brant, Chatham-Kent, Durham, Elgin, Essex, Haldimand, Halton, Hamilton, Huron, Lambton, Middlesex, Niagara, Norfolk, Northumberland, Oxford, Peel, Perth, Toronto, Waterloo, Wellington or York. A person hunting for wolf or coyote while hunting for another species must also ensure they are not in possession of a firearm prohibited for hunting the other species. For example, go to the Small Game and Furbearing Mammals section (p.91). For additional details on firearms, go to the General Regulations section (pp.28 to 37).

Party Hunting

Party hunting for wolves and coyotes is not permitted in areas where a tag is required.

Go to the General Regulations section (p.32) for a definition of party hunting. However, you may hunt co-operatively, meaning all hunters participating must have a valid tag and the hunter who harvests the animal must personally invalidate their tag in accordance with the tagging instructions.

Once you have used your tag, you may not continue to participate in the hunt, unless you possess a second tag. Once you have used both of your tags, you cannot hunt wolf/coyote until the following calendar year. It is illegal to use a Wolf/Coyote Tag to tag a wolf or coyote taken by another hunter.

In areas where a tag is not required and there are no harvest limits, you may hunt co-operatively in a group without restrictions on the number of animals harvested or who can take them.

Royalty, Export, Shipping and Import

Go to the General Regulations section (p.37) for information on import, export and shipping. A royalty is payable to the province at the time that a person obtains an Export Licence for Furbearing Mammals or Their Pelts.

For information on possession of pelts during the closed season, go to the Small Game and Furbearing Mammals section (p.93).

A Convention on the International Trade of Endangered Species (CITES) export permit is also required to export all wolves from Canada. Contact Environment and Climate Change Canada (p.94) to arrange to obtain a Canadian CITES export permit. It is recommended to apply well in advance of the trip and apply for permits for all CITES-listed species that you may harvest. Please allow up to 21 days to obtain a permit.

In some countries and provinces, importation of wolves is regulated; requirements for importation should be determined by the exporter prior to shipment.

Small Game and Furbearing Mammals

Ruffed grouse and spruce grouse seasons

Wildlife Management Unit	Resident and non-resident — open season	Limits
1–4, 16–18, 24–27	September 15 to March 31	Combined daily limit of 5 and possession limit of 15
5–15, 19–23, 28–50, 53–67, 69B	September 15 to December 31	Combined daily limit of 5 and possession limit of 15

Ruffed grouse seasons (no season for spruce grouse in these units)

Wildlife Management Unit	Resident and non-resident — open season	Limits
68, 73–76, 82–84	September 25 to December 31	Daily limit of 5 and possession limit of 15
69A, 70–72, 77–81, 85–95	September 25 to December 31	Daily limit of 2 and possession limit of 6

Sharp-tailed grouse seasons

Wildlife Management Unit	Resident and non-resident — open season	Limits
1–4, 16–18, 24–27	September 15 to March 31	Daily limit of 5 and possession limit of 15
5–15, 19–23, 28–35, 38–41	September 15 to December 31	Daily limit of 5 and possession limit of 15
36, 37, 42–50, 53–67, 69B	September 15 to December 31	Daily limit of 2 and possession limit of 6

Small Game and Furbearing Mammals

Ptarmigan seasons

Wildlife Management Unit	Resident and non-resident — open season	Limits
1–4, 16–18, 24–27	September 15 to March 31	Daily limit of 5 and possession limit of 15

Ring-necked pheasant seasons

Wildlife Management Unit	Resident and non-resident — open season	Limits
1–4, 16–18, 24–27	September 15 to March 31	Daily limit of 10 and possession limit of 10
5–15, 19–23, 28–50, 53–67, 69B	September 15 to December 31	Daily limit of 10 and possession limit of 10
68, 69A, 70–94	September 25 to December 31	Daily limit of 3 and possession limit of 10
95	September 25 to the last day of February	Daily limit of 10 and possession limit of 10

Gray (Hungarian) partridge seasons

Wildlife Management Unit	Resident and non-resident — open season	Limits
36, 37, 42–50, 53–67, 69B	September 15 to December 31	Daily limit of 5 and possession limit of 15
68, 69A, 70–95	September 25 to December 31	Daily limit of 5 and possession limit of 15

Double-crested cormorant season

Wildlife Management Unit	Resident and non-resident — open season	Limits
1–50, 53–95	September 15 to December 31	Daily limit of 15 and no possession limit

Help protect the wetlands that waterfowl depend on by not using Phragmites as blind material.

Phragmites is a restricted invasive plant in Ontario. It is illegal to:

- deposit, release, buy or sell it in Ontario
- bring into, possess or transport within a provincial park or conservation reserve
- launch a watercraft into any body of water in Ontario with aquatic plants (including Phragmites), animals or algae present or attached

68, 69A, 70–95	September 25 to December 31	Combined daily limit of 5 and possession limit of 15

Arctic fox seasons

Wildlife Management Unit	Resident and non-resident — open season
1–4, 16–18, 24–27	October 25 to March 31

Small Game and Furbearing Mammals

Raccoon and opossum seasons

Wildlife Management Unit	Resident and non-resident — open season
1–50, 53–95	October 5 to January 31

Red fox and skunk seasons

Wildlife Management Unit	Resident and non-resident — open season
1–35, 38–41	September 15 to the last day of February
36, 37, 42–50, 53–95	All year

Weasel seasons

Wildlife Management Unit	Resident and non-resident — open season
1–50, 53–95	October 25 to the last day of February

Note: Arctic fox, raccoon, opossum, red fox, skunk and weasel are considered furbearing mammals, which can be harvested under the authority of a Small Game Licence. Generally, furbearing mammals may not be hunted in provincial parks and Crown Game Preserves.

Don't let poachers ruin your hunt

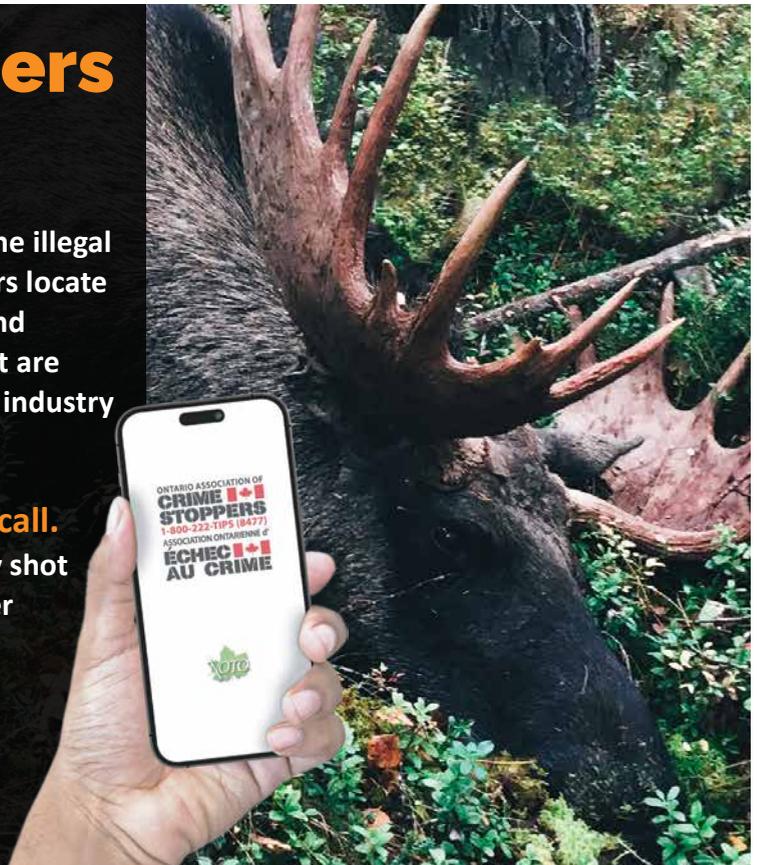

Your hunt of a lifetime can be ruined by the illegal act of just one poacher! Every year hunters locate the rotting carcasses of unlawfully shot and abandoned moose – these are moose that are lost to honest hunters and to the tourism industry that rely on healthy moose populations.

Protect your moose hunt – it's your call.

If you have any information about illegally shot and wasted moose, deer, bear or any other crime, call Crime Stoppers at

1-800-222-TIPS

All calls to Crime Stoppers remain anonymous and you could be eligible for a cash reward.

Small Game and Furbearing Mammals

Falconry seasons and limits

Falconry involves the use of trained raptors (birds of prey, such as red-tailed hawk) to hunt small game. All falconers must have a valid Small Game Licence. A Falconry Licence is required to keep falconry birds in captivity and hunt with them. There are other requirements both for falconry birds and for non-indigenous falconry birds (such as leg bands, reporting, buying/selling limits). For a complete list of all native falconry birds and non-indigenous falconry birds that can be used for falconry in Ontario, go to ontario.ca/falconry. Falconry seasons are from September 1 to March 31 for residents and non-residents.

Species	Wildlife Management Unit	Limits
Ruffed grouse and spruce grouse	1–50, 53–67, 69B	Combined daily limit of 3 and possession limit of 15
Ruffed grouse	68, 73–76, 82–84	Daily limit of 3 and possession limit of 15
Ruffed grouse	69A, 70–72, 77–81, 85–95	Daily limit of 2 and possession limit of 6
Sharp-tailed grouse	1–35, 38–41	Daily limit of 3 and possession limit of 15
Sharp-tailed grouse	36, 37, 42–50, 53–67, 69B	Daily limit of 2 and possession limit of 6
Ptarmigan	1–4, 16–18, 24–27	Daily limit of 3 and possession limit of 15
Ring-necked pheasant	1–50, 53–95	Daily limit of 2 and possession limit of 10
Gray (hungarian) partridge	36, 37, 42–50, 53–95	Daily limit of 2 and possession limit of 15
Cottontail and European hare	36, 37, 42–50, 53–95	Daily limit of 5 Cottontail and 3 European Hare. Possession limit of 15 of each species.
Snowshoe (varying) hare	1–50, 53–67, 69B	Daily limit of 3 and possession limit of 15
Snowshoe (varying) hare	68, 69A, 70–95	Daily limit of 2 and possession limit of 6
Gray (black) and fox squirrel	5–15, 19–23, 28–50, 53–95	Combined daily limit of 5 and possession limit of 15

Bullfrog seasons

Wildlife Management Unit	Resident and non-resident — open season	Daily and possession limit
1–50, 53–59, 72B, 76–95	July 15 to October 15	10

Small Game and Furbearing Mammals

Small Game and Furbearing Mammal Hunting Requirements

Anyone wishing to hunt small game or furbearing mammals must have the following:

- Outdoors Card
- Small Game Licence listed on your Licence Summary or on the back of your Outdoors Card
- proof of firearm accreditation (if you are hunting with a gun)

A tag is required for wild turkey, and for wolf/coyote in select Wildlife Management Units (WMU). Go to the Wild Turkey and Wolf/Coyote sections for more information.

A municipal licence may also be required for hunting ring-necked pheasant, cottontail (rabbit), and hare in some municipalities in Southwestern Ontario. Municipal licences can be obtained from the relevant municipal office. Go to the WMU maps for more information on where a municipal licence is required.

A Falconry Licence is also required to hunt with raptors native to Ontario. For more information, visit: ontario.ca/falconry.

Additional licensing requirements apply to migratory game birds. Go to p.92 and the Hunting Licence Information section (p.15) for more information.

Small Game and Furbearing Mammal Hunting Regulations

A Small Game Licence is not valid in Northern and some parts of Central Ontario from June 16 to August 31. Go to WMU Maps (p.10) for more information.

Firearms

If you are hunting small game in an area where there is an open season for deer, moose, elk or black bear, you may not possess or use a centre-fire rifle or shells loaded with ball or with shot larger than No. 2 shot (except for steel shot not larger than triple BBB, or bismuth shot not larger than double BB), unless you have a valid licence to hunt big game (deer, moose, elk or black bear) during the relevant open season.

This restriction does not apply south of the French and Mattawa rivers during an open season for deer that is restricted to the use of bows, or to hunters with a valid Small Game Licence who are hunting wolf or coyote during an open season for deer, moose, elk or black bear.

A person hunting small game may not carry or use a rifle of greater calibre than a .275-calibre rifle, except a muzzle-loading gun, in the geographic areas of Brant, Chatham-Kent, Durham, Elgin, Essex, Haldimand, Halton, Hamilton, Huron, Lambton, Middlesex, Niagara, Norfolk, Northumberland, Oxford, Peel, Perth, Toronto, Waterloo, Wellington or York. **Note:** It is illegal to hunt ring-necked pheasants with a rifle.

Game Bird Hunting Preserves

You may hunt ring-necked pheasant, northern bobwhite, wild turkey, gray (Hungarian) partridge and chukar throughout the year on a licensed game bird hunting preserve. **Note:** There are prohibitions on northern bobwhite and wild turkey in some areas. You must arrange with the owner/operator of the licensed game bird hunting preserve as to when you can hunt.

You are required to have a valid Outdoors Card, hunter accreditation (such as Licence Summary noting your accreditation) and proof of firearm accreditation (if you are hunting with a gun). You will be required to present this documentation to the owner/operator of a licensed game bird hunting preserve before hunting.

Migratory Game Birds

Migratory game bird seasons are the responsibility of the federal government. The *Migratory Birds Convention Act, 1994* and associated *Migratory Birds Regulations, 2022* govern the hunting of migratory game birds. In 2022, the regulations were modernized with important changes, such as possession limits, labelling requirements and the use of crossbows. Also, please note that Waterfowler Heritage Days have been abolished and replaced with a Migratory Game Bird Hunting Permit for youth. For more information on the changes to hunting migratory game birds, please consult the migratory game bird hunting web page at canada.ca/en/environment-climate-change/services/migratory-game-bird-hunting.html.

You must have a federal Migratory Game Bird Hunting Permit (MGBHP), Wildlife Habitat Conservation Stamp, and an Ontario Small Game Licence in order to hunt migratory game birds. This includes when hunting these species with falconry birds (Falconry Licence required) or non-indigenous falconry birds. MGBHP and Wildlife Habitat Conservation Stamp are available for purchase at most post offices, or online at permis-permits.ec.gc.ca/en. Season dates and bag limits are announced mid-summer in the Migratory Birds Hunting Regulations Summary which can be found at canada.ca/en/environment-climate-change/services/migratory-game-bird-hunting/regulations-provincial-territorial-summaries/ontario.html.

It is illegal to hunt migratory birds within 400 m (437 yd) of where bait has been deposited unless that place has been free of bait for at least 7 days. It is also illegal to deposit bait in any place during the period beginning 14 days before the first day of the open season for that place and ending on the day immediately following the last day of the open season for that place for any hunted migratory game bird.

More information on migratory birds is available at the Canadian Wildlife Service website at [canada.ca/en/services/environment/wildlife-plants-](https://canada.ca/en/services/environment/wildlife-plants-species/migratory-birds.html)

[species/migratory-birds.html](https://canada.ca/en/services/environment/wildlife-plants-species/migratory-birds.html) or at the Canadian Wildlife Service Ontario regional office located at 4905 Dufferin Street, Toronto, Ontario, M3H 5T4, by phone at 1-800-668-6767 or email enviroInfo@ec.gc.ca.

Double-crested Cormorants

Double-crested cormorants may be hunted during their fall hunting season (p.87) in accordance with general Small Game Licence requirements, similar to other game bird species, subject to additional rules and requirements.

Cormorants can only be hunted using shotguns, including muzzle-loading shotguns, not larger than 10 gauge with non-toxic ammunition. You cannot use a shotgun loaded with a shell containing a single projectile.

Hunters are permitted to hunt double-crested cormorants from a stationary motorboat. This means the motorboat must not be in motion and the power to the motor must be turned off.

Hunters must have adequate means of retrieving any double-crested cormorant that is shot and must immediately retrieve the bird and include it in their bag limit. Should hunters choose not to use the birds they harvest, they must be retrieved and disposed of by either:

- delivering it to an approved waste disposal site that permits the disposal of dead animals
- delivering it to a disposal facility, or using the services of a licensed collector, under the [Ontario Regulation 105/09 : Disposal of Deadstock Regulation](#) made under the [Food Safety and Quality Act, 2001](#)
- burying it on private land owned by the hunter, or on private land occupied by the hunter with consent of the landowner

All other relevant federal, provincial and municipal laws/rules related to hunting apply (for example, trespassing, municipal discharge of firearms by-laws, federal firearm licensing requirements, restrictions on hunting in provincial parks).

Small Game and Furbearing Mammals

Possession of Furbearing Mammal Pelts during the Closed Season

Small game hunters who harvest furbearing mammals during the open season (including wolf and coyote) and have not sold or otherwise disposed of the pelts by the close of the season must obtain a Licence to Possess a Pelt in order to possess pelts during the closed season.

Contact your local MNR work centre to obtain a Licence to Possess a Pelt (available free of charge). It is illegal to abandon or otherwise allow the pelt of a furbearing mammal to spoil or be destroyed.

For more information on royalties and shipping of furbearing mammals or their pelts, go to the General Regulations section (p.37).

Hunting Raccoon at Night

If you wish to hunt raccoons at night, you must be accompanied by a dog licensed for the purposes of hunting. Each dog participating in the hunt must be licensed. You can only use a rim-fire rifle. Raccoon night hunters must have their guns unloaded and encased while in a vehicle. A licensed night raccoon hunter may use a light if it is not shone from or attached to a vehicle or boat. Learn more at ontario.ca/HuntRaccoonsAtNight.

Bullfrog Requirements

Bullfrogs may be taken for personal consumption under the authority of a valid Sport or Conservation Fishing Licence. No commercial harvest of bullfrogs is permitted. The only firearms permitted for harvesting bullfrogs are bows (such as compound, recurve, long or crossbow). A person may take bullfrogs at night without a firearm and may shine a light for that purpose.

Note: Generally, it is illegal to harvest frogs in provincial parks or Crown Game Preserves.

Share your observations

Tell us about your observations in the field to help Ontario (and beyond) better understand our wildlife populations and other natural resources!

100% of licence sales go towards the future of fish and wildlife in Ontario

Purchasing a licence supports:

- big game surveys to assess populations
- monitoring big game populations for disease
- hunter education
- a province filled with opportunities to hunt deer, moose, elk, bear, wild turkeys and small game
- conservation officers who protect natural resources and public safety

Ontario 

Made in Canada

Since 2012

iHunter ON

Tools to help you succeed in the field

Multiple land boundary layers • Satellite, road, and terrain base maps • Map caching for offline • Breadcrumb tracking and custom waypoint pins • GoTo and driving directions • Sun, moon, and weather forecasts • Most features work without cell service

iHunter ON Core just \$5 /year

Game season summaries by WMU • 3D base map elevations • Define custom regions for offline map caching • Current wind conditions at any location • Add additional map layers from external sources • Unlimited pins and contacts

Connections and privacy you control

Connect with friends and hunting partners to chat and share • Broadcast your location for convenience and safety • Share waypoints, tracks, and drawings through the app or SMS (Sharing features are completely optional and controlled by you)

iHunter ON Pro just \$45 /year

13 more boundary layers for things like private and Crown land • iHunter maps in driving navigation • CarPlay and Android Auto app integrations • All the benefits of iHunter Core (Includes land use policy documents for Crown land)

Available for iOS, Android, and most desktop browsers. Free to download. Subscriptions are optional and charged annually. Find out more at store.ihunterapp.com/ontario or get in touch at info@ihunterapp.com
